DR. R. A. WILSON'S Tonic, Cathartic and Anti-Dyspeptic PILLS.

WILSON'S PILLS have had a mere local existence for over twenty years, unsupported by advertising of any kind, and hold at double the price of what they are now sold at, yet with all these disadvantages, wherever used they have in no instance failed to render the utmost satisfaction in performing all the requirements of a valuable *family medicine*, and as such are recommended by a use of the most worthy and responsable citizens of the land. Hear for instance what Col. William Hopkins, of Washington, Pa., says:

From Col. Wm. Hopkins, late Canal Commissioner of the State.
WASHINGTON, January 8, 1858.

DR. R. A. WILSON, Pittsburgh, Pa.—I have been using your Anti-Dyspeptic Pills, when occasion required, for many years, and can truthfully say that I have never found any medicine equal to them in relieving me from affections of the stomach and heart; they have never failed to relieve me from headache, and have always left my system in better condition than they found it. I must confidently commend your Pills as a safe and highly valuable medicine.
Yours, respectfully, WM. HOPKINS.

Hear Dr. Keyser.

MESSRS B. L. FAHNESTOCK & Co.—I have had considerable experience in the use of the extraordinary Pill compounded by Dr. R. Adams Wilson, of which you are now the proprietors, and have often felt their benign influence in my own case for Nervous Headache, arising from a disordered condition of the stomach. I have likewise prescribed them for others in case of Armoramia and other forms of headache depending on a deranged and irritable condition of the stomach and digestive organs, for which they seem peculiarly adapted, being entirely free from any griping tendency. I regard them as a very valuable Pill, and one that purges, without at all debilitating.
Yours, truly, GEO. H. KEYSER.
Prepared and sold by B. L. FAHNESTOCK & CO., Wholesale Druggists, and Proprietors of B. L. FAHNESTOCK'S VERMIFUGE, No. 60, corner of Wood and Fourth streets, Pittsburgh, Pa. Sold at retail by Druggists everywhere. fe2 2:3md&w9

Also, BROWN'S LAXATIVE TROCHES, or Cathartic Lozenges, for *Dyspepsia, Indigestion, Constipation, Headache, Bilious Affections, &c.* no29-1:4wmT

MOFFATT'S LIFE PILLS, THE HIGH AND MERITED celebrity which this preeminent medicine has acquired for its invariable efficacy in all the diseases which it professes to cure, has rendered the numerous spurious imitations pulling to every one necessary but unworthy of them. The unbroken chain of their facts their good works testify for them and they thrive not by the faith of the credulous. In all cases of Dyspepsia, Dyspepsia, Bilious and Liver affections, Piles, Costiveness, Fevers and ague, obstinate head aches, and all general derangements of health, the Pills have invariably proven a certain and speedy remedy. A single trial will place the Life Pills beyond the reach of competition in the estimation of every patient.
Dr. Moffat's Phœnix Bitters will be found equally efficacious in all cases of nervous debility, dyspepsia, loss of appetite, lowness of spirits, &c.
☞ See the signature of Dr. Moffat on the wrapper of each box. Sold by all respectable Druggists and Medicine Dealers and Druggists generally throughout the country. fe2 3:6m&w

D. MOTT'S CHALYBEATE RESTORATIVE PILLS & IRON.

AN APERIENT AND STOMACHIC Preparation of IRON purified of Oxygen and Carbon by combination in Hydrogen, manufactured by the Medical Authorities, both in Europe and the United States, and prescribed in their practice.
The experience of thousands daily proves that no preparation of iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost every constitution. Sufferers, try Mott's Chalybeate Restorative in cases in which it has been tried, it has proved absolutely curative in each of the following complaints, viz:
Debility, Nervous Affections, Emaciation, Dyspepsia, Constipation, Diarrhœa, Dysentery, incipient Consumption, Scrofulous Tuberculous Deposit, Rheumatism, Menstruation, Whites, Chlorosis, Liver Complaints, Chronic Headaches, Rheumatism, Intermittent Fevers, Pimples on the Face, &c.
In cases of General Debility, whether the result of acute disease or of the continued diminution of nervous and muscular energy from chronic complaints, one trial of this restorative has proved successful in an extent which no description nor written attestation would render credible—favorable so long bed-ridden as to have become fearful of being a burden to their neighborhoods, have suddenly reappeared in the busy world after years of from protracted confinement in distant land. Some very signal instances of this kind are attributed of female sufferers, emaciated votaries of apparent marasmus sanguineous exhaustion, critical changes, and that complication of nervous and dyspeptic alertsion to air and exercise for which the physician has no name.
In Nervous Affections of all kinds, and for persons familiar to medical men, the operation of this preparation of iron must necessarily be salutary, for, unlike the old oxide, it is vigorously tonic, without inciting exciting and over-heating, and gently, regularly aperient, even in the most obstinate cases of costiveness, without ever being a gentle purgative, or inflicting a disagreeable sensation.
It is little latter property, among others, which makes it so remarkably effectual in permanent a remedy *for Piles*, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms them.
In Dyspepsia, innumerable as are its curators, a single bottle of these chalybeate Pills has often sufficed for the most habitual cases, including the constipation *Costiveness.*
In unchecked Diarrhœa, even when advanced to Dysentery, confined, emaciating, and apparently malignant, the effects have been equally decisive and astonishing.
In the local pains, loss of flesh and strength, debilitating cough and exciting fever, which generally indicate Incipient Consumption, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances.
In Scrofulous Tuberculous, this medicated iron has had far more than the good effect of the most cautiously balanced preparations of Iodine, without any of their well known liabilities.
The substitution of families cannot be too confidently invited to this remedy and restoratives, in the cases peculiarly affecting them.
In Rheumatism, both chronic and inflammatory—in the latter, however, more decidedly—it has been found invariably well reported, both as alleviating pain and reducing the swellings and stiffness of the joints and muscles.
In Intermittent Fevers it most necessarily be a great remedy and energetic restorative, and its progress in the new settlements of the West; will probably be one of high renown and usefulness.
No remedy has ever been discovered in the whole history of medicine, which exerts such prompt, happy, and truly restorative effects. Good appetite, complete digestion, rapid accumulation of strength, with an unusual disposition for active and cheerful exercise, immediately follow its use.
Put up in neat flat metal boxes containing 50 pills, price 12½ cents per box; for sale by Druggists and dealers. Will be sent free to any address on receipt of price. All letters, orders, etc., should be addressed to

Catarract Washing Machine.
CLOTHING, TIME AND LABOR SAVED.
Indispensable to Housekeepers.
THE MOST SIMPLE, ECONOMICAL and durable article ever offered to the public to alleviate the discomforts of wash day.
Description.
It consists of a metal cylinder, with the ribs on the inside, and an interior cylinder of wood with ribs. There is a space from 6 to 8 inches between the two cylinders. One crank turns both cylinders at the same time in opposite directions, rapidly creating a suds, forcing the water through the clothes, and effectively removing the dirt. The action of the water does the work quickly; the clothes are entirely with rubbing, and thus saves the wear of clothes.
JAMES B. RODGERS,

PUBLISHED DAILY AND WEEKLY BY
R. ERRETT & CO.,
FIFTH STREET, ABOVE SMITHFIELD.
PITTSBURGH:
FRIDAY MORNING, MAY 11.

BENEFICIAL RESULTS OF WEST INDIA EMANCIPATION.—The Methodist Quarterly Review has in the April number an extensive article on the "Results of West India Emancipation," in which we find a tabular view of the comparative condition of the British western slave colonies in 1833 and in 1851-2. From this it appears that in eighteen years, since the emancipation, the population of these colonies went up from 837,224 to 1,069,895, an increase of over thirty per cent, and every single colony had increased, except the small Islands of Anguilla, Mouserrat and Nevis. The yearly revenue increased from £422,290 to £715,729; the value of imports from £3,205,523 to £4,727,295; Shipping increased from 47,091 tons to 651,698. The sugar exported to the United Kingdom had gone down from 3,646,306 to 3,408,687; a falling off of less than 3 per cent, while the home consumption had become immense, besides a considerable export to the other countries. The writer of the article, Rev. Henry Bleby, an English wesleyan clergyman in Barbadoes, who has resided also in Jamaica for fourteen years, adds the following remarks:

"The statistical view which we have given of the colonies in 1851-2 exhibits the results of emancipation under the most unfavorable aspect; for that, as already shown, was the period, when the affairs of the planters were at their worst, and the financial condition and prospect of the colonies most dark and discouraging. Since that date a vast improvement has taken place in the West Indies. Sugar having risen in value, an impulse has been given to its culture and manufacture. The planters, adopting modern improvements, find the cultivation of their estates highly remunerative, and the profitableness of free over slave labor is no longer a matter of question or experiment, but of demonstration and certainty.

"The irrepressible conflict cannot be stopped. Such is the language of the Chicago *Journal*. It is in the plans of Providence, and must go on, continues the *Journal*. Is this true? Is the wrangling and dissention, the stirring up of bitter strife, the engendering of hatred and discord and irreconcilable feuds between the different tribes of our great nation, a necessity of the times'—*Peoria Union*

Even so, as far as this vexed question of Slavery is concerned. The "wrangling and dissention" cannot be stopped, unless the Democrats stop their efforts to extend the "institution" and render all the other interests of the nation subservient to it. The "irrepressible conflict is 'a necessity,' as the very fact of its existence and its progress proves. It can't be suppressed even in the Democratic party itself.

The only way in which it can be stopped is for either the Slavery extensionists of the country, or the party of Freedom, to yield, and cease the agitation. The Slavery Party does not seem disposed to yield, and certainly the Party of Freedom, conscious of being in the right, will not.

So, how are you going to stop the "conflict?" How would you, if you could? How could you, if you would? We tell you, sirs, that you might as well attempt to quiet the roar and terror of the tempest on the sea, as to attempt to suppress the "irrepressible conflict" that always has been and always will be in progress between right and wrong principles, systems and ideas. You can't do it, and might as well first as last give up the hope of doing it. The "conflict" will work out its own end, and let us wait for "the good time coming."—*Chicago Journal*

SUGAR MANUFACTURING IN NORTHERN NEW HAMPSHIRE.—A correspondent at Bethlehem, N. H., under date of April 26th, writes thus:

"Large quantities of maple sugar and syrup are manufactured in this and adjoining towns, and the manufacture is extended far later in the season than in the southern portions of the State and in Massachusetts. The business has been remarkably good this season. It is scarcely finished for very few of the buckets have been taken up. Many of our farmers realize immense profits from their maple yards without any great outlay or exertion. Parker Beede, Esq., a farmer of Sandwich, for one, has manufactured about two tons without any special exertion, and offers to Carroll county and in the vicinity of Sandwich have made similar amounts.

Tin or zinc spouts, about five inches in length, driven into the bark about an inch below the hole, are in almost universal use here to convey the liquid sweet to the buckets. In Carroll county, the elder spiles are still in use, but many manufacturers are introducing long strings of wooden gutters to carry the sap from the hillsides, to their houses or to some convenient place for boiling it. Large flat shear-iron pans are also coming in vogue, instead of the old-fashioned kettles and boilers.—*Boston Traveller*

THE MORTARA CASE.—The *Opinione*, of Turin, publishes the demand of the public prosecutor at the Court of First instance at Bologna, in the case of the child Mortara. The following is the conclusion:—"Considering the violent invasion of the public officers into the house of the two Israelites, Momolo and Marianne Mortara, on the night of the 23, 1858 at Bologna, for the purpose of taking away the young child Edward, under the pretext that he was baptized, considering that the child, by means of the public force, was immediately transported to Rome, where he was shut up and sequestered in the College of the Catechumens; we demand that the Father Pierro Gaetano Feletti should be judged in virtue of the Arts. 440 and 444 of the Code of Procedure, and condemned by the Arts. 133 and 200 of the Penal Code of Sept. 20, 1832, (Art. 138. One year to three years' hard labor; Art. 200. One year to three years' imprisonment,) against magistrates who have abused their office, and against any one who arbitrarily arrests and imprisons any individual, and to the payment of damages and interest to the parents of the child as well as costs."

OF all sanitary performers, Dr. Winship, of Boston, will probably become the most popular. For he advocates nothing that goes against the grain of our humanity. In particular he takes stand against those two old dogmas which inculcate the hygienic necessity of rising from the table hungry, and from bed sleepy. He says, never rise from the table unsatisfied; never get out of bed as long as you have any inclination to lie there. And the Doctor's prescription is not only pleasant but sensible. If one is to rise from eating hungry what use of sitting down at all? And in relation to early rising, our sympathies have always been with the boy, who, when his father attempted to cut off his morning nap with that rusty old saw about the bird and the worm, replied that it served the worm right—he hadn't any business to get up so early. As regards the distinguished author of the saying that four hours of sleep were enough for a man, five for a woman, six for a child, and seven for a fool, we have always inclined to think that he was entitled to avail himself of the latter clause in his sleep a good seven, for which reason he felt no compunction to curtailing the sleep of others. Dr. Winship's teachings are much more agreeable.—*N. Y. Times.*

MR. YANCEY AND SECESSION.—The Washington *States* publishes a letter from Mr. Yancey, the leader of the secessionists in the Democratic National Convention, to James S. Slaughter, dated June, 1858, in which the following sentiments occur:

"If the Democracy were overthrown, it would result in giving place to a greater and hungrier swarm of flies. The remedy of the South is not in such a process. It is in the diligent organization of her true men for prompt resistance to the next aggression. It must come in the nature of things. No national party can save us; no sectional party can ever do it. But if we could do as our fathers did—organize "committees of safety" all over the cotton States, (and it is only in them that we can hope for any effective movement,)—we shall fire the Southern heart, instruct the Southern mind, give courage to each other, and at the proper moment, by one organized concerted action, we can precipitate the cotton States into a revolution."

SPECULATION IN OATS.—We learn, upon reliable authority, that there are parties in Canada who hold a large quantity of oats, which they intend shipping to England in the summer months on speculation. The amount is variously estimated from 250,000 to 400,000 bushels. A letter from Montreal states that four vessels have been engaged to take them from the St. Lawrence, while another states the freights have been engaged in New York upon much more advantageous terms than could be obtained in Canda. Should they be shipped by the way of New York they will come by the way of Northern canal. We have seen the names of the firm engaged in this speculation, but are not permitted to print them. It is well known to most of our grain dealers in this city that a large quantity of oats were in store in Canada, but up to within the past ten days it was not known what disposition the owners intended to make of them.—*Albany Jour.*

THE PEACH PROSPECT IN DELAWARE is very gloomy. Not more than half a crop will be realized. On the Eastern shore of Maryland it is little better. The trees are supposed to have suffered from the severe winter.

New Books.

NEW BOOKS.—Popular Astronomy by O. M. Mitchell, LL D;
Prime's Switzerland;
Abbott's South and North;
Fresh Hearts that Failed Thee;
Thousand Years Ago, by author of New Priest of Conception Bay;
