HOWARD ASSOCIATION, *PHILADELPHIA.*

A Benevolent Institution established by special Endowment, for the relief of the Sick and Distressed, afflicted with Virulent and Epidemic Diseases.

THE HOWARD ASSOCIATION, in view of the awful destruction of human life caused by Sexual diseases, and the deceptions practiced upon the unfortunate victims of such diseases by Quacks, several years ago directed their Consulting Surgeon, as a CHARITABLE ACT worthy of their names, to open a Dispensary for the treatment of this class of diseases, in all their forms, and to give MEDICAL ADVICE GRATIS to all who apply by letter, with a description of their condition, (age, occupation, habits of life, &c.) and in case of extreme poverty, to FURNISH MEDICINES FREE OF CHARGE. It is needless to add that the Association commands the highest Medical skill of the age, and will furnish the most approved modern treatment.

The Directors of the Association, in their Annual Report upon the treatment of Sexual Diseases, express the highest satisfaction with the success which has attended the labors of their Surgeons in the cure of Spermatorrhœa, Seminal Weakness, Gonorrhœa, Gleet, Syphilis, the vice of Onanism or Self Abuse, Diseases of the Kidneys and Bladder, &c., and order a continuance of the same plan for the ensuing year.

The Directors, on a review of the past, feel assured that their labors in this sphere of benevolent efforts have been of great benefit to the afflicted, especially to the young, and they have resolved to devote themselves, with renewed zeal, to this very important and much despised cause.

An admirable Report on Spermatorrhœa, or Seminal Weakness, the vice of Onanism, Masturbation, or Self-Abuse, and other diseases of the Sexual organs, by the Consulting Surgeon, will be sent by mail (in a sealed envelope) FREE OF CHARGE, on receipt of TWO STAMPS for postage. Other Reports and Tracts on the nature and treatment of Sexual diseases, diet, &c., are constantly being published for gratuitous distribution, and will be sent to the afflicted. Some of the new remedies and methods of treatment discovered during the last year, are of great value.

Address, for Report or treatment, DR. J. SKILLIN HOUGHTON, Acting Surgeon, Howard Association, No. 2 South Ninth Street, Philadelphia, Pa.

By order of the Directors.

WILLOUGHBY'S PATENT, *GREAT IMPROVEMENT IN GRAIN DRILLS.* GUM SPRING GRAIN DRILL.

A great saving in Seed, as less is required with this Drill, than any other now in use. This Drill has been in use for three years, and wherever introduced, has won a reputation equaled by none. It has taken between *Thirty and Forty First Class Premiums in 1858,* at the various State and County Fairs, where it was in competition with other Drills. Among which are Indiana, Ohio, Pennsylvania, New Jersey, Maryland, and Virginia State Fairs; also the HIGHEST PRIZE (a Silver Medal,) at the United States Fair, held at Richmond, Virginia, and many County Fairs. The following are some of its advantages:

First. The teeth are so constructed with Rubber Springs, that when they come in contact with roots, rocks, stumps or any other obstructions, not over eighteen inches high, they spring back, pass over, and immediately regain their former position, without stoppage or injury to the Drill, avoiding the necessity of stopping to put in *Wooden Pins, as is the case in other Drills.* Newly cleared land can be seeded with this Drill as well as an old field. So perfect is the spring, that the Drill can be drawn across a railroad track without damage to the Machine. The spring can be set to drill the hardest kind of ground without yielding, but will suddenly yield where it meets a firm obstruction.

Second. The arrangement of distributing the seed is composed of two Vulcanized Rubber Rollers, revolving together, which discharge the seed not intermittingly in bunches, but in a constant stream, without CHOCKING OR BREAKING the grain. No irregularity of ground or fast or slow motion of the team will vary the quantity sown to the acre. The quantity sown to the acre is regulated by a slide, to any desired amount in a moment's time, even while the Drill is in motion. It cannot be clocked by straws or white caps being in the Wheat, as the rollers will carry it through.

Third. When the teeth are raised by the lever, the seed (and land measure) is instantly stopped, so that the Drill can be drawn from field to field without *leaking or wasting the grain.* When the teeth are let down the seed start immediately, if the drill is in motion. It sows Wheat, Rye, Oats and Barley, with the same hopper and requires no change; also all kinds of Grass seeds.

☞ This Machine is manufactured in a superior and workmanlike manner, as nothing but the VERY BEST MATERIAL is used in their construction, and all Machines are *warranted to work well,* and durable with proper care.

The undersigned have exclusive right of manufacturing and selling the above Machine in the following Territory: Lancaster, Chester, Delaware, Philadelphia, Bucks, Montgomery, Berks, Lehigh and Northampton counties, in Pennsylvania, and all of the State of New Jersey.

All orders addressed to them at Midway, Chester county, thirty-eight miles west of Philadelphia, on the Pennsylvania Railroad, will be thankfully received and promptly attended to.

☞ Machinery and Castings of every description made to order and warranted perfect.

DENTISTRY. The undersigned having again resumed the practice of Dentistry, at his old stand, north east corner of North Queen and Orange streets, (Kramph's Buildings,) would respectfully say to his former patrons and friends, and to the public generally, that he embraced the opportunity, while in Baltimore, of attending a full course of lectures in, and receiving a diploma from, the Baltimore College of Dental Surgery.

Having graduated at a period in the history of the profession when all its most approved principles could be thoroughly discussed and fully compared and studied, I feel better qualified than ever before to treat all cases of dental or surgical diseases, strictly upon scientific principles.

As a matriculant of the University of Maryland, I received the benefit of the Surgical lectures of Prof. N. R. Smith, as well as those of Prof. T. E. Bond, of the Dental College, and having for years adopted Surgery as a favorite study, I design taking its general principles into my practice, and will treat all the surgical diseases of the mouth and face especially, upon the principles laid down and practised so successfully by that eminent and scientific surgeon.

Cleft palates, hare lips, preternatural and morbid growths in the mouth and about the face will receive especial and careful attention.

Artificial Teeth mounted upon four different and approved principles, viz: Gold plate, silver plate, hard rubber process, and the much talked of Cheoplastic process *improved.* Operations upon the natural teeth will be performed with a view to their preservation and beauty, and according to the highest principles of hygiene and artistic skill.

Specimens of plate work and plugging will be shown to all who call.

Dental and surgical advice will be freely given to individuals or families, who may place themselves under my treatment. S. WELCHENS, D. D. S.
