Reapers & Mowers.

THE WORLD'S REAPER AND MOWER.

Its compactness and symmetry will at once arrest every mechanical eye.

The frame is of solid iron and is of a single piece.

The journals, shafting and gearing are all secured in the most substantial manner and can never change their relative positions.

THE GEARINGS ARE ALL CUT OUT OF SOLID IRON,

and run with the precision of clock-work—thus obviating the self destruction common to all harvesting machines heretofore invented.

A neat cast iron case incloses the works and protects them from dirt, water, grass, rust and all other external causes of destruction

Such gearing, in such a frame, and protected thus, can always be relied on to do the work required and last an ordinary lifetime.

Many other advantages possessed in this machine will be explained in our Annua Catalogue, which will soon be in the hands of all our local and traveling agents.

We build only two sizes of the World's Reaper, differing only by weight, capacity and cost.

No. 1 (large size,) cuts 4 feet and 4 inches in grass, and 5 feet in grain, and as a mower costs $200, as a mower and reaper combined $250, as a mower and self rake atachment $275.

No. 2 cuts in grass, 4 feet, and in grain a little less than 5 feet, costs $175 and $225.

We are confident of offering you the cheapest machine in the market. It costs but one fourth more than a rough machine and will last four times as long!

E BALL & CO., Canton, O.

ISAAC HAUPT, Bellefonte, agent for Centre, Mifflin and Clearfield, Counties.—Sub agents wanted. We will have 2 Reapers on exhibition in front of the Court House during Court week, one with self-rake and side delivery, where they can be seen until harvest. 12-20.
