WL SERIES

21 Ft. 8", 25 Ft. & 30 Ft.

PULVI-MULCHERS

Brillion's Pulvi-Mulchers are one-pass secondary tillage tools that provide clod-free seedbeds.

The front rollers of the Pulvi-Mulcher break up surface clods. "C" shaped ribbon teeth or "S" spring tine teeth break up the soil to six inches in depth and pull clods to the surface. The rear roller wheels then crush those clods and convert the soil into a firmed, mulched seedbed that locks in moisture at the root level.

The result is a uniformly firmed and tilled seedbed from top to bottom, but not compacted. You get the full benefit of the capillary action of the soil for better germination, better moisture condition and faster decomposition of trash.

ROLLER WHEELS

The fact that Brillion leads the industry in the sale of Pulverizers and Pulvi-Mulchers is because all Brillion Roller Wheels are made in Brillion's own modern foundry. This directly affects the cost and quality of these machines and gives Brillion a considerable advantage over the competition. Brillion's newest design, a 20", six spoke ductile iron notched wheel **(five-year limited warranty against breakage.)**

20" DUCTILE IRON ROLLER WHEEL
