INDUSTRIAL MANAGERS WANTED

Men who understand production and who can get results; every FACTORY in the United States is keenly interested in getting maximum production at minimum expense; to do this requires not only modern equipment and modern methods, but also men who understand INDUSTRIAL ENGINEERING, and who can intelligently direct a factory organization.

INDUSTRIAL ENGINEERING

is being taught according to the university plan to thousands of men who are already engaged in industrial work—or who are graduates of technical schools—these men are going to handle the important executive work in industrial organizations; many of them have already increased their salaries 200 per cent to 400 per cent; their present salaries range from $2000 to $25,000 per year.

Whether you are engaged in industrial work or whether you have had no manufacturing experience—it will be to your advantage to investigate the opportunity in this new profession of industrial engineering.

If you are in earnest, if opportunity means anything to you, we invite you to call or write for further information.
