Youth, Age, Style, Taste, Beauty and Fashion.—The seasons of life should be arranged like those of the year. In the spring of youth, when all is lovely and gay, then as the green cover is spread on all the face of smiling nature, in brightness and beauty, so let the dress partake of the season. Fine taste, as well as fashion, decrees the necessity of nicely adapted garments to age, circumstances and seasons. The man whose head is silvered with age, who feels not the blood of youth dancing warmly in his veins, should not run into extremes of dress, nor yet should he permit his clothing to be so far behind the times as to render him ridiculous. There is a becoming fashionable dress, suitable for the age and seasons of life as well as the seasons of the year. You can be suited in handsome style in clothing that is well and fashionably made, of good materials that will fit well and become the figure and season, at the great Clothing Bazaar of

Hayes' Patent Tubular Oven Hot Air Range, patented June 27, 1852. Various sizes, to suit families, boarding houses and hotels.

Those in want of a superior cooking aparatus are invited to call at our Warehouse and examine this Range. For durability, economy and simplicity in operation it stands unrivaled. It has a perfect hot air ventilated oven—and meats baked in this oven will retain their juice and flavor equal to that roasted before an open fire. Meats and pastry cooked at the same time without one affecting the other.—It will supply sufficient heated air to heat additional rooms for the coldest weather. It has no descending or return flues, and is equally well adapted to burning the bituminous, or common hard coal. The steam valve over the boiling part of the range carries off the steam and scent of cooking, as well as heat in summer.

Every Range sold warranted to give perfect satisfaction, or no expense to the purchaser.

HAYES' VENTILATORS Patented October, 1848. For public halls, school houses, factories, railroad cars chimnies, flues, ships, steamers, &c.

Reading's Patent Corn Sheller.—Capable of shelling 1000 bushels of Corn per day. For sale by DAVID LANDRETH,
At his new Agricultural Warehouse, No. 23 South Sixth street, sole agent for Philadelphia.

This SHELLER, patented in July, 1852, has met with a success unparalelled by any Machine of the kind ever offered to the public. The following certificate (one of a large number received) will give some idea of what people think of it who have used it:

SUMMIT BRIDGE, Del., Jan. 26, 1853.

This is to certify, that I have had Reading's New Corn Sheller, patented in July, last, in operation on my farm for part of a day, during which time it shelled rising seven hundred bushels of Corn; and, from what I have seen of its performance, I am satisfied its capacity is fully One Hundred and Fifty bushels per hour. It does not break the corn, nor are the cobs at all injured for fuel. I greatly prefer it to my other Sheller now in use, and think it will supersede all others now made.
Very respectfully, yours,
oct 18 3m-38] JOS. S. WARREN.

Silver's Plastic Paints, Cheap, Durable and Protective Weather and Fire Proof. This Paint will stand any climate, without crack or blister hardens by exposure, thus making in time an enamel of stone, protecting wood from decay, and iron and other metals from rust and corrosion.

The Paint differs from the so-called Mineral Paints of the day, which are principally Ochres and Clays colored, and are entirely worthless.

Silver's Plastic Paints are purely Metalic, containing no Alumin or Clay.

They are levigated finely, mix readily with Linseed Oil, (without the trouble of grinding,) and flow under the brush as freely as the best White Lead.

These Paints excel all others in body or covering properties, one pound of which will cover as much surface, as two pounds of White Lead.

There are four natural colors, viz: Black or Slate, Brown, Olive and Chocolate.

Directions.—This Paint flows readily under the brush and its covering property is increased by using it mixed as thickly as possible with pure linseed Oil; as the Paint is the lasting or protecting body and the Oil simply the medium or agent in spreading it.

We annex copies of two letters, one from the President of the Philadelphia and Reading Railroad Co., the other from a Gentleman, a well known resident of Augusta, Ga.

Office of the Phila. and Reading Railroad Co.,
Philadelphia, May 3, 1852.

J. S. SILVER, Esq.

Dear Sir: We have used your "Plastic Paints" or more than a year, and for Painting Bridges, Depots, &c., &c., we have found it quite equal to any paint we have used. In fact, we now give it a preference over all others we have tried for such purposes. Yours Respectfully,
(Signed,) JOHN TUCKER. President.

Steam Planing Mills.

Dear Sir: You ask me for my opinion of "Silver's Mineral Paints," which you have put on my Machine Shop and Planing Mill. I give you with pleasure my full and hearty recommendation of it as a preventive of Fire communicating from Chimneys, or from adjoining buildings. The Paint which you put on my roofs, has now become as hard as slate, and I feel as secure from Fire, in this direction, as is possible. A few weeks after the roofs had been painted, I made an experiment on two or three shingles by placing them in the furnace under the boilers; the result was, that the portion uncovered was entirly consumed, while the painted part was apparently sound, though upon examination the wood was found to be charred; the Paint however was firm and but little blistered. I consider this as severe a test as your Paint can be put to, and under the circumstances I do not hesitate to commend it as an invaluable preventive against Fire. Respectfully, &c.
(Signed,) AMBROSE SPENCER.
