Agricultural.

The Value of Brains.

The innumerable articles which appear continually on "How to make the farm pay," is enough to make a horse sick. People should know by this time that fortunes do not grow, but are made. Once in a while one may stumble over a fortune, as lightning strikes a tree; but these are [illegible] and are [illegible] everyday hands of men. [illegible] the largest kind of fortune [illegible] brains. [illegible] know how to go about [illegible] what he has to the best [illegible] else will reap [illegible]. Or he may [illegible] know-how in the world [illegible] brains. It is no more of a practical question than how to make the mill pay or how to make the store pay. No more than half the men in the world have any brains to spare. The other half have more than they need. They spare a little for those who are short, but charge a big interest [illegible] thereof.

[illegible] of public work is to be done and here are a hundred men [illegible] the work, but ninety-nine don't know how to go about doing it. They can work when directed, but work is to find out.—The one steps out, [illegible] of his brains, is loaned to the other ninety-nine. He makes a profit—five or perhaps fifty cents [illegible] each—clearing twenty-five or [illegible] fifty dollars a day. This [illegible] percentage on the use of his brains. Without this the men could do nothing. They could not earn their salt. Our dark-skinned friend was not far wrong when he indignantly denied that he had charged a dollar for killing the calf. It was only fifty cents for killing—the dollar was for the 'know how.'

Where is not more money made [illegible] than there is, we take it [illegible] for the want of spare brains. [illegible] to loan out as capital to other men who have none. There is a [illegible] of truth in the popular saying that no man can get rich by hard work. But this large grain of truth is only so when it has to pay a share to the brain that directs it. The employer generally works harder than the one he employs. After he has at hard manual labor for others, using his surplus brains to earn a little more than his daily wages and to put that little away; when the time comes to loan his brains he has to work as hard here to keep his business [illegible] while the laborer knows [illegible] work is done. It is true the employer has no hard [illegible]. It is not that he is [illegible] by hard work. He [illegible] making money by the loan [illegible] to those who have not [illegible] or have not had [illegible] sufficient of their [illegible] earnings to loan to [illegible] in the same way.

[illegible] the farm pay, then, on a [illegible] equitable—have brains to [illegible]. Yet how many ever think of [illegible] their own personal labor, [illegible] or half a dozen [illegible] make [illegible]. We [illegible] could see why a [illegible] be carried on as any business is by the employment [illegible] numbers of men who have [illegible] how to manage themselves; [illegible] is the same thing, the larger [illegible] money so as to do farming [illegible] large scale.

[illegible] of all the fortunes [illegible] made. There is no other way to make them. We see [illegible] ordinary man standing in [illegible] in a crowded city, [illegible] bits of paper in some commercial transaction employing no [illegible]. But he really has hundreds of men in the background paying their contributions of a few cents only [illegible] for the use of his brains, doing [illegible] they are unable to do themselves.

[illegible] are quite sure that those who [illegible] most money [illegible] are those who [illegible] most men, not [illegible] visibly but wisely [illegible] business—the farming [illegible] is not a mere [illegible]. It is an art—an art [illegible] and as in war [illegible] smiles on the [illegible]. We want first a [illegible] with an abundance of brains; [illegible] more men he has to loan [illegible] better for his cause.—*Chicago Tribune.*

NEW METHOD.—The Chinese, [illegible] than any other people, have reduced the saving of fertilizers to a [illegible]. It is well known that they [illegible] carefully save, disinfect, and put [illegible] use, every particle of offal in no other way could their [illegible] be enriched as to support [illegible] population. Liebig traced [illegible] fall of Rome to the building of her great sewers, which conveyed to the Tiber fertilizing materials which should have been applied to the soil. It was the lack of bread [illegible] consequent upon the poverty [illegible] the arable lands, which drove the [illegible] to foreign conquest, and led to the overthrow of her own [illegible]. Our people are wasting every day substances, which if properly utilized, would save them many a dollar and much tribulation.

USEFUL RECIPES.—*Brown Bread.*—[illegible] pint of Indian meal, half a pint rye meal, one pint of sweet milk, [illegible] teaspoonful of soda, one [illegible] half cup of molasses, one [illegible] spoonful of salt; dissolve the soda [illegible] the molasses; boil four hours [illegible]

Sponge Cake.—Two eggs well [illegible] two cups of milk, two cups [illegible] one tablespoonful of [illegible] bake the dish very hot [illegible] stir well; add the mixture, [illegible] in a quick oven.

Apple Dumpling.—Six large apples, half a pound of butter, six eggs, half a pound of sugar, one lemon, five [illegible] pounded. Stew and strain [illegible] while they are hot, add the [illegible] which has been beaten with [illegible] and the juice of [illegible]. Butter the dish in [illegible]; pudding is to be served [illegible] cracker and apple alternately, and bake.

[illegible] a recent meeting of the Fulton Farmers' Club, Pa., the question was asked: "How much salt should [illegible] put in a pound of butter?" One answered, half an ounce; another gave the recipe of Sharpless, the noted dairyman of Chester county, which is one ounce of salt to three pounds of butter.

Miscellaneous.

DINING ROOMS

In connection with the above, and meals at all hours of the day.

D. W. SCOTT & CO.

Towanda, Feb. 10, 1874.

APPLETONS' AMERICAN CYCLOPÆDIA.

NEW REVISED EDITION.

Entirely rewritten by the ablest writers on every subject. Printed from new type, and illustrated with Several Thousand engravings and Maps.

The work originally published under the title of THE NEW AMERICAN CYCLOPÆDIA was completed in 1863, since which time the wide circulation which it has attained in all parts of the United States, and the signal developments which have taken place in every branch of science, literature and art, have induced the editors and publishers to submit it to an exact and thorough revision, and to issue a new edition entitled THE AMERICAN CYCLOPÆDIA.

Within the last ten years the progress of discovery in every department of knowledge, has made a new work of reference an imperative want.

The movement of political affairs has kept pace with the discoveries of science, and their fruitful application to the industrial and useful arts and the convenience and refinement of social life. Great wars and consequent revolutions have occurred, involving national changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared has happily been ended, and a new course of commercial and industrial activity has been commenced.

Large accessions to our geographical knowledge have been made by the indefatigable explorers of Africa.

The great political revolutions of the last decade, with the natural result of the lapse of time have brought into public view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars. Great battles have been fought and important sieges maintained, of which the details are as yet preserved only in the newspapers or in the transient publications of the day, but which ought now to take their place in permanent and authentic history.

In preparing the present edition for the press, it has accordingly been the aim of the editors to bring down the information to the latest possible dates, and to furnish an accurate account of the most recent discoveries in science, of every fresh production in literature, and of the newest inventions in the practical arts, as well as to give a succinct and original record of the progress of political and historical events.

The work has been begun after long and careful preliminary labor, and with the most ample resources for carrying it on to a successful termination.

None of the original stereotype plates have been used, but every page has been printed on new type, forming in fact a new Cyclopædia, with the same plan and compass as its predecessor, but with a far greater pecuniary expenditure, and with such improvements in its composition as have been suggested by longer experience and enlarged knowledge. The illustrations which are introduced for the first time in the present edition, have been added, not for the sake of pictorial effect, but to give greater fidelity and force to the explanations in the text. They embrace all branches of science and of natural history, and depict the most famous and remarkable features of scenery, architecture and art, as well as the various processes of mechanics and manufactures. Although intended for instruction rather than embellishment, no pains have been spared to insure their artistic excellence; the cost of their execution is enormous, and it is believed they will find a welcome reception as an admirable feature of the Cyclopædia, and worthy of its high character.

This work is sold to Subscribers only, payable on delivery of each volume. It will be completed in sixteen large octavo volumes, each containing about 800 pages, fully illustrated with several thousand Wood Engravings, and with numerous colored Lithographic Maps.

PRICE AND STYLE OF BINDING.

In extra Cloth, per vol.,	$ 5,00
In Library Leather, per vol.,	6,00
In Half Turkey Morocco, per vol.,	7.00
In Half Russia, extra gilt, per vol.,	8.00

S. PIERCE. WM. SCOTT

Towanda, Pa., September 29, 1874.

SUSQUEHANNA COLLEGIATE INSTITUTE.

The first winter term of this Institution will commence MONDAY, November 2, 1874, with the following list of experienced teachers:

EDWIN E. QUINLAN, PRINCIPAL.
Ancient Languages, Math and English Branches
E. L. BILLIS, A. B.,
Commercial, Mathematical and Scientific Branches.
MISS MARY E. MERRILL, PRECEPTRESS.
Common and Higher English.
MISS MAY I MASON,
Common and Higher English.
MLLE J. LEQUIN,
French, Drawing and Painting.
MRS. C. A. BALDWIN,
Vocal Music.
MISS MINNIE C. HAWES,
Instrumental Music.

Classes will commence the study of Philosophy and other Sciences. The customary reorganization of classes will take place, in order that new students may be properly classified, and such new classes will be started as the wants of the students may demand.

Special attention will be given to those students pertaining to a business education, that this demand made upon the school by students from this country may be fully provided for. An additional advantage will be an access, free of charge, to students of the school, to the evening school, which will probably commence with the opening of the term.

Special attention given to the preparation of boys for College. Regular instruction in Drawing and Vocal Music free of charge. Excellent advantages in Instrumental Music and Voice culture.

Tuition from $4 to $10 per term. Board, including furnished rooms, lights, washing, &c., $40 per term.

For circular or further information, address or call upon the Principal, E. E. QUINLAN, at Towanda, Pa.

MILLER FOX, Pres't. Board of Trustees.

TO OUR PATRONS.

GEO. H. WOOD & CO.,

THE NEW IMPROVED

REMINGTON SEWING MACHINE

AWARDED THE "MEDAL FOR PROGRESS,"

AT VIENNA, 1873

THE HIGHEST ORDER OF "MEDAL" AWARDED AT THE EXPOSITION.

NO SEWING MACHINE RECEIVED A HIGHER PRIZE.

A FEW GOOD REASONS:

1.—A New Invention thoroughly Tested and secured by Letters Patent

2.—Make an perfect lock stitch, alike on both sides, on all kinds of goods.

3.—Runs Light, Smooth, Noiseless and Rapid—best combination of qualities.

4.—Durable—runs for years without repairs.

5.—Will do all varieties of work and Fancy Stitching in a superior manner.

6.—Is Most easily Managed by the operator. Length of stitch may be altered while running, and the machine can be threaded without passing thread through holes.

7.—Design simple, ingenious, elegant, forming the stitch without the use of cog wheel gears, rotary cams or lever arms. Has the Autom tic Drop Feed, which insures uniform length of stitch at any speed. Has our new Thread Controller, which allows easy movement of needle-bar and prevents injury to thread.

8.—Construction most careful and finished. It is manufactured by the most skillful and experienced mechanics at the celebrated REMINGTON ARMORY, FOR N. Y. *PHILADELPHIA OFFICE,* 629 CHESTNUT ST.

DANIEL F. BEATTY & CO., or

BEATTY & PLATT'S

CELEBRATED GOLDEN TONGUE PARLOR ORGANS.

Are ranked by eminent musicians and distinguished men of honor in this country and in Europe, as the leading parlor organ now in use. We challenge any maker to equal them! For church, Sabbath Schools, Lodges as well as the parlor, they have no equal. Testimonials and cards of honor are constantly being received in their favor. An offer. Where we have no agents we will allow any one wishing to purchase one of our organs, the agent's discount. Also to any responsible party wishing to purchase one of our organs from a distance, and prefer to see and examine it before paying for it, the same will be granted them by sending us a recommendation from the cashier of your nearest bank, or some prominent man in your vicinity, and if the organ is not just as represented, you have the liberty to return the same at our expense, we paying the freight both ways. It is with pleasure we introduce the GOLDEN TONGUE knowing that it will give universal satisfaction, as it possesses many advantages over all others. The tone excels in fullness; and the deep vibration of sounds are evidence that it stands first as to merits of all musical instruments now in use.

We select a few abstracts from letters and editorials which we are constantly receiving in favor of our organs, and wish you to read them:

We cry "Eureka" for we found what we wanted.
J. P. WILBAR, Harrisburg, Pa.

I am pleased with the sweetness of its tone.
PROF. N. P. VAN LUBANEE, McInne, Ill.

Pure as gold.—Daily Patriot.

Our music cal critics call to see it. They are delighted with it. GEO. L. FREET, Altoona, Pa.

We would recommend this excellent instrument to the musical world, for its fineness of tone.—Petersburg (Indiana) Democrat.

Combines sweetness and strength in its tone.—Lewistown Gazette.

For quality, promptness and exquisite of tone they are unequalled. PROF. ROBT. HENCE.

I can with pleasure recommend it to any in want of a first-class parlor organ. PROF. O. HUNGER, Mahony City

I am well pleased with them. J. B. SECHRIST, Hagerstown, Md.

I am pleased with the tone of the instrument. WM. ROBERTS, Brooklyn, L. I.

First among its advantages is the great scope of its expression, being constructed to play the softest music, and, when desired, to increase its power. Can either gradually or suddenly produce more volume of tone than any other organ of its class. This is accomplished by our new Patent Double Forte Swell, so arranged that true sound is thrown out by a direct passage through the cane.

We desire that every family throughout this country, as well as Europe, may test its wonderful musical producing qualities. Orders have been received at such rapid rates that we have been compelled to enlarge the manufactory, and put on a still larger force of skillful mechanics in order to supply the demands. We, however, now are happy to announce that we can fill orders
