It Is Dangerous

It is dangerous to sell a SUBSTITUTE for 666 just to make three or four cents more. Customers are your best assets; lose them and you lose your business. 666 is worth three or four times as much as a Substitute.

Now while we don't seem to be enlightened a great deal more on the New Deal, we surely will have better lights in our homes and don't forget it was some new rulings in the Democratic administration which let us have it at the usual ratings, without the cost of our line. While we think of the New Deal it would be wise for all to read our Presidents explanation on what was meant by the the New Deal; also you critics look up the Preamble of the Constitution made years ago and see just how he has tried to make it serve the posterity of the men who fought to make our country. I am neither a Democrat or a Republican but am a Bible reader, also believe its teachings.
