BUSINESS NOTES

The steel workers' and longshoremen's strikes are beginning to have a noticeable effect on the drug, chemical and dyestuff trades. In the intermediate colorings, drugs and chemical markets will say today, the activity has been curtailed by the scarcity of many products, owing to the steel strike, which affects the by-products coke ovens. The longshoremen's strike has held up exports of vegetable and animal oils and the foreign trade is temporarily dead. Linseed oil for this month's delivery has declined ten cents a gallon. Essential oils are still advancing. Quicksilver and mercurials are lower, but many crude drugs have advanced, owing to their scarcity. In spite of outside labor troubles bearing on that branch of the industry, an active business in heavy chemicals was done this week.

The desire of retailers of men's clothing to order spring stocks as early as possible is throwing the wholesale market into a feverish condition. Buyers have swamped the New York market and reports from Rochester, a large clothing center, tell of similar conditions there.

The United States shipping board has closed a contract with German interests for the movement of 70,000 tons of potash from Hamburg to Savannah, Charleston, Norfolk and Wilmington, according to an announcement made yesterday by Tarleton Winchester, chief of the special services department, which was organized to assist in finding return cargoes for shipping board vessels. About 10,000 tons of this German potash will be shipped to American ports during October and November, while the remaining 60,000 tons will follow in the next five months.

Notions required for summer clothing have sold in a record way for the season of 1920. According to the representative of a leading house, double the amount of business could have been taken if the way was clear to accept such orders.

Velveteens are getting an especially active call at present from the cloak trade. In some quarters this is regarded as evidence of the manufacturers turning from heavy woolens to the pile fabrics for making their weightier coats.

In spite of the continuance of warm weather quite a good deal of attention is being devoted to skating sets at the present time. In the things now offered angora wool sets of scarf and cap show up prominently. A number of "tams" are seen, made up in a two-piece effect and trimmed with a pretty embroidered motif at the front.

Conditions in the women's garment trade during the last few days have taken a turn for the better. Whether this has been caused by the weather, which has been slightly cooler, or by the shading of prices, which has become quite general through the trade, is not known.

Reference is made to a letter received from Mr. W. D. McNaull, President of the Company, which is summarized as follows:

The McNaull Tire & Rubber Co. has been incorporated under the laws of Delaware and has taken over the patents and the entire business of the McNaull Tire Company of Ohio. The new company is engaged in the manufacture of the McNaull Tire—a high grade pneumatic tire for motor vehicles.

The present plant of the company is located at Toledo, Ohio. It is a completely equipped tire manufacturing unit with a present output of 300 tires a day. Additions will be made to its equipment at once, which will increase the output to 1,000 tires per day very shortly.

The McNaull patents are a valuable asset to the company because they cover the McNaull feature which consists of an arch-shaped cross section instead of the usual round. Tires built in the shape of an arch sustain heavier loads with less air pressure than the ordinary round tires, fit any standard rim, and have proven eminently superior for motor trucks. Fifty trucks equipped with McNaull tires and operated by one company in Pittsburgh during a period of three years have shown an average mileage of 8,500 miles per tire.

Such consistent results have created a demand for McNaull tires that now far exceeds the supply. With the enlarged manufacturing facilities, it is estimated that the net earnings of the company for the first twelve months' operation after the payment of all taxes will be $10 per share or 40% upon the present selling price of the stock.

On behalf of the Company we offer the unsold balance of the capital stock of the McNaull Tire & Rubber Company, when, as and if issued and delivered to us and subject to the advice of counsel,

Philadelphia Markets

GRAIN AND FLOUR

WHEAT—Receipts, 90,844 bushels. The market was unchanged. The quotations for cash, in export, exceed government standard inspection, standard prices—No. 2 red winter, $2.38; No. 2 hard winter, $2.39; No. 3 red winter, $2.39; No. 3 hard winter, $2.39; No. 1 red winter garlicky, $2.37; No. 1 red smutty, $2.36; No. 1 red garlicky and smutty, $2.36. United States Food Administrator's purchases of wheat were based on the following schedule of discounts: No. 2 wheat, No. 3 under No. 2 wheat, No. 4 under No. 3; No. 5 wheat, 1c under No. 4; No. 6 wheat, 2c under No. 5; No. 7 wheat, 3c under No. 6. For all wheat otherwise conforming to the specifications of No. 3 or better, but deficient in test weight, the discount from the No. 3 price will be 3c per bushel for each one-pound deficiency in test weight. Wheat grading below No. 3 for reasons other than test weight is to be priced at the price of its merits. Smutty wheat will be discounted according to the degree of smut, but in no case less than 2c per bushel under the corresponding grade. Garlicky wheat will be discounted just as here before, 2c per bushel from the regular grade. Mixed wheat will be discounted from 2c to 5c, according to quantity and character of mixtures, but means where wheat contracted the trade may agree on one-pound No. 2 mixed wheat at 2c under the corresponding regular grade.

CORN—Receipts, 1256 bushels. The market was quiet and weaker. We quote No. 2 yellow in car lots for local trade, $1.37 nominal.

OATS—Receipts, 24,293 bushels. There was little trading and prices were unchanged. Quotations for car lots are as follows: No. 2 white, 81½@82c; No. 3 white, 80½@80½c; No. 4 white, 79½@80c.

FLOUR—Receipts, 2,827,754 lbs. in sacks. The market was dull and unchanged. The quotations were as follows: Per 196 lbs. in cotton sacks, spring patents, $11.50@12; straight, western, $10.50@10.75; do do, jute, $10.50@10; hard winter, straight, $11.25@11.75; do, short patent, $11.75@12.25; spring first clear, $9.25@9.75; do, patent, $12.10@12.85; do, short patent, $12.50@12.75; fancy spring and hard winter patent, $12.75@13.25.

RYE FLOUR sold slowly at former rates. We quote at $7.75@8 per bbl., in sacks, 98 to qualify.
