SCHUYLKILL BARGES.

THE work of enlarging the Schuylkill Navigation from Philadelphia to Port Carbon, Schuylkill co., is now in active operation; and by the terms of the contracts, the enlarged Locks will be completed throughout the whole line, by the 1st of April, 1846.

This enlargement will change the old system of Boat Building entirely; Vessels of 150 to 200 tons burthen, cannot be thrown together as successfully as boats of 60 tons have been heretofore; and the experience of the undersigned obtained by the closest attention while working on vessels of different descriptions—enables him to promise more efficient workmanship, combining the requisite qualities of SAILING AND BURTHEN, to perfection of model,—than any of his competitors on the Schuylkill River.

Persons wishing Barges, Steam or Sailing Vessels, under 105 feet in length, 18 feet in width, and 10 feet in depth, will find it to their advantage to patronise the subscriber—whose work will at all times be warranted to give satisfaction—under a forfeiture of ONE FOURTH the contract price.
