Agricultural.

From the American Agriculturist.

Treatment of Mowing Lands.

It is a common practice with many farmers whose mowing grounds get run out, or at hide bound, to still requisition them for purposes of hay, to plow and crop the land for a year or two, and then re-seed them to grass for the purpose of getting a full crop of hay. But this soil or soils perfectly natural to hay grasses, such treatment I consider altogether unnecessary, and attended with the following bad results:

1st. When a meadow is well and smoothly laid down in good condition of soil, with timothy, clover, and other grasses, it does not arrive at full bearing maturity until the third or fourth year of their growth, the grasses requiring that time to obtain sufficient root to give the turf a compact and close bottom and yield the greatest and most nutritious hay. About this time (the third or fourth crop,) if not overflowed, bottom lands or not too dressed, the "run out" or "hide bound" process usually begins. The plowing and cropping (without manure) process is more exhausting to the soil, than three, the number of grass crops, and when again laid down to lie a fitted for hay bearing than before; and by this process a constant deterioration is going on in the soil. Even if a dressing of twenty loads of barnyard manure to the acre be applied to the plowed crop, two of them will generally exhaust it, and leave the land heavy and inactive for the grass seed when received.

2d. The irregularity to which the grass or stock farmer is subjected in the frequent failure of his grass seed to take, causing him, in most cases, to plow a year or two longer than he otherwise would have done, and consequently subjecting his land to the exhausting draft of the tillage crops. Now, the remedy for these difficulties I have found exceedingly simple and effective; and which is, top dressing and harrowing, either immediately after the land is mowed in summer, or at any time between that and the starting of the grass in the spring—and in illustration, I will give a little of my experience.

My land is mostly in grass, the soil a friable, clayey loam, resting at six to eighteen inches below the surface upon a stiff, clayey subsoil. On coming into possession of it, eight years ago, I found much of it had been several years under the plow, in an exhausting succession of crops, and thrown into narrow, uneven "land," requiring thorough plowing again to lay them into proper surface for grass.—This I did, and as soon as prepared, seeded them down with barley, oats, and wheat; and in only one instance have I found it necessary to break up any field so seeded, and that because it was not sufficiently level to mow smoothly.

The lands so seeded have done unusually well, and yielded good crops; not, however, getting a good close turf, until the third or fourth year. I have uniformly fed them close in the fall, after mowing, and find it no detriment to the succeeding hay crop, if not poached by the cattle in the late wet weather of autumn, which last is always to be avoided, as it invariably spoils the meadow by treading out the grass, and making the surface uneven. When the grass shows symptoms of decline, or the surface gets mossy, as it sometimes will be in the best of grounds, I have given it a moderate top dressing, say five to ten cords an acre, evenly spread with four to six quarts of new seed; and thoroughly harrowed. The result has always been a double or triple crop of hay the next season; and when the land has not been "hard run," a thorough harrowing, with new seed, without manure, has answered the purpose. *Don't be afraid of the harrow.* Your meadow may look as if it was all dragged to pieces, and bleak enough to bear a crop of grain. No matter. The new seed will take all the better, and the old roots strike anew with increased vigor. I have one piece in my eye of about three acres of stiff clay knoll, a corner of a large meadow of sixty acres, which in 1848, did not yield a ton of hay to the acre. I last year fenced it off, and yarded my cows there over night for a few weeks, intending to plow up the next spring for a filled crop. The cattle had trodden it so up, so that hardly a green blade of grass was to be seen when winter set in. But, being hurried with my spring work, and seeing the grass spring up very green last April, I removed the temporary fence from around it, sowed four quarts of new seed to the acre, and harrowed it thoroughly each way, with a heavy drag, until hardly a green thing was to be seen upon it; and yet when mowing time arrived, I had the solid satisfaction of cutting at least a fraction of three tons to the acre; in the whole, upwards of eight tons; and a first rate bottom on it for another year. This piece was, however, well manured. In my opinion the value of the cattle was more valuable than the dung.

Two years before, I had a piece of equal size, treated in the same manner, which gave me upward of two tons to the acre; when, the year previous, it yielded not even three-fourths of a ton to the acre. Another field of sixteen acres, a part of which was top dressed with about five cords of barnyard dung per acre, the remainder not dressed at all, and all harrowed, gave me an average of two tons an acre, against a crop the previous year of less than a ton; although that previous crop was much diminished by the drought.

If the ground be quite dry when harrowed, the roller should follow—and the roller is beneficial always, when not too wet. The harrow should be light or heavy, according to the condition of the soil or sod; a loose soil will better bear a light harrow; a compact soil, a heavy one; but the teeth should be sharp, and no matter how lively or often they play over the ground. Let the land be thoroughly scratched. Such treatment I consider better than plowing, even when the land is immediately seeded again to grass, as it gives a quick return and a thick bottom at once.

As to manures for top dressing, scarce anything soluble comes amiss. Old ashes, plaster, lime, lean rags, dung of all kinds, urine, wash of streets, sinks, gutters—in fact, every manure that can be got on to land is valuable. LEWIS F. ALLEN.

Black Rock, N. Y., January, 1850.

GREAT CROP OF HAY.—A mowing lot, says the Springfield Republican, of H. W. Clapp, at Greenfield Meadows, containing seven acres and one hundred rods, yielded twenty-nine tons and four hundred and ninety-seven pounds of hay, or over four tons to the acre. We think this hay must have been weighed in rather a green state. When so much grass grows upon an acre, it is almost impossible to cure it as dry as when a less quantity is produced.—*Maine Farmer.*

Never plow in bad weather or when the ground is very wet.

Agricultural Implements, &c.

Agricultural, Stove, and Tin Store, AT ATHENS, PA.

WHEELER'S, & ALSO EMERY & CO'S NEW-YORK STATE AGRICULTURAL SOCIETY'S FIRST PREMIUM

Rail Road Horse Power & Tresher,

With the Latest and Important Improvements, for which Patent is secured.

THE subscriber takes this method to inform the Farmers of Bradford and the adjoining counties, that he is agent for, and has for sale, the above celebrated and unequalled Horse Power, and Threshing Machines, which he is prepared to furnish on the same terms as by the manufacturers, with the addition of the actual cost of transportation, contracted for at the lowest and best rates.

The subscriber has sold a number of the above machines in this, and the adjoining counties of Chemung and Tioga, N. Y., and all without exception have given the very best satisfaction, and where they are known, all farmers give them the preference, on account of economy in threshing, being operated with much less expense, and cracking and wasting much less grain than any other machine in use.

The Two-Horse Power Thresher and Separator is capable, with three or four men, of threshing from 150 to 200 bushels of wheat or rye, or double that quantity of oats, per day.

PRICES.

The prices for Emery & Co.'s one Horse Power,	$35 00
do Thresher and Separator,	35 00
do Bands, wrench, oiler and extra pieces,	5 00—$125 00
do Two-horse Power,	$110 00
do Tresher and Separator,	35 00
do Bands, oiler, wrench, &c.,	5 00—$150 00
Also, Wheeler's one-horse power, Thresher, and Separator, complete, (improved this season)	$120 00
Wheeler's two-horse Power, Thresher and Separator, complete,	145 00
Price of Emery's Tresher and Cleaner, with bands, wrenches, &c.,	75 00
do Saw Mill, complete for use,	35 00
Price of Grant's Fan Mills, adapted for hand or power, from	22 00 to 25 00

The subscriber will also the coming season be prepared to furnish to order

EMERY & Co.'s NEW

THRESHER AND CLEANER.

Emery & Co. for nearly two years past have been experimenting to perfect a Cleaner, to be operated with their Power for public and field threshing; and with much time and expense, have succeeded, to their entire satisfaction, and are now prepared to furnish a Self-cleaner, combined with all the advantages of their overshot cylinder, and at the same time requiring less force to operate its rotary motion than is required by the vibrating separator. It has been thoroughly tested during the last harvest, and some of them have been used the past season for threshing in the best grain growing sections of the state of New York with the best success—threshing months together an equal amount and at less expense, than the common threshers with the vibrating separators.

The Cleaner has all the advantages of a good fanning mill, cleaning the grain fit for market, wasting none. The additional cost being but little more than a fanning mill, or about *thirty dollars*—making the whole Thresher and Cleaner cost $75 to the Farmer, and with Emery & Co.'s two-horse power, $185 00.

The Cleaner can be detached, and the Thresher used alone when desired. These Thresher and Cleaner are destined to take the place of the old, expensive and cumbrous thresher and cleaner now in use.

Farmers and others wishing to procure any of the above-mentioned Horse Powers and Threshers, will save trouble, risk and expense, by purchasing them of the subscriber.

☞ On account of the large demand for the above machines, and the difficulty of immediately filling orders for them, persons wishing to purchase machines should give me timely notice as to what kind and at what time they wish to procure them.

Farmers wishing to do their threshing immediately after harvest, should procure their machines as early as the first of July. Also for sale

A GENERAL ASSORTMENT OF IMPROVED

AGRICULTURAL & HORTICULTURAL IMPLEMENTS,

At manufacturer's retail prices, such as

CORN SHELLERS, HAY & STRAW CUTTERS, CULTIVATORS, CORNPLANTERS, *STUBBLE, SWARD, SUB-SOIL & other PLOWS,* DOG POWERS FOR CHURNS, KENDALL'S CHURNS, GRANT'S GRAIN CRADLES, *Revolving Horse Rakes, Hay, Straw and Manure Forks, &c. &c. Also,*

Cast Iron and Wood Cisterns and Well Pumps, LEAD PIPE of all sizes, in large or small quantities, cheap for cash.

R. M. WELLES will, the coming season, be prepared to furnish J. T. Grant & Co's celebrated patent

Premium ratin Cradle,

wholesale and retail. The cradle will be furnished with Dunn's celebrated Scythe, the best made in the Union and Warranted. Orders respectfully solicited from town and country merchants.

Also for sale, a large and well selected assortment of

COOK, PARLOR & OTHER STOVES,

VARIOUS BEAUTIFUL PATTERNS, SIZES, PRICE

My stock of Stoves, and prices, will compare favorably with those of any Stove Store in any of the large neighboring towns.

THE UNITED STATES' LIFE INSURANCE, ANNUITY AND TRUST COMPANY,

Charter Perpetual. Cash system. Capital $250,000

Office No. 28, Merchants' Exchange.

ORGANIZED upon the "mixed principle," Stock and Mutual, which combined features offer to insured members double the usual security. The Cash system of payments has also been adopted, thus avoiding the heavy drawbacks created by unpaid premium notes. The table rates of premium, upon which its policies are being issued, is the only scale experience has proven should be adopted, as affording requisite security to be insured, and an undoubted guarantee for the perpetuity of such institutions. An experimental table may be found worthless, at the very instant a policy should possess its greatest value. Life insurance, very properly, is attesting the attention of the world. The public however, in their commendable willingness to embrace and employ its wise and salutary provisions, should make ultimate security the primary and most important object, which can only be attained by so adjusting the premiums as to anticipate unexpected losses and fluctuations of every kind. It is the purpose of this company annually to credit, upon the policies of holders and books of the Company, such an amount of profits as shall not affect the stability, or impair the soundness of its contracts. Premiums may, at the option of the insured, be paid annually, semi-annually, or quarterly, in advance. All necessary information, together with blanks, pamphlets, &c., may be obtained gratis, at the office of J. E. CANFIELD, Athens, Pa.

Afflicted do not Despair

Another fellow being rescued from Death by Schenck's Pulmonic Syrup.

The following case is one of the greatest triumphs of medicine over disease ever published in medical history. Read it!

Prompted by no other than the feeling of benevolence, and for the benefit of my afflicted fellow beings, I desire to make known a short description of my disease, and the unexpected cure I obtained from SCHENCK'S PULMONIC SYRUP. About three years ago I was afflicted with a violent cold, which settled on my breast and side, and every few days would raise considerable blood; my cough was tight and distressing. Every day I had violent fever creeping, chills, and profuse sweats at night, with great difficulty of breathing, and great loss of appetite; my system was entirely prostrated, being confined to my bed most of the time. Two of the most eminent physicians of this city, attended me, and after exhausting all their skill, pronounced my case incurable. Indeed, one said my lungs were almost gone, and I could not possibly recover. At this stage of my disease, I was prevailed upon to try *Dr. Schenck's Pulmonic Syrup*, and before I had taken half a dozen bottles, was so far recovered as to be to go about the house. It seemed to strengthen my whole system—it loosened the cough and stopped the bleeding—my bowels became regular, and every thing I ate, seemed to digest easily and nourish my whole system. Indeed, such was the rapid progress of my health and so sudden the change, that I became too sanguine of a speedy cure, and abandoned the use of the medicine before the disease was thoroughly eradicated, which resulted in another attack of bleeding at the lungs last fall, accompanied by a distressing cough. I again commenced taking the Pulmonic Syrup, and sent for Dr. Schenck who, upon a careful examination, advised me to continue using it. Before I had taken four bottles, an abscess formed in my side, which gathered and broke, discharging, as near as I can judge, a pint of very disagreeable yellow matter. This seemed to cleanse and purify my whole system, From this time I began to get better, and am happy to say entirely recovered. I am sure at this time I enjoy better health than I have for the last ten years. Since I commenced taking the Pulmonic Syrup, I have never failed to recommend it wherever I went, that others, as well as myself, might be saved saved from that awful disease; for I feel it a duty I owe to the afflicted to publish it to the world. Permit me to mention a few cases which have come under my immediate observation. Being on a visit to Camden, N. J., last summer, I saw a child, evidently in the last stage of bowel consumption. The mother informed me that the physicians had given the child up as incurable. I told her what benefit I had received from the use of Schenck's Pulmonic Syrup, and induced her to procure a bottle. I heard nothing more from the little sufferer until about three month after; being in the market, my attention was drawn to a lady who observed me very attentively. She finally approached me, and asked if I was not the lady who recommended Schenck's Pulmonic Syrup to her dying child last summer in Camden. I replied that I was. She said that her child had entirely recovered, and was uncommonly healthy. Her name is Mrs. Wilson, and now resides in Bridesburg. Another lady I would mention in particular, who had a scrofulous affection. Her face and neck presented one continued sore, and one of her eyes was seriously affected with it. She had become greatly emaciated, and to all appearances past recovery. I induced her to try Schenck's Pulmonic Syrup, which she did, and is now perfectly cured. Another lady, Mrs. McMullen, whose residence I will give on application, was evidently in the last stage of Consumption. I prevailed upon her to try the Pulmonic Syrup. In a very short time she was entirely recovered, and now enjoys excellent health, having become exceedingly fleshy. These are three cases within my knowledge, which I know were cured by Schenck's Pulmonic Syrup. All who doubt this statement, and will take the trouble to call on me at my residence Parrish street five doors above tenth north side, I think I will be able to satisfactorily convince them by own case, and others that I know have been cured by this Syrup. Since my cure, there have been so many to see me to know what I took, that I have had a very good opportunity of knowing a great many that have taken it, and have been greatly benefitted thereby, and I think if persons afflicted with Consumption or Liver Complaint, would send for Dr. Schenck, and let him carefully examine their lungs, and if he says he can cure them, follow the directions, and prevent taking cold, they will rapidly recover.

GULIELMA L. LEIBERT,

Philadelphia, May 29, 1849.

J. H. SCHENCK—*Dear Sir*—I have known Mrs. Leibert for several years, as a member of my church, and have all confidence in her statement, and am rejoiced to find her again restored to health. Any thing more, in addition to her statement, is needless.

Yours, truly, THOS. L. JANEWAY,
Pastor of the North Presbyterian Church.

Philadelphia, June 20, 1849. 6th st. above Green.

Prepared and sold by J. H. SCHENCK, at his Laboratory S. E. corner Coates & Marshall sts., and by the following Agents in Bradford County.

Geo. A. Perkins, Athens; D. Bailey, Leraysville; T. Humphrey, Orwell; Maynard & Woodburn, Rome; J. J. Warford, Monroeton; D. D. Parkhurst, Le Roy; C. E. Rathbone, Canton; King & Vosburg, Troy; and by MIX & MASON, Towanda.

Price, $1 per bottle or $6 per half dozen.

BRANT'S INDIAN

PULMONARY BALSAM,

The Great COUGH REMEDY.

Many years of experience, and more than a Hundred Thousand Cures of Consumptive Complaints, have proved to the undoubted satisfaction of all persons who have become acquainted with this *wonderful remedy*, that it is decidedly superior, because it is *soothing* and *healing*, and *more certain to cure* Consumption of the Lungs, than any other Remedy in the world. We know, however, that it is said by some that Consumption can not be cured. To that the opinion of the many or the few we shall not attempt to argue with such, but this we will say, and do assert as a fact, which can be proved in thousands of cases, that this medicine has cured *Coughs* and *diseases* which, before the cures were effected, were called real Consumptions, and which were attended with *symptoms* that resembled, and were in all respects like the symptoms of those who *die*, and when dead are said to have died with that fatal disease Consumption. This Balsam has cured INVALIDS, persons who were said to be hopelessly afflicted—who had *hard, dry, rocking Coughs*—*Pains* in the Breast, *Side*, and *Back*—*Difficulty of Breathing*—*Purulent Expectoration*—*Night Fever*—*Night-Sweats*—and wasting away of the Flesh and Blood. Persons having such complaints have been cured after it was said they *could not* live a week longer. This Medicine has cured *scores who were supposed to be in a dying state*; but, by the use of this remedy, they now live, and enjoy good health.

This Balsam is *purely a vegetable compound*. It is pleasant to take, and *never does injury in any case of disease*, or under any circumstances. It effects its wonderful and unknown agency. Cures by Purifying, Strengthening, and Invigorating the whole system—*by soothing the irritable*, and producing a healthy action—thus *allaying Cough*—*soothing the Nervous*—*aiding and facilitating Expectoration*. It Cures the following diseases, viz.

Consumption,

COUGHS *and Colds, Bronchitis, Asthma, Spitting of Blood, Bleeding at the Lungs, Pains in the Breast, Side, and Chest, Aversation, Night Sweats, Palpitation of the Heart*, and all FEMALE WEAKNESSES and *Complaints* arising therefrom, Cholera Infantum, &c.

☞ For Proof and particulars of Cures, see our Pamphlets and Handbills—all our Agents have them to give away.

For sale by HUSTON & PORTER, Towanda; C. H. Herrick, Athens; C. E. Rathbone, Canton; D. D. Parkhurst, Leroy; J. Hanson, Monroeton; E. W. Baird, Rummersfield; D. Bailey & Son, LeRaysville; T. Humphrey, Orwell; Maynard & Woodburn, Rome; E. S. Tracy, Smithfield; Cornell & Gee, Burlington; L. & E. Bunyon, Troy.

All orders must be addressed O. WALLACE & Co. 304 Broadway, N. Y. 24eowly

Very Strange but true.

A Gentleman of Utica, N. Y., has obtained from the Witch-hazel, a simple remedy, which lays a more just claim to the name of "family cure all" than any Medicine we have ever before known. Nothing is connected with it but a little Alcohol to preserve it, and yet it acts with great certainty in removing pain and all local inflammation, curing all sores, burns, bruises and lameness, rapidly. Piles, bowel complaints, cholera-morbus, hemorrhage, ear ache, tooth-ache, sore eyes, and all nervous affections. It is white as water and as harmless, and it is called

"*Pond's Pain Destroyer and Healing Extract.*"

None is genuine except "Pond's Extract" is blown in the bottle. Mr. Pond first introduced this medicine to the public and has expended a vast deal of time and money in bringing it to a high state of perfection, and we now warrant every bottle to give satisfaction.

A man by the name of Spencer has put forth an article called "The Cayle Extract," which claims to be from the Witch-hazel. If from that shrub, its name is a perfect deception, and if it is a very imperfect article it is not Pond's, get a pamphlet and see.

For sale at Montanye's & Co. Towanda, S. S. Hinman Monroeton, Parkhurst & Lamb LeRoy, Horace Willey Franklin. June 5th 1850.

BOOT & SHOE MANUFACTORY.

JOHN W. WILCOX, has removed his establishment to the shop between Kingsbery's and Bartlett's stores, and where he still solicits a share of public patronage. He intends, by a careful selection of stock, and by attention to the interests of his customers to make as neat and durable work as can be manufactured in this part of the country.

He will keep constantly on hand, and manufacture to order, *Morocco, Calf and Coarse Boots and Shoes; Ladies' Gaiters, Shoes and Slips; Children's do.; Gent's Gaiters and Pumps, &c.*

☞ Country Produce, of most descriptions, taken in payment for work, at the market price.

Towanda, April 28, 1850.

COMMERCIAL WORKS.

NEW ESTABLISHMENT.

THE subscribers have commenced the FOUNDRY business at the *old stand* formerly occupied as a Chair and Bedstead Factory in the Borough of Towanda, where we will hold ourselves in readiness to attend to the wants of any, and all persons who may favor us with a call. We hope by strict attention to business to merit a share of Public patronage.

We are fitting up a MACHINE SHOP connected with the Furnace, where we hope to be able to do any and all kinds of *finishing and fitting up, &c.* We will endeavor at all times to keep a good assortment of work on hand so that customers may be accommodated on the shortest notice.

HAVING taken pains to secure the services of experienced workmen from the state of N. Y., we flatter ourselves we shall be able to turn off work in a workmanlike manner and as good as can be done in any other establishment.

We shall also be prepared for the manufacture of stoves by the quantity, and will keep constantly on hand a few select patterns for retail.

The subscribers invite all persons who may be in want of any thing in our line to give us a call and we guarantee they will not go away dissatisfied.
