"Diamond Dyes" add years of wear to worn, faded skirts, waists, coats, stockings, sweaters, coverings, hangings, draperies, everything. Every package contains directions so simple any woman can put new, rich, fadeless colors into her worn garments or draperies even if she has never dyed before. Just buy Diamond Dyes—no other kind—then your material will come out right, because Diamond Dyes are guaranteed not to streak, spot, fade or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—Adv.

Laxatives Replaced

By the Use of Nujol

Nujol is a lubricant—not a medicine or laxative—so cannot gripe.

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus replaces it. Try

JUSTICE HIS AIM, TIERNAN ASSERTS

Indiana Professor Explains Motive in Impunging Paternity of Child

HE PLEADS FOR MORALITY

South Bend, Ind., Sept. 28.—While Judge Chester L. Duncomb is framing his decision, to be announced Saturday, as to the paternity of "Billy," the ten-month-old son of Mrs. John P. Tiernan, public interest has centered in the psychology of this strange case.

What motive impelled Professor Tiernan, of Notre Dame University, to parade his wife before the public as the mother of an illegitimate child, while still loving her and claiming her as his own? Why has he attempted to fasten the paternity of "Billy" on a local clothing salesman, Hary Poulin, while he still shelters the child and says he always will care for it as one of his own? Why has he demanded a small sum of money from Poulin to pay the expenses of the maternity of the disputed boy?

Prof. Tiernan answered these natural questions yesterday:

"That justice may be done," he said. "The time has come when man must stand on the same moral plane with woman.

"The greatest weapon known to man to keep the morals of the country at high standard is publicity," continued Mr. Tiernan. "I have only the interest of the unfortunate child in this case. I do not represent myself. The wronged woman can only be comforted, and the child acknowledged through the exposing of Poulin, who is a menace to the community."

U. S. ASKS BRITAIN FOR INTEREST PAYMENT SOON

England Advised $50,000,000 Is Acceptable Pending Adjustment

Washington, Sept. 28.—(By A. P.)—Great Britain has been advised that payment of $50,000,000 on October 15 as interest on her war debt will be acceptable pending an adjustment of interest rates by the forthcoming funding negotiations, it was said today at the Treasury.

The debt commission officials, it was said, still are without direct advices as to the departure of a British financial mission for this country, but the British Embassy has been advised that the mission will sail from England on the Majestic, October 18. Sir Robert Horne, Chancellor of the Exchequer, is the head of the mission and a second commissioner is to be named later. Sir Robert will be accompanied by P. J. Grigg, his secretary, and Mr. Rowe-Dutton, one of the financial experts of the British Treasury.

STAGE REAL THRILLER IN GERMAN FILM HOUSE

Leipzig Patrons With Pistols Confiscate Soviet Picture

Leipzig, Sept. 28.—(By A. P.)—The audience in a suburban motion picture theatre was given a taste of real Wild West action yesterday, when a score of armed men, believed to be communists, raided the house and confiscated a film depicting alleged chaotic conditions in Russia and the consequences of the military power of the Soviet Government.

OILING RIVER DISPELS FOG

Pittsburgh Officials May Continue Operations in Winter

Pittsburgh, Sept. 28.—(By A. P.)—A large section of Pittsburgh fog was put out of business yesterday by local scientists, assisted by officials of the Weather Bureau and experts from the United States Engineering Department.

The initial experiment, conducted on the Monongahela River, was pronounced a "distinct success." The fog-removers expressed themselves as confident that considerable "Pittsburgh gloom" can be avoided this fall and winter with moderate funds.

Notified by the Weather Bureau that a cold wave would sweep through the valley, scientists took the Government boat Evelyn, a derrick and a barge fitted with sprinkling apparatus and proceeded to Rice's Landing, one and one-half miles upstream. As the cold air and warmer water met and fog began to form, a thin spray of oil and organic acid was spread over the river. The fog dissipated rapidly. The oil prevented union of the air and water.

Major J. Franklin Bell, of the Federal Engineering Department; Dr. E. Ward Tillotson, of the Mellon Institute, and Dr. H. B. Meller, city smoke expert, were included in the party.

POSTOFFICE HEADS MEET

National Association Begins Annual Convention in Washington

Washington, Sept. 28.—(By A. P.)—The system of having new postmasters from time to time justifies itself only when such men can bring into their organizations a new purpose and enthusiasm which will refresh and restore the blackened energies of those who are more permanent, First Assistant Postmaster General Bartlett today told the National Association of Postmasters now in convention here.

"A postmaster in an organization of thousands of fellow workers, even if he does not know the technique of the business," Dr. Bartlett said, "may so impress his live personality, may so radiate his sincerity, may so communicate his good fellowship as to charge all around him with a fresh current of energy and purpose to such a degree as not only to enhance the efficiency of his office, but also make more cheerful all those who associate with him."

VACCINATION IS OPPOSED
