TO ALL PERSONS AFFLICTED WITH Sexual Diseases, such as SPERMATORRHŒA, SEMINAL WEAKNESS, IMPOTENCE, GONORRHŒ, GLEET SYPHILIS, the Vice of ONANISM, or SELF ABUSE &c &c.

The HOWARD ASSOCIATION, in view of the awful destruction of human life, caused by Sexual diseases, and the deceptions practised upon the unfortunate victims of such diseases by Quacks, several years ago directed their Consulting Surgeon, as a CHARITABLE ACT worthy of their name, to open a Dispensary for the treatment of this class of diseases, in all their forms and to give MEDICAL ADVICE GRATIS, to all who apply by letter, with a description of their condition, age, occupation, habits of life, &c) and in cases of extreme poverty, to FURNISH MEDICINES FREE OF CHARGE. It is needless to add that the Association commands the highest Medical skill of the age and will furnish the most approved modern treatment.

The directors, on a review of the past, feel assured that their labors in this sphere of benevolent effort, have been of great benefit to the afflicted, especially to the young, and they have resolved to devote themselves, with renewed zeal, to this very important but much despised cause.

Just Published by the Association, a Report on Spermatorrhœa, or Seminal Weakness, the Vice of Onanism, Masturbation or Self-Abuse, and other Diseases of the Sexual Organs, by the Consulting Surgeon, which will be sent by mail, (in a sealed letter envelope,) FREE OF CHARGE, on receipt of TWO STAMPS for postage.

Patent Galvanic Cement

FOR ROOFING.

THE undersigned having purchased the right to attend this Cement in Mifflin and Centre counties, are now prepared to furnish and put it on roofing whenever desired—the roof being secured by the owner. Scientific men under the direction of government and architects and builders in various parts of the country, for years have been studying and experimenting to discover some composition or article for roofing, which would resist the changes of our climate, and would unite the qualities of *Imperviousness to Water, Incombustibility, Durability and Cheapness*. No article now in use possesses these qualities. Shingles are not fire proof and cannot be used upon flat roofs. Slate cannot be used upon steep roofs. The contraction, expansion and rusting of metallic roofs are so great in this changeable climate that they soon become worthless, or the repairs will cost more than a new roof. The various cements and compositions which have been introduced, can be supplied only to very flat roofs, and they are all so affected by the action of the weather that they will melt and run in summer and crack in winter, and in a short time become crumbly and worthless. The inventor of the Galvanic Cement has labored twenty years to obviate these difficulties, and it is believed by those who have had opportunities to test the matter, that he has entirely succeeded.—As now applied,

First—It is completely impervious to water.—Water may continually stand upon the roof without affecting it in the least.

Second—It is fire proof. It is so incombustible that it will afford ample and perfect protection against fire sparks and burning shingles from another building immediate adjoining.

Third—It is durable. It is not injured by atmospheric changes having been tested for several years by the Patentee at Syracuse, N Y.

Fourth—It is cheap. Roofs will be put on for about half the cost of tin and will last much longer.

Fifth—Repairs are easily and cheaply made.

Sixth. It is sufficiently elastic to entirely resist the expansion and contraction by heat and cold and will remain perfect and solid in the warmest and coldest weather.

Seventh. It is adapted to all kinds of roofs either *flat or steep*.

Eighth. It is valuable for repairing old roofs. Old shingle roofs may be covered without removing the shingles. Old metalic roofs can be made perfectly tight and secure.

Ninth. It is especially adapted to all kinds of seaming around battlements, sky-lights and chimneys, and for the lining of eave troughs and gutters. Roofs which have given trouble for years and which have continued to leak in spite of all efforts can be made perfectly secure by this Cement.

Tenth. It has been proved to be the best article ever used for covering car tops and steamboat decks.

Lastly. This cement applied to new tin roofs preserves them from rusting, by furnishing a coat which is of one impervious to water and an almost perfect non-conductor of heat.

Twelfth. It is the only roofing material for which contains India rubber and gutta percha.

For information in regard to this cement or a right to attend this Cement in Mifflin and Centre counties, or property to address the proprietor at Lacks Mills Mifflin county Pa.
