Colver's Patent Conoave Beater Churn!
BUTTER IN FIVE MINUTES!!
WE call the attention of the public to the article heading this advertisement, and invite the enterprising and curious to call and witness its operation. All advertisements in relation to this invention, to the hundreds who have seen it tested, is superfluous.
1st. This Churn will produce Butter, gathering it in a mass, from seven pints of milk, in ten minutes! and from cream prepared, as families usually prepare it, in three to five minutes!!
2d. The utility of this invention is apparent, as better Butter can be produced from sweet milk, or cream, than cream soured in the usual way; and by means of this Churn, a little girl or boy can perform, in five or ten minutes, what has heretofore required the labor of a woman or man for one or two hours, and sometimes half a day.
3d. By simply turning a thumb screw, the wholeinside dasher is taken out, leaving nothing but the Butter and milk in the plain wooden bottom.
4th. It is the cheapest Churn ever invented, as the simplicity of its construction (though embodying a great philosophical principle) makes it but little to manufacture it.
5th. It is a common-sense Churn, as all will admit who will examine it.
We invite the public to call and witness its operation at our office in the Diamond, near the Black Bear Tavern, and at J. F. Beckham's, Federal st., Allegheny.
