ITCHING, BLEEDING ECZEMA WAS CURED

By Cuticura After 5 Years of Suffering Beyond Description — Thought Death was Near — Calls Cure Wonderful.

"No tongue can tell how I suffered for five years with itching and bleeding eczema, until I was cured by the Cuticura Remedies, and I am so grateful I want the world to know, for what helped me will help others. My body and face were covered with sores. One day it would seem to be better, and then break out again with the most terrible pain and itching. I have been sick several times, but never in my life did I experience such awful suffering as with this eczema. I had made up my mind that death was near at hand, and I longed for that time when I would be at rest. I had tried many different doctors and medicines without success, and my mother brought me the Cuticura Remedies, insisting that I try them. I began to feel better after the first bath with Cuticura Soap, and one application of Cuticura Ointment.

"I continued with the Cuticura Soap and Cuticura Ointment, and have taken four bottles of Cuticura Resolvent, and consider myself well. This was nine years ago and I have had no return of the trouble since. Any person having any doubt about this wonderful cure by the Cuticura Remedies can write to my address. Mrs. Altie Etson, 93 Inn Road, Battle Creek, Mich., Oct. 16, 1909."

Cuticura affords the most economical treatment for affections of the skin and scalp, from infancy to age. A cake of Cuticura Soap and box of Cuticura Ointment are often sufficient. Potter Drug & Chem. Corp., Sole Props., Boston, Mass.

The Mexican Revolt.

That the Mexican revolution is being wholly financed by the Japanese government was the emphatic statement by a United States army officer stationed in Baltimore. He asserted that the information reached him through officials of the state department at Washington. He further declared that the movement had started with a view of establishing a new government in Mexico which would be friendly to Japan and with a hope that that nation would either concede or lease to them Magdalena bay and adjoining land for naval purposes and a coaling station. He also said that it had been an open secret among Government officials for a long time that Japan had been trying to secure a portion of Lower California as a base of operations in that part of the Pacific.

Red Nose Good Fish Bait.

"Hi" Shomper, a fisherman of Winsted, Conn., has returned from an outing at Otis where he fished through a hole in the ice. One of his lines caught, and Shomper, lying flat on his stomach on the ice, was looking to see what held the hook. He put his head so low that the tip of his nose touched the water and a pickerel, thinking it a piece of beefsteak, grabbed it. Naturally Shomper pulled his head up quickly and a 14-inch pickerel dropped on the ice. Shomper has marks of the fish's teeth on his nose.

Short Weights the Rule.

Short weights and measures are the rule among both drygoods and provision dealers in Philadelphia, according to a report of the Bureau of Municipal Research made public. The bureau has just completed an exhaustive investigation covering a period of six months, and reports that out of 495 purchases of coal, meats, groceries and produce 395 were short in weight or measure from 6 to 20 per cent. Of 200 purchases of drygoods 116 were short measure.

A Good Work.

The subjects of good roads, agricultural interests, advances in fruit culture, and orchard improvement, are taking deep root among Centre county agriculturists. Benefits will accrue therefrom to tillers of the soil that will be far reaching within a few years. In this county Col. John A. Woodward, Ex-Sheriff Cyrus Brungard, and others, are energetically engaged in the good work, assisting the state department.

Scott's Emulsion

is a wonderful food-medicine for all ages of mankind. It will make the delicate, sickly baby strong and well—will give the pale, anemic girl rosy cheeks and rich, red blood. It will put flesh on the bones of the tired, overworked, thin man, and will keep the aged man or woman in condition to resist colds or pneumonia in the winter.
