MARK WELL THE TIME!

And CALL as EARLY as possible. The time limited and the appointments will be *punctually kept* as above.

If sick with any CHRONIC diseases, *do not delay*, as time only tends to confirm and render a *cure* more protracted and difficult.

Dr. Jackson will make examinations of the Lungs and Chest, by the use of the Stethoscope, Free of Charge.

Dr. Jackson, although paying *special* attention to Lung, Throat, Heart, and Female Diseases, also invites consultation in all Chronic diseases incident to the human system. Seeing many thousand cases every year, he is well prepared to give an opinion as to the curability of any case.

Patent Galvanic Cement

FOR ROOFING.

THE undersigned having purchased the right for this Cement in Mifflin and Centre counties, are now prepared to furnish and put it on roofing whenever desired—the roof being specified by the owner. Scientific men under the direction of government, and architects and builders in various parts of the country, for years have been studying and experimenting to discover some composition or article for roofing, which would resist the changes of our climate, and would unite the qualities of *Imperviousness to Water, Incombustibility, Durability and Cheapness.* No article now in use possesses these qualities. Shingles are not fire proof, and cannot be used upon flat roofs. Slate can only be used upon steep roofs. The contraction, expansion and rusting of metallic roofs are so great in this changeable climate that they soon become worthless, or the repairs will cost more than a new roof. The various cements and compositions which have been introduced, can be supplied only to very flat roofs, and they are all so affected by the action of the weather that they will melt and ruin in summer and crack in winter and in a short time become crumbly and worthless. The inventor of the Galvanic Cement has labored twenty years to obviate these difficulties, and it is believed by those who have had opportunities to test the matter, that he has entirely succeeded.—As now applied,

First. It is completely impervious to water—Water may continually stand upon the roof without affecting it in the least.

Second. It is fire proof. It is so incombustible that it will afford ample and perfect protection against fire sparks and burning shingles from another building immediately adjoining.

Third. It is durable. It is not injured by atmospheric changes, having been tested for several years by the Patentee, at Syracuse, N Y.

Fourth. It is cheap. Roofs will be put on for about half the cost of tin and will last much longer.

Fifth—Repairs are easily and cheaply made.

Sixth—It is sufficiently elastic to entirely resist the expansion and contraction by heat and cold, and will remain perfect and solid in the warmest and coldest weather.

Seventh—It is adopted to all kinds of roofs, either flat or steep.

Eighth. It is valuable for repairing old roofs. Old shingle roofs may be covered without removing the shingles. Old metalic roofs can be made perfectly tight and secure.

Ninth. It is especially adapted to all kinds of scuttings around battlements sky lights and chimneys, and for the lining of eave troughs and gutters. Roofs which have given trouble for years, and which have continued to leak in spite of all efforts can be made perfectly secure by this Cement.

Tenth. It has been proved to be the best article ever used for covering car tops and steamboat decks.

Eleventh. This cement applied to new tin roofs preserves them from rusting by furnishing a coat which is at once impervious to water and an almost perfect non conductor of heat.

Twelfth. It is the only roofing material patented which contains India rubber and gutta percha.

For information in regard to this cement we invite owners of property to address the proprietor at Locks Mills, Mifflin county, Pa.
