Newspaper Establishment for Sale.

A weekly newspaper establishment, located in one of the most flourishing inland towns in the interior of Pennsylvania, is offered for sale, the proprietor wishing to change his business in consequence of ill health. The subscription list numbers about 400, (nearly all of which have been voluntary subscriptions) which could no doubt be doubled in a very short time by proper exertion. The paper has averaged about ten columns of paying advertisements since its commencement, and the jobbing is quite respectable, and considerably more than that of many other towns of greater size and population. The office is well supplied with materials, having three presses, one of which is a "Washington," from 600 to 800 lbs. of body type, and a handsome assortment of job type. The town is beautifully and advantageously located for business, being in the immediate vicinity of canals and railroads, leading in almost every direction. To one or two young men wishing to engage in business, this is a fine opportunity, as there is not much doubt that, in the course of a few years, the population and business of the town will rapidly increase. For further information inquire of the editor of this paper.

PROTECTION FROM LIGHTENING!

TO THE PUBLIC.

WE respectfully offer to the public our superior Lightening Rods of Spiral-twisted Carbonized Annealed Iron with Zink Protectors and electro positive elements combined in their manufacture, thus rendering them equal to copper as conductors. They are made in ten feet lengths, with accurately fitted brass screw connecting joints, an entire new style of attatchments for brick or frame buildings. Also glass isolaters of a novel and ingenious construction forming a lock—the whole mounted with a solid silver or gold plated point twelve inches long, which possess the power to an extraordinary extent of discharging the opposite elements of the most fearful thunder storm, and embraces every scientific improvement in lightening rods up to this time.

Thus guarding, both laterally and obliquely, the whole constitutes the most magnificent and perfect silent conductors ever presented to the public. We have not compromised safety by affording those rods at such low rates. We have given the greatest attention to their construction so that they may be readily attatched. The astonishing power of the negative magnets in discharging the air of its opposite elements has been clearly demonstrated by the electrometer, when unmagnetized points have shown but slight results though placed in the same condition. In fact they gather and silently discharge electricity from the atmosphere, when you would scarcely suspect any of being present. Our improvement having received the approval of men of science, the public are cautioned against purchasing of those who have substituted inferior imitation. Have good rods or none. We manufacture for the whole United States and for exportation to any part of the world.

All orders for rods, wholesale or retail, though the Post Office, will be promptly attended to if addressed to the subscribers at Carlisle, Pa.
