SPECIAL STOCKS HELD ATTENTION

Recent Active Favorites Supplanted by New Group of Pool Issues

PRICES WERE IRREGULAR

New York, Oct. 8.—The New York Evening Sun's closing financial review today says:

Prices in the stock market were irregularly higher and dealings were distributed widely. Stocks were in supply at intervals, but demand was sufficient, at all times ready to absorb offerings. Many conceived the time to be opportune for turning paper profits into cash, while investment buying and covering by the shorts, whose interest has grown to large proportions in most of the leading speculative favorites, prevented anything savoring of weakness.

Accordingly a goodly number of those issues which have been pushed forward in the last week or so was supplanted by a new group comprising such stocks as Pittsburgh Coal, Fisher Body, Associated Dry Goods and People's Gas, which made gains of 5 to 18 points or more.

Crucible Steel, General Motors and Mexican Petroleum were by comparison neglected. Other strong spots among the miscellaneous shares were American Woolen, Worthington Pump, Barrett Company, Pierce-Arrow, Punta Alegre Sugar, Fisk Tire, General Cigar, Studebaker and United States Rubber.

The copper stocks were conspicuously strong, a movement reflecting the selling weariness of the shorts. For a long time the outlook for copper metal has been dubious at best. There is little at present to indicate a great deal of improvement, but there is much to suggest that the point of saturation in the market has been nearly if not quite reached, and if this is so it is natural that covering of contracts should begin.

The steels did not display aggressive symptoms on the constructive side until in the early afternoon, when United States Steel advanced to 100, two points up on the day.

Anxiety concerning the President has passed. Secretary Lane in addressing the industrial conference at Washington struck a note which should tend to work for harmony among the interests represented and no little ground is entered that substantial progress in adjusting the relations between capital and labor will be made.

The report of the House committee on a bill for creating a budget system for government appropriations and expenditures met with favorable response.

The director general's decision against an increase in freight rates before the end of the year had a rather dampening effect on railroad shares, as might have been expected, since the recent activity in that quarter has been largely predicated on rumors of an imminent grant.

The railroad list, however, was not weakened appreciably because numerous bullish factors in the long run were recognized in Mr. Hines's remarks. Recessions were fractional for the most part, although in a few cases there were gains, as, for instance, Southern Pacific, Texas and Pacific and New York Central.
