THE subscribers most respectfully announce to their fellow-citizens that they have perfected their arrangements to carry on the business of Tin Roofing on an extensive scale.

It is now close on four years since we first introduced tin roofing in this city. During that time we have covered over fifty thousand square feet of roof, with tin plate, and in all cases we believe we have given the most entire satisfaction. This kind of roof has been applied to the very best buildings in this city, including, among a large number of others, the two superb buildings on Penn street, owned by John L. Shomberger and John Bissel, Esqrs. That tin roofing (when skilfully laid on) is both permanent and durable, there can be no doubt; in proof of this, we can refer to the almost universal application of this kind of roofing in the large cities on the sea-board during the last twenty years; and from enquiring on the subject, we have yet to learn of any one of those roofs having been worn out. The roofs covered with tin in our own city are open to the examination of all who take an interest in the matter. We have also prepared a miniature plan of roofs, which may be seen at our establishment, where any other information will be given with pleasure.

Gold Washers.

H. PARRY has invented a machine for washing Gold, for which he has made application for a patent.—They are now offered for sale at the Warehouse of PARRY, SCOTT & Co., No. 183 Wood st., Pittsburgh.

Adventurers to California are invited to call and examine these labor-saving machines. They are simple in their construction, easily transported on the back or horses, weighing eighty pounds each, and can be put in operation in half an hour. They can be filled with provisions. It is the opinion of those who have seen the trial of one of these machines of smallest size, that two men will wash the amount from 150 bushels of sand or earth in a day, without the loss of a particle of the minerals. They can be increased in size and worked by water or mule power, if expedient. The machine is cheap for cash, the following articles:—Bureaus, Bedsteads, with Gaines's Iron Fastenings, and also the best quality of Screw Bedsteads, Tables, Stands, &c. &c. they wish it particularly understood, as there is so much injustice against machine made work, that they are willing their work to give satisfaction, and if not well made, the money shall be returned. mar10-3m
