PATENT Galvanic Cement
FOR ROOFING.

THE undersigned having purchased the right for this Cement in Mifflin and Centre counties are now prepared to furnish and put it on roofing, where desired the roof being sheeted by the owner Scientific men under the direction of government, and architects and builders in various parts of the country, for years have been studying and experimenting to discover some composition or article for roofing, which would resist the changes of our climate, and would unite the qualities of *Imperviousness to Water, Incombustibility, Durability and Cheapness* No article now in use possesses these qualities Shingles are not fire proof, and cannot be used upon flat roofs Slate can only be used upon steep roofs. The contraction, expansion and rusting of metallic roofs are so great in this changeable climate that they soon become worthless, or the repairs will cost more than a new roof. The various cements and compositions which have been introduced, can be supplied only to very flat roofs, and they are all so affected by the action of the weather that they will melt and run in summer and crack in winter, and in a short time become crumbly and worthless The inventor of the Galvanic Cement has labored twenty years to obviate these difficulties, and it is believed by those who have had opportunities to test the matter, that he has entirely succeeded —As now applied,

First - It is completely impervious to water - Water may continually stand upon the roof without affecting it in the least

Second—It is fire proof It is so incombustible that it will afford ample and perfect protection against fire sparks and burning shingles from another building immediate adjoining

Third—It is durable It is not injured by atmospheric changes, having been tested for several years by the Patentee, at Syracuse, N Y

Fourth—It is cheap Roofs will be put on for about half the cost of tin and will last much longer

Fifth—Repairs are easily and cheaply made

Sixth—It is sufficiently elastic to entirely resist the expansion and contraction by heat and cold, and will remain perfect and solid in the warmest and coldest weather

Seventh - It is adapted to all kinds of roofs either flat or steep

Eighth It is valuable for repairing old roofs Old shingle roofs may be covered without removing the shingles Old metalic roofs can be made perfectly tight and secure

Ninth - It is especially adapted to all kinds of seaming around battlements, sky lights and chimneys and for the lining of eave troughs and gutters Roofs which have given trouble for years and which have continued to leak in spite of all efforts can be made perfectly secure by this Cement

Tenth It has been proved to be the best article ever used for covering car tops and steamboat decks

Eleventh This cement applied to new tin roofs preserves them from rusting, by furnishing a coat which is at once impervious to water and an almost perfect non conductor of heat

Twelfth It is the only roofing material patented which contains India rubber and gutta percha

For information in regard to this cement we invite owners of property to address the proprietor at Locks Mills Mifflin county Pa

READ THIS SUFFERING HUMANITY

THE UNDERSIGNED TAKES THIS method of informing the public generally, that there is no medicine now offered to the public that is equal to DU VALL'S GALVANIC OIL, in relieving suffering humanity

I was an observer of its effects in a friend of mine, who suffered almost everything except death itself, from a neuralgic affection which resisted the best medical treatment in Centre County. We applied freely the Galvanic Oil to the painful part, and gave some inwardly, and in 20 minutes the patient was so much relieved that he fell asleep, and when awakened was free from pain and continued so up to the present time This is no fable It is a positive fact which I am willing to make good at any time. Also a case of FELON was cured in nearly the same length of time.
