FIRST MAIL ROUTE ACROSS THE ALLEGHENIES.—The first mail route crossing the Allegheny Mountains was opened from Philadelphia to Pittsburgh, in 1788, and was extended (semi monthly) to Louisville in 1794, and to Vincennes in 1800. From Vincennes it was further extended to Cahokia, in 1805. In 1810 a mail route was established by act of Congress, from Vincennes to St. Louis, Kaskaskia, Prairie du Rocher, and Cahokia.

In the same year a mail route was opened from Louisville to Shawneetown; and in 1816 from Vincennes to the latter place; in 1810 from Vincennes to Cape Girardeau, by way of St. Genevieve; in 1814, to Johnson Court House, and in 1818 to Belleville. In 1822, Edwardsville, Springfield, and Peoria were connected by a mail route; and 1823 a mail was carried from Carrollton to Ross' Settlement, now Atlas, in Pike county. In 1824 there was a direct route from Vandalia to Springfield, and from Edwardsville to the latter in 1827. The first route from the southern part of the State to Chicago, was established in 1832, from Shelbyville, via Decatur and Fox river; and in the same year a route from Chicago to Danville and Green Bay, and also from Tecumseh by way of Niles to this city. Direct routes from Chicago to Galena and Springfield were opened in 1836. In 1827 and 1828 four-horse coaches were put on the line from Vincennes to St. Louis. So irregular was the communication by mail in 1820 to 1822, that the Territory of Oregon is now in possession of the latest news more early and more promptly than was Illinois at that period.—[Proceedings of Chicago Historical Society, March 26.

NIGHT AIR.—An extraordinary fallacy is the dread of night air. What air can we breathe at night but night air? The choice is between pure night air from without, and foul night air within. Most people prefer the latter. An unaccountable choice. What will they say if it is proved to be true that fully one-half of all the disease we suffer from is occasioned by people sleeping with their windows shut? An open window most nights in the year can never hurt any one. This is not to say that light is not necessary for recovery. In great cities night air is often the best and purest air in the twenty-four hours. I could better understand shutting the windows in towns, during the day, than during the night, for the sake of the sick. The absence of smoke, the quiet, all tend to make night the best time for airing the patient. One of our medical authorities on consumption and climate, has told me that the air in London is never so good as after ten o'clock at night.—Always air your room, then, from the outside air, if possible. Windows are made to open, doors are made to shut—a truth which seems extremely difficult of apprehension. Every room must be aired from without—every passage from within. But the fewer passages there are in a hospital the better.—[Florence Nightingale.

THE ATLANTIC CABLE.—The Boston Transcript learns from parties interested in the enterprise, that some fifty miles of the Atlantic cable have been taken up, from a point extending seaward from the shores of Trinity Bay, and that fractures were found in the cable just where they had been indicated by the instruments on shore. The intention is to underrun a similar length of the wires on the European side, and it is thought by the sanguine promoters of ocean-telegraphing that then the Atlantic cable will be made to work.

THOSE who live on Fifth avenue, the aristocratic residence street in New York, stand in slippery places. It is the calculation of one of the most experienced house agents and real estate brokers in the city, that the average tenure of the magnificent mansions in that avenue, by the families of commercial aristocracy, does not exceed three years; in other words, that the occupants are on an average failing once in three years. A great country this!

M. AUGUSTE MARIETTE, an eminent French archaeologist, writes from Egypt that he has discovered the remains of a large palace in granite in the immediate vicinity of the Sphinx—He takes this palace to be that of Chephren, who built the great pyramid. No less than seven statues of of this prince have been found in the palace.

AN EXTENSIVE ITEM.—The mere cost of land on which British railways are constructed has averaged $43,000 per mile—as much as the average cost of making a railway in the United States.

Quack Nostrums.

THE NEW YORK DAY BOOK says: "The majority of Hair Washes, Hair Dyes, Hair Tonics, Hair Oils, and the numberless preparations which are now before the public under such extravagant, hyperbolical and fantastic titles as we see paraded in show window cards, and newspaper headings, as hair preparations, are all humbugs of the first water; their real merit, when they possess any, is, that they do no harm. HOG'S LARD, WHALE OIL, LARD OIL, SWEET OIL, scented and colored, make up, when in beautiful wrappers and white flint glass bottles, the costliest character of tonics; and when thus costly, are baptised with some trisyllable term, and caught at by verdant young and old of both sexes. But this is not the character of Professor Wood's Hair Restorative. This gentleman comes before the world without any "high falutin" Xilophiloriam, or any other astounding and startling catchpenny terms; he simply advertises a Hair Restorative—what it expresses, precisely—and as a Restorative it acts. Buy Professor Wood's Hair Restorative, and as you value your scalp, eye, your very brains, apply nothing else; for it may be that you will get some worse substance than perfumed lard oil on your cranium. Remember, Wood's Restorative for the Hair is the best article extant."

It Will, by Nature's own Process,
Restore Gray Hair to the Original Color,
Will make Hair Grow on Bald Heads,
Will restore the Natural Secretions,
Will remove at once all Itching,
Will remove all Dandruff,
Will cure all eruptions—even Scald Head,
Will make the Hair Soft and Glossy,
Will make the old appear young again,
Will preserve the Color of Hair to old age,
Will always Fasten it and stop its Falling,
And is one of the best Toilet Articles for the Hair now in use.

In all acute diseases, such as Fevers, Inflammations, Diarrhea, Dysentery, Croup, Rheumatism, and such eruptive diseases as Scarlet Fever, Measles, and Erysipelas, the advantage of giving the proper remedies promptly is obvious, and in all such cases the specifics act like a charm. The entire disease is often arrested at once, and in all cases the violence of the attack is moderated, the disease shortened, and rendered less dangerous.

Coughs and Colds, which are of such frequent occurrence, and which so often lay the foundation of diseased lungs, bronchitis and consumption, may all be at once cured by the Fever and Cough Pills.

In all chronic diseases, such as Dyspepsia, Weak Stomach, Constipation, Liver Complaints, Piles, Female Debility, and Irregularities, old Headaches, Sore or Weak Eyes, Catarrh, Salt Rheum, and other old eruptions, the case has specifics whose proper application will afford a cure in almost every instance. Often the cure of a single chronic difficulty, such as Dyspepsia, Piles or Catarrh, Headache or Female Weakness, has more than paid for the case ten times over.

BEING prepared to receive orders for their SUPERIOR GREEN AND PURPLE ROOFING SLATES, delivered after the opening of navigation, would call attention to the low cost of this FIRE-PROOF material, and to the great purity of rain-water collected from slate roofs, not being impregnated with taint of decayed shingles or the poisonous qualities of painted metals. They would also caution the public against parties falsely representing themselves as Agents, thereby furnishing an inferior article in our name—the only agency established by the Company being in the City of New York. Parties in Canada and the North Western States wishing for the GENUINE EAGLE CO'S SLATES will please address the Company, at "Hydeville, Vt.," where orders will receive prompt attention.

As accidents will happen, even in well-regulated families, it is very desirable to have some cheap and convenient way for repairing Furniture, Toys, Crockery, etc.

Spalding's Prepared Glue

meets all such emergencies, and no household can afford to be without it. It is always ready, and up to the sticking point. There is no longer a necessity for limping chairs, splintered veneers, headless dolls, and broken cradles. It is just the article for cone, shell, and other ornamental work, so popular with ladies of refinement and taste.

This admirable preparation is used cold, being chemically held in solution, and possessing all the valuable qualities of the best cabinet-makers' Glue. It may be used in the place of ordinary mucilage, being vastly more adhesive.
