Reese's Patent Coupling and Foreplate,

FOR NAIL-PLATES AND SHEET-ROLLS,

CAN NOW BE SEEN IN OPERATION at Messrs Bally, Brown & Co's Rolling Mill, Pittsburgh, or the "Sharon work," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or throwing off the gear to connect the top roll with the bottom roll, as the top roll is connected and disconnected in an instant, without regard to the engine, crab or any thing else. The FOREPLATE is also constructed so simple and complete that it is placed or displaced in half a minute, without removing a guide, scraper, bolt, or nut. The last, though not least advantage of my improvement is, that by it you are enabled to space the *bolts between heats*, thus making a higher polish on Nail-plate and Sheet-iron than has ever been got out before. Further information, or a right to use the same, can be obtained of the inventor.
