Leading the way in advanced technology.

The re-engineered Series II Gleaner® Combine provides greater reliability and more efficient harvesting for the way you farm today. It's the combine you helped us design.

You wanted higher productivity. Our Natural Flow rotary harvesting system puts cleaner, more marketable grain in the bin.

You wanted lower operating costs. Our reliable state-of-the-art-air-cooled diesel engine has a simplified design that allows for hassle-free maintenance, longer life and greater fuel efficiency.

You wanted more operator comfort and greater control. Our ComforTECH™ cab combines an advanced console with fatigue reducing features and improved visibility. You wanted strong support. Every Gleaner is backed by a strong AGCO warranty and dealer servicing.

Check out the rotary you've been asking for at the Gleaner dealers listed here. And ask about flexible AGCO financing.

Beef Producers To Hold Annual Meeting

ADDISON, N.Y. — Fred E. Zeiner of Morris, president of the New York Beef Cattlemen's Association (NYBCA), announced final plans for the two-day annual meeting to be held January 23 and 24 at the Corning Hilton Inn in Corning, N.Y.

For the first time, the event is being held on a Saturday and Sunday, to permit the many members who have off-farm employment an opportunity to participate and attend the educational programs.

Zeiner noted that attention to management skills and the bottom line will mark the difference between those who survive in this industry and those who do not. With this in mind, the educational program has been planned to cover such topics as the ideal carcass for today's beef industry, the ideal feeder calf from the feedlot operator's point of view, selection of the proper bull for today's industry, use of alternative feeds for optimal cow herd performance, ideal cow for the beef industry, health issues for New York beef producers, and finally a panel discussion will put it all together.

Dr. Charles McPeake, from the University of Georgia, will be the keynote speaker at the educational program. McPeake is the executive director of the Beef Improvement Federation, the organizing body that works with all segments of the cattle industry to standardize performance selection guidelines for beef cattle. In 1991, changes were made in the New York State bull test program in order to follow the BIF guidelines for central test stations. Prior to working at the University of Georgia, McPeake was the director of the largest bull test in the U.S. — the Oklahoma State University Bull Test Program which tests more than 600 head of potential herd sires annually. McPeake will discuss the selection of herd sires for today's beef industry.

The New York Cattlewomen, with Mrs. Eldora Benson of Potsdam presiding, will hold their annual meeting at the Hilton on Saturday, at 11 a.m. Members of the Cattlewomen will host a wine and cheese reception prior to the annual banquet scheduled for Saturday evening. Following the banquet, an auction will be held to benefit the Cattlewomen's project to provide beef products to homes for abused/battered women in various areas of New York state. They have increased their coverage to forty counties in New York.

A small trade show has been organized and will be in operation both days of the meeting.

The New York Beef Industry Council, with Jerry Reed, executive director in charge, will hold its annual meeting on Saturday at 4 p.m. The NYBCA annual business meeting will be held Sunday at 8:30 a.m. followed by the election of 1993 officers. Slate includes Donald Gray of Springwater for president; Durwood Adams of Ontario, vice president; David Pellett of Canton, secretary; and Charles Boone of Westerlo, treasurer.

Annual business meetings of the New York Charolais Association and the New York Simmental Association will be held at 10 Sunday morning.

The event will conclude on Sunday with the annual awards luncheon, where the selections for Cattleman of the Year, County Extension Agent of the Year, and the Outstanding Youth will be announced

There is a small registration fee. Further information is available from Shirley Brown, Addison, N.Y., (607) 359-3662.
