VEGETABLE CATTLE POWDER

PREPARED BY

BREINIG, FRONEFIELD & CO.

No. 187 North Third Street, Philadelphia.

THIS powder is entitled by the united testimony of all who have used it to the first rank of all those CATTLE MEDICINES, which have been thought praiseworthy for many years. Indeed we challenge any person to make a superior, or any powder that acts in the same manner. If the animal be perfectly healthy it will either increase the amount of milk or cream and butter; or the animal will improve rapidly in fat. It will therefore in time be considered we have no doubt one of the staple articles of every Farmer, who keeps a dairy; and of every person owning a horse. It is not one of those kind of MIXTURES that merely saved an animal up for a short time, but it will by the capacity which it has of converting HIPPURIC ACID (which is an effete matter) into LACTIC ACID OR OLEINE; cause a greater amount of nutritious matter to be extracted from the same amount of food, that possibly could be, were the active principles of nutrition to pass out of the system in the form of Hippuric Acid.—We have received a multitude of evidence to prove what we have said above. Suffice to say:

We have mixed the active agent, with a great number of VEGETABLE plants and herbs, which time will use here proved to be tactful, pure vine[illegible] in the digestion of the fodd[illegible] the blood, from which the M[illegible] It may be used for Hor[illegible] ing complaints and [illegible]

YELLOW WATER[illegible] which destroys many valuable horses every year, is now often entirely cured by the free use of this powder, in all cases it will prevent the disease from coming on.

This disease is owing to a bad and impoverished state of the blood which becomes thin, watery and of all yellow color.

This powder by improving the stomach and giving to the blood a greater quantity of red particles, affords the best and only possible chance of recovery. If the horse is far gone, give morning and night a tablespoonful in wet feed, if in the beginning once a day at noon, it only to prevent the disease twice a week.

SLABBERING.—This is the ruination of many valuable Horses by extinction; by a constant discharge of saliva which ought to go into the stomach to assist digestion. It is a species of salivation often produced by BADLY TOBACCO growing in the pasture ground. A Tablespoonful three times a week will frequently arrest the flow, if it does not depend on the Tobacco in the grass, under such circumstances the animal must be kept in the stable.

DISTEMPER.—If the powder is early and freely used, no other remedy need be used, it has already cured hundreds of HORSES of this troublesome disease to the surprise of those who used it. If not attended early, before matter has formed in the neck it cannot reach the animal perfectly until the matter is discharged, then it early and prevent such a result. A Tablespoonful once or twice a day is enough.

GLANDERS.—This disease has baffled all FARRIERS.—Give this powder a fair trial and it will do wonders in this terrible and hitherto incurable malady. It is a disease of the glandural system and kept up by imperfect nutrition, in such cases a Tablespoonful every day twice for a month or two, in constant succession, will in nine cases out of a dozen effect a cure, it has been fairly tested.

Coughs and shortness of Breath depending on weak lungs, a Tablespoonful every morning; if it abates once or twice a week.

POOR LOW-SPIRITED HORSES, or where there is any remnant of Founder or stiffness of motion, and the Horse will not fatten, or where the hair is rough and stands straight out, the first second to do no good, the Powder produces almost immediate improvement of the animal; the digestion improves and with it all the sluggishness of the animal disappears, becoming lively and spirited, and the hair smooth and slick.

COWS.

FOR MILKING COWS, we are fully convinced that it not only improves the quality, but that it increases the amount of Milk, Cream and Butter; some who have tried the experiment say a Pound a Week, others say half a pound while one person insisted upon it that he made two pounds more a week from each Cows. We think it will be found to average from a half to a pound per week on each Cow, if the Cows are perfectly healthy. This additional amount is made by the conversion of the Hippuric Acid into Nitrogenous and fatty compounds; also by supplying the oxygen taken in by the lungs, with the elements of respiration without taking any of the Nitrogenous portion of the feed.

HOLLOW HORN or WOLF; HOOF DISEASE, and all other diseases of neat cattle depending upon a bad state of the fluids, are removed speedily and effectually.—Cows, whose milk is blue, thin and watery and where it does not yield much cream, or where Cows give bloody milk, or which are used to stand long dry, it will be found an almost infallible remedy, by improving the condition of the blood and creating a healthy digestion; a Tablespoonful every day or every other day as it may be necessary.

HOGS.

Pigs in the summer often overheat themselves, get swelled necks, coughs, ulcers in the Lungs and Liver, which cause them to die very suddenly, these may be prevented entirely by putting a pound or a half into a Barrel of swill; and it will at the same time considerably hasten the fattening process.

N. B.—In an animal which is giving milk and you are desirous to fatten at the same time, you should not give more than a tablespoonful once a week or it will retard the formation of fat by increasing the amount of Milk.

Let each person try its effects for himself and he will soon be satisfied of its excellent qualities, and that no Farmer should be without it.

For the purpose of finding out still further how far our justly celebrated CATTLE POWDER, is entitled to the confidence of an intelligent people; we have addressed Letters to all parts of the United States, where our Powder has been used, and we are able now from the evidence thus brought before us, to assure every Farmer, Dairyman and Horseman, that it has done far very much exceeded our most sanguine expectations.

With the additional knowledge thus far obtained, We Hope we will be enabled to make the best and most perfect CATTLE MEDICINE ever yet offered to a discerning people. It acts as a valuable promoter of digestion, improves the quality of the blood and thus increases the amount of either Fat, Milk and consequently of Butter.—Even in the healthy Animal

Beware of Counterfeits as the extensive sale of our powder has induced others to make an imitation of it.—Each pack has our written Signature on the cord.
