**LIPPINCOTT & BARR,** (LATE J. S. SMITH & CO.) MANUFACTURERS OF PHŒNIX FIRE PROOF SAFES—Second Street, between Wood and Smithfield—On Tuesday afternoon, July 25, 1853, the undersigned were called upon by Messrs. Lippincott & Barr, to witness an honest and fair test of one of their Phœnix Safes. The furnace being prepared, the Safe was placed inside thereof with Books, papers and some money; when the door of the Safe was closed and the fire kindled at a quarter past 2 o'clock, and in a short time the Safe was red hot, and continued till half past 5 o'clock, being about three and a half hours, when the committee expressed their satisfaction that the time occupied with such heat was sufficient. The furnace was then pulled down, Safe cooled, and door opened—the books, papers and money safe. The heat was so great as to melt off the brass mountings. We therefore take pleasure in recommending these Safes to the public, as being, in our judgment, entirely fire proof.

JARVIS & TRABUE, NOCK & DAWSON, CORNWALL & BROTHER, BRANNON & THATCHER, BENEDICT & CARTER, ISAAC CROMIE.

I am engaged in the foundry business, and know something about furnaces and heat. I witnessed the burning of the above Safe, and can freely say there was no humbug about it, and with pleasure recommend them to the public as being, in my judgment, entirely fire proof. WM. KAYE. In calling upon the above gentlemen for their signatures, they all spoke in the highest terms of the fairness of the test, and their full confidence of the Safe's being entirely fire proof. We have constantly on hand for sale a full assortment of the above sizes. [march:ly] & TERRY.

**Prof. Alex. C. Barry's Tricopherous, or Medicated Compound,** FOR beautifying, Curling, Preserving, Restoring and Strengthening the HAIR, relieving diseases of the Skin, curing Rheumatic Pains and healing external wounds. Bounded by no geographical lines, the reputation of Barry's Tricopherous pervades the Union. The sales of the article of late years have increased in a ratio that almost exceeds belief. Professor Barry, after a careful examination of his books, finds that the number of bottles delivered to order, in quantities of from half a gross upward, during the year 1852, was within a trifle of 950,000. It is unnecessary to present at length the evidence of the wonderful properties of the Tricopherous, when the public have furnished such an endorsement as this. The cheapness of the article, and the explanations given of its chemical action upon the hair, the scalp, and in all cases of superficial irritation, first recommended it to the attention of the people. This was all that the inventor desired. Every bottle advertised itself. The effects of the fluid exceeded expectation. It acted like a charm. The ladies would not be without it. Country dealers in every section of the United States found they must have it; and thus was built up a wholesale trade of an extent hitherto unheard of as regards articles of this kind. The highest point has not yet been reached, and it is believed that the sales this year will be a million and a half of bottles. Depot and Manufactory, 137 Broadway, New York. Retail price 25 cents a large bottle. Liberal discounts to purchasers by the quantity. Sold by all the principal Druggists and Merchants throughout the United States and Canada, Mexico, West Indies, Great Britain, France, &c., and by R. E. SELLERS and B. A. FAHNESTOCK & CO., Pittsburgh. jel5:3m

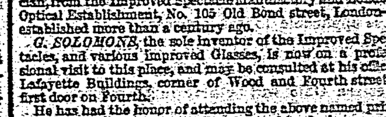
## NOTICE.

MR. SOLOMON'S stay in Pittsburgh now being limited to a few days, and as he will not visit the country for many years, immediate application is absolutely necessary.



**NEW DISCOVERY FOR THE EYES!** SPECTACLES, &c. ground on the exact principle of Spherical Accuracy, by G. SOLOMONS, the celebrated Optician from the Improved Spectacle Manufactory and London Optical Establishment, No. 105 Old Bond street, London—established more than a century ago. G. SOLOMONS, the sole inventor of the Improved Spectacles, and various improved Glasses, is now on a professional visit to this place, and may be consulted at his office, Lafayette Buildings, corner of Wood and Fourth streets, first door on Fourth. He has had the honor of attending the above named principal towns of the United Kingdom, where he has experienced the most flattering encouragement, and having been earnestly solicited to make a visit for a short time, he has the honor of announcing his arrival from London, with a splendid assortment of his newly-invented and Improved Spectacles. Such is the superiority of these Glasses, that persons having inflamed or weak eyes may instantly be relieved by using them, and they possess the property of preserving the precious organ of sight to the most advanced period of life, while they enable both the old and the young to pursue the most minute employment for any length of time, both by day or candle-light. An eminent individual in the United States have felt their efficacy, he, with confidence, solicits the further favors of the public, which he will ever be proud to acknowledge, assuring them that he will do all in his power to merit the confidence and approbation. Added to the advantages possessed by him of long practice in the Eye Infirmaries, and under one of the most eminent Oculists, by whose skill he has obtained a thorough knowledge of the diseases of vision, he has in his possession documents from individuals of rank, conveying the highest testimonials of approbation. He will give references to persons in the United States who have found the greatest benefit and comfort from the use of his newly invented and improved Spectacles.

**New Discovery for Deafness.** The Sound Concentrator is an extraordinary, powerful, newly-invented small instrument, for the cure of extreme cases of Deafness, entirely different in make or construction from all others, surpassing everything of the kind that has been, or ever can be, produced. They are not modeled to the cavity of the ear, and may rest within the ear, without being seen, so as to cause the ear to hear. The powers of this valuable invention are so great as to restore effective hearing of long standing to the perfect and natural state, and to enable deaf persons to join in general conversation, to hear most distinctly at a place of worship, at the bar, or at any public assembly; the unpleasant sensation of singing noises in the ear is entirely removed, and the concentrations afforded to individuals afflicted with this dreadful malady all the assistance that can possibly be desired.

I am happy in bearing my feeble testimony in favor of Mr. Solomon's Eye Glasses. I think them superior to any I have ever tried. The eyes seem to rest quietly under their use. G. C. McCOOK, M. D., Late Professor of Surgery in Washington University, Baltimore, Md. Pittsburgh, June 8, 1853.

I am using a pair of Mr. Solomon's Glasses, and find them very comfortable. I cheerfully add my name to the number of those who recommended me. JOS. P. GAZZAM, M. D. Pittsburgh, June 8, 1853.

From what I have observed in the use of Mr. Solomon's Glasses, I take pleasure in adding my testimony to the foregoing recommendations of the Faculty. JAMES KING, M. D. Pittsburgh, June, 8, 1853.

Cleveland, Oct. 27, 1851. It affords me pleasure to state that on the trial of several specimens of Spectacles placed in my hands by Mr. Solomons, I find myself much relieved from a defect of vision, and especially weakness in the eyes, from which I have suffered for the last two years, whenever I have exercised them ever for a short period of time. I think they are of an excellent quality, and peculiarly adapted for such purposes. J. P. KIRTLAND, M. D., Professor of Physical Diagnosis, and Theory and Practice of Medicine, Medical Department, W. R. College.

Rochester, January 15, 1851. The best recommendation I can give the Glasses of Mr. Solomon is, that I use them myself and prefer them. JAMES WEBSTER, M. D., Professor of Anatomy, University of Buffalo. New York, June 4, 1850.

Having made trial of Mr. Solomon's Patent Spectacles, and examined the principle on which they are constructed, I have no hesitation in pronouncing them superior to any with which I am acquainted, and accordingly can most cheerfully recommend them to all who need artificial aid in improving their vision. CHAS. A. LEE, M. D., Professor of Pathology and Materia Medica, Geneva, Buffalo, and Bowdoin College. Philadelphia, June 4, 1850.

I cordially concur, as far as my judgment goes, in the opinion of my friend and colleague, Dr. Lee, in reference to the perfection of Mr. Solomon's convex and oval Glasses, for far-sightedness. The grinding appears to be good and clear, and the general workmanship superior. JAMES BRYAN, M. D., je10:3md&w] Professor of Surgery, Geneva College.
