Tin Roofing.
THE subscribers most respectfully announce to their fellow-citizens that they have perfected their arrangement to carry on the business of Tin Roofing on an extensive scale.

It is now close on four years since we first introduced tin roofing in this city. During that time we have covered over fifty thousand square feet of roofs with tin plate, and in all cases we believe we have given the most entire satisfaction. This kind of roof has been applied to the very best buildings in this city, including, among a large number of others, the two superb buildings on Penn street, owned by John L. Shoenberger and John Bissel, Esqrs. That tin roofing (when skillfully laid on) is both permanent and durable, there can be no doubt; in proof of this, we can refer to the almost universal application during the last twenty years; and from enquiring on the subject, we have yet to learn of any one of those roofs having been worn out. The roofs covered with tin in our own city are open to the examination of all who take an interest in the matter. We have also prepared a miniature plan of roofs, which may be seen at our establishment, where any other information will be given with pleasure.

The Arcomatic.
THE ATTENTION OF THE PUBLIC is respectfully called to the following certificates:—

MR. S. EAKINS—Having used a quantity of Gold weighed by your Arcometer, I find the result proves your instrument correct; and recommend the use of it to those going to California, as the best method for obtaining the real value of Gold. Resp. yours,
J. B. DUNLEVY,
Pittsburgh, March 9, '49. Gold Beater.

PITTSBURGH, March 7, 1849.
MR. EAKINS—*Dear Sir*: Having examined the "Arcometer," manufactured at your rooms, I do not hesitate to commend it to the use of those gentlemen who are about returning to California, with a quantity of Gold.

It gives a close approximation to the specific gravity of metals, and will *certainly* enable the adventurer to ascertain when his place is yielding Gold.
Yours, resp'y, J. R. MCLINTOCK.

Gold Washers.
H. PARRY has invented a machine for washing Gold, for which he has made application for a patent.—The machine may be seen at the Warehouse of PARRY, SCOTT & Co., No. 103 Wood st., Pittsburgh.

Adventurers to California are invited to call and examine these labor-saving machines. They are simple in their construction, easily transported on the back on mules or horses, weighing about 60 lbs each, and can be put in operation in half an hour. They can be filled with provisions. It is the opinion of those who have seen the trial of one of these machines of smallest size, that two men will wash the mineral from 150 bushels of sand or earth in a day. Persons can be interested in size and worked by water or mule power, if expedient. The operator will be wet, and consequently without endangering their health. They will require but a small stream of water, and can be used the whole season, and can be put in operation where there is not sufficient water to wash in the usual way.

The price of the smallest size $35. Orders from abroad, accompanied by cash, will be promptly filled.
H. PARRY, of Parry, Scott & Co.'s,
No. 103 Wood st., Pittsburgh.
