Elimination of Carbon
Smooth Running
More Mileage on Gas

Have you seen the only positive improvement in gasoline motor ignition in the past 20 years? Can you imagine what six spark plugs in one cylinder would do? Yes, it would fire all the mixture, giving more power with less carbon and less gasoline and oil consumption. WE GUARANTEE to do the same thing with the plug you are now using, and all we ask is a chance to prove it. AT OUR EXPENSE write or phone for literature or a demonstration. AGENTS WANTED.
