This difference I presume arises from the mineral not being uniform, some portions containing more Iron than others. The analysis shows the article to be well suited for durable paint. I find that by calcining the powder by a pretty high heat, the color is much improved, or at least converted into a fine red.

JOSEPH LIPPINCOTT..... WM. C. BARR

**LIPPINCOTT & BARR,**
(LATE J. S. SCHOLES & CO.)
MANUFACTURERS OF PHŒNIX FIRE PROOF SAFES, Second Street, between Wood and Smithfield—On Tuesday afternoon, July 23, 1848, the undersigned were called upon by Messrs. Lippincott & Barr, to witness an honest and fair test of one of their Phœnix Safes. The furnace being prepared, the Safe was placed inside thereof with Books, papers and some money; when the door of the Safe was closed and the fire kindled at a quarter past 2 o'clock, and in a short time the furnace was red hot, and continued till half past 6 o'clock, being about four and a half hours, when the committee expressed their satisfaction that the time occupied was more than was sufficient. The furnace was then pulled down, Safe cooled, and door opened—the books, papers and money safe. The heat was so great as to melt off the brass mountings. We therefore take pleasure in recommending these Safes to the public, as being, in our judgment, entirely fire proof.

ISAAC CROMIE,

I am engaged in the foundry business, and know something about furnaces and heat. I witnessed the burning of the above Safe, and can freely say there was no humbug about it, and with pleasure recommend them to the public as being, in my judgment, entirely fire proof. WM. KAYE.

In calling upon the above gentlemen for their signatures, they all spoke in the highest terms of the fairness of the test, and their full confidence of the Safe's being entirely fire proof. We have constantly on hand and for sale a full assortment of the above safes. [may31 BELL & TERRY
