Reese's Patent Coupling and Foreplate,

FOR NAIL-PLATE AND SHEET-ROLLS,

CAN NOW BE SEEN IN OPERATION at Messrs Baily, Brown & Co's Rolling Mill, Pittsburgh, or the "Sharon works," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or throwing off the crab to connect the top roll when Sonaring, as the top roll is connected and disconnected in an instant without respect to the engine, crab or anything else. The FOREPLATE is also constructed so simple and complete that it is placed or displaced in half a minute, without removing a guide, scraper, bolt, or nut. The last, though not least advantage of my improvement is, that by it you are enabled to Scarp the Rolls between heats, thus making a higher finish on Nail-plate and Sheet-iron than has ever been got out before. For further information, or a right to use the same, can be obtained of the inventor

JACOB REESE,

jy1 Manager of "Clinton Mills," Pittsburgh.
