Reese's Patent Coupling and Foreplate,

FOR RAIL-PLATE AND SILL-BOLTS.

CAN NOW BE SEEN IN OPERATION

at Messrs. Selby, Brown & Co.'s Rolling Mill, Pittsburgh, on the "Sharon Works," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or throwing off the crab to come at the top roll when scouring, as the top roll is connected and disconnected in an instant without reference to the engine, crab or anything else. The FOREPLATE is also continued in simple and complete that it is placed or displaced in half a minute, without removing a single screw, bolt, or nut. The last, though not least advantage of my improvement is, that by it you are enabled to scour the Rolls between heats, thus making a higher polish on Metal than it has ever been yet, or can be at first. Further information, or a right to use the same, can be obtained of the inventor.
