

HIGHACRES THROUGH THE EYES OF K.Q. BISHOP

FLAGPOLE SABOTAGED

The stars-&-stripes have not been seen flying over HUGHACRES for several months. Informed sources are saying that several AFROTC cadets sabotaged the flagpole.

HIGHACRES GONE TO THE DOGS?

Attention administration, a dog placement agency is being run out of the girls lounge. Don't let this thing get out of hand,

NO PARKING COMMITTEE

Rumors state that there is, at the moment, no parking committee here at HIGHACRES. Have fun while it lasts all you illegal parkers.

BOTANY OR CHEMISTRY ?

I'd like to know who the smart guy is who watered the plants in the "Zoo lab" with formaldehyde. I know the man must be dedicated to science, but if he had only come to mem I could have told him that plants receive no beneficial affects what-so-ever from formaldehyde.

DO GIRLS BELONG IN CHEM LABS?

Hats off to Sandra Rimm for an interesting and educational experiment in the Friday Chem 2B lab. Seriously, we are all thankful that she was not seriously injured. After all, if she were incapacitated, even temporarily, many of us would fail miserably. Her guiding hand keeps us out of the dark in chemistry and calculus.

VALENTINE TOMFOOLERY

by John Zisek

Three of our Hazleton Center instructors were not forgotten on February 14th. - St. Valentine's Day. Attorney Cohn received a lovely card from a "Mr. Tanner", author of the Pennsylvania Business Law textbook used in Commerce 30-31. Prof. Longo received greetings from "Mr. Filene",

a Boston merchant who is well known to students of Marketing. As a crowning jester, Mr. Peightal was the recipient of salutations from "Fergy and Mac", conferred nicknames of the authors of a Political Science textbook. Please note - These cards were all postmarked Hazleton, Pa.

By a process of deductive reasoning, the villain was narrowed down to a Business Administration Student. However, due to a normal guilty composure, an innocent, but discriminating student was credited with masterminding this brilliant plan.

Note to above instructors - Mike Tomai will probably plead the fifth Amendment if questioned. Mike was the sole promoter of this chef-d'oeuvre.

NOT FOUND ON ATOMIC CHART
from Scranton's CUB'S ROAR

Name: Women
Symbol: WOW
Accepted Atomic Weight: 120
Occurrence: Found wherever man exists, seldom in free state.
Physical Properties: Boils at nothing, may freeze at anything, melts when properly treated.
Chemical Properties: Very active, possesses great affinity for gold, silver, platinum, and precious stones; violent reaction when left alone, able to absorb great quantities of expensive food, turns green when placed next a better looking specimen.
Uses: Highly ornamental, useful as tonic for low spirits, is probably the most powerful reducing agent known.
Caution: Highly explosive.
Variations: All present-day models are isotopes of original Eve.
