Agricultural.

The Household.

SODA SOAP.—The following is excellent; try it: Two pounds bar soap; two pounds sal soda; ten quarts soft water; boil till it is all dissolved.

TO TAKE INK OUT OF LINEN.—Dip the spotted part in pure melted tallow, and the ink will come out with it. This is said to be unfailing.

HOLES in the bottom of iron kettles, or in stoves, may be stopped by six parts well pulverized dry clay, and one part iron filing; make into a paste with boiling linseed oil.

BROILED HAM.—Cut thin slices from the middle of the ham; pour boiling water over them, and let them stand ten minutes to freshen; wipe the slices dry, and broil quickly.

RAILROAD CAKE.—One cup sugar, one cup flour, two tablespoonfuls melted butter, three eggs, one teaspoonful lemon essence, one teaspoonful cream tarter, half teaspoonful soda.

FEATHERED CAKE.—Three cups of flour, two of sugar, half cup of butter, and the same amount of milk, two eggs, one teaspoonful cream tarter, half teaspoonful soda. Flavor with lemon.

POUND CAKE, MEASURED.—Two cups butter, three cups sugar, ten eggs, five cups flour. Stir the butter and sugar to a cream, add the yolks well beaten, then the flour, lastly the whites.

CHEAP SPONGE CAKE.—Break two eggs in a teacup; beat slightly; fill up with thick, sweet cream; then add one cup of white sugar; one cup of flour; one teaspoonful of cream of tarter; one half a teaspoonful of soda. Flavor with lemon.

WATER CAKE.—One teacup of sugar; half cup of butter; one teacup of water; two cups of flour; teaspoonful cream tarter; one of soda; beat the butter and eggs to a cream; then add the other ingridients; stir well, and bake quick; flavor with nutmeg or lemon.

TO CLEANSE THE HANDS FROM DYE STAINS.—Pour a thimbleful of oil of vitriol in a basin of water, and wash without soap. When the stains are entirely removed, and not before, wash completely in cold water (if warm so much the better), using no soap until the acid is entirely off.

CARROT PUDDING.—One pound of carrots boiled and rubbed through a cullender, half pound seeded raisins, three quarters of a pound suet, four tablespoonfuls sugar, eight tablespoonfuls flour, and a little salt. Boil four hours, and then let it stand in the oven twenty minutes. Serve with cream sauce, flavored to taste.

REMOVING GREASE.—A very easy way to remove spots of candle grease, etc., from a carpet, is to lay over them course brown paper, and on it set a warm iron; take off in a few minutes, and the grease will be found on the paper. If one application does not entirely remove, try again.

STAGNANT WATER AND MILK.—It has been known for a long time that milk left standing in a room where patients are sick, becomes permeated with the subtle poison of the disease. Contagion has also been spread through milk, by reason of persons recovering from sickness attending to the labor of the dairy. The kind of grass or fodder on which the cows feed also gives a peculiar flavor and quality to their milk. In addition to these facts, it has recently been demonstrated that the most startling consequences may ensue from the animals drinking stagnant water. Professor Law, of Cornell University, has examined with a microscope, milk of an unusual, roby appearance, and found it full of those fungi, or vegetable organisms, that abound in stagnant water. On inquiry, he found that the cows from which it came had only stagnant water to drink, and further investigation revealed the fact that the blood of the animals teemed with these fungi, and that the cows were in a feverish, unhealthy condition. The warning which this discovery ought to convey is very simple. It is the duty of dairymen, to see that their cattle have a supply of pure, sweet water. They use such a great quantity of water that a judicious concern for the health of the community should induce them to employ none but the very cleanest.

ROTATION OF CROPS IN NATURE.—It is generally considered that the principle of rotation in crops is a modern discovery, and yet nature has worked in this way from the commencement. Proofs of this are seen in the vegetable remains of rocks and coal beds, and even now we see the same principle at work whenever we cut down a pine woods, which if allowed to grow in timbers again is replaced with deciduous trees, as oaks, beeches, maples, etc., while a beech or maple or oak wood cut off will be replaced with pines. Here is undoubtedly rotation of crops, and we merely follow nature when we adopt the principle in our agricultural operations.

—POOR FEED.—Jeremiah O'Brien, Oneida County, N. Y., wanted to know of the Farmer's Club, what he should do for his cows; he fed them hay, but they were rough, scrawny, and poor, and very weak. Would copperas help them, or is the soil deficient in lime, potash, or iron? He wanted light on this subject. F. D. Curtis—Poor feed is what's the matter. He should give them some oil-meal with their hay, or steam their feed. Dr. Crane added that good hay with meal of some sort was all that was needed; it was poor feed that caused all the hollow-horn we hear of and most other complaints. It did not pay to cook feed where corn was twenty-five cents a bushel, any how.

COST OF KEEPING COWS IN MILK-DAIRIES.—An "Orange County" milk-producer on Long Island thus feeds his cows; namely, ten pounds of hay, four quarts of corn or oil-meal, and one bushel of brewers' grain daily. The cost of this is, for hay 15 cents, meal 15 cents, grains 18 cents, total 48 cents. The average yield is ten quarts daily, which retails at ten cents per quart. Calculating for interest on cost of stock and other expenses, and a proper remuneration for the uncomfortable and unseasonable labor necessary, if an "Orange County" dairyman is honest, he is far from being a "bloated aristocrat," or one who does not well earn his money.

"WELL, there is something in that," as the man said, when he tried to put his boot on with a little kitten in it.

Manufacturies.

FOUNDERY & MACHINE SHOP.

The undersigned having purchased the Foundry and Machine Shop lately owned by John Carman, are prepared to do all kinds of work appertaining to their business, with promptness and dispatch.

MILL GEARINGS, CIRCULAR SAW MILLS, MAN DRILLS,

And all kinds of

MILL IRONS

MADE TO ORDER.

ENGINES REPAIRED,

And all work warranted to give satisfaction.

SHINGLE MACHINES

Of the latest and most improved kinds manufactured and kept constantly on hand ready for use.

BLOOD & CO.,

Still continue to manufacture their celebrated

HORSE POWERS & CLEANERS,

and will sell a better machine, for less money than *can be had elsewhere in the world.* We claim for our machines that they will do as much, or more, than any other, and are more durably built. We personally superintend our work and see that it is well down. We will send

DESCRIPTIVE CATALOGUES,

of our machines, on application.

ONE AND TWO HORSE POWERS,

One & Two Horse THRESHER & SEPERATORS, THRESHER and CLEANERS,

FANNING MILLS,

CIRCULAR AND DRAG SAW MILLS,

SAW AND GRIST MILL work done to order.

Give us a call before purchasing elsewhere.

BLOOD BRADFORD CO., PA.
ATHENS.

BLOOD & CO.,

Aug. 2, 1869.

NEW PLANING MILL.

The undersigned having built a large and commodious Mill in the Borough of Towanda, and filled it with the most modern and improved machinery, for the manufacture of

WINDOW SASH AND BLINDS,

Are prepared to fill orders, whether large or small, upon the shortest notice. We have also a large variety of MOULDINGS, of the latest style and pattern, which we can furnish much cheaper than they can be worked by hand.

PLANING, TONGUEING, GROOVING, AND SCROOL SAWING,

And all other work pertaining to Joinery, will be done to suit our customers.

Persons building, and not living more than twelve to fourteen miles distant, will find it largely for their interest to buy of us, or bring their lumber and have it worked by our machinery. Bring your grist of Flooring, or other lumber, and while your team is feeding, have it ground out and take it home with you.

We will pay CASH for PINE AND HEMLOCK LUMBER delivered at our lumber yard. Come and see us, or if you cancom't c, w rite.

Towanda, Feb., 1864. B. RODGERS & CO.

Rail-Roads.

COWELL & MYER'S

at prices that cannot fail to satisfy all that they are determined not to be undersold by any one. They have enlarged their Store by building so that they now have room for the fresh supplies that are daily received by them. They have connected with their store a Market where they now keep fresh meats to sell by the quarter or piece, and a full supply of Groceries and Provisions, to which they would call the attention of all cash buyers. Come and examine our Goods and Prices, before purchasing and satisfy yourselves. We guarantee all goods to give entire satisfaction. We are thankful to our customers for their past liberal patronage and solicit a continuance of the same. COWELL & MYER.

Dec. 20, 1869.

EUREKA! EUREKA!!

Everybody has discovered that

THE OLD CLOTHING HOUSE OF

Rosenfield & Wolff

(One door south of Fox & Mercur's) is

THE PLACE FOR BARGAINS.

They now have a great store full of the

RICHEST AND MOST BEAUTIFUL ASSORTMENT OF MEN AND BOYS' CLOTHING

To be found outside the cities.

Their goods are

FINE ENOUGH TO SUIT ANY TASTE,

AND

CHEAP ENOUGH TO ACCOMMODATE ANY PURSE

DON'T BE DECEIVED!

"Never leave an old friend for a new one."

Remember that ROSENFIELD & WOLFF are permanently located here, and can offer greater inducements to purchasers than any other house in town.

It is the interest of gentlemen in this section to come and bring all their boys, and give their goods an examination.

Consider the fact that you can buy at ROSENFIELD & WOLFF'S, beautiful and substantial Clothing for a mere song.

ROSENFIELD & WOLFF.

August 23, 1871.

IMPORTANT TO ALL WHO VALUE THEIR SIGHT!

The sight of the aged assisted; the weak strengthened and the perfect preserved.

PHILADELPHIA OPTICAL INSTITUTE,

For the manufacturing of the

CONCAVE CONVEX, CRYSTAL LENSES, LONDON SMOKED AND TINTED GLASS FOR WEAK OR INFLAMED EYES.

The Concave Convex Crystal Spectacles, made by the above institute are now a long time before the public, and the rapid and increased demand for them, combined with the universal acknowledgment of their clearness in vision and ease to the eye, shows plainly that they are superior to any other glasses in the market.

The majority of Spectacles, (mostly imported) and no matter how fine the frames, contain but a poor and worthless article of glasses, (generally cast or pressed) they are made to be sold only, without any calculation respecting benefit to the eye, and therefore the great complaint of poor and weak sight. Thousands are using glasses now which hire and fatigue the eye, where the objects get dim after short usage, or require an intensely strong light and therefore destroying the sight, which, were they properly suited, would be preserved a life time.

The advantages claimed for the Concave Convex Crystal Glasses are the following:

The Lenses are ground of the best material, pure and hard, and made only for optical purposes; they are therefore not liable to get scratched or dim.

They confer a brilliancy and distinctness of vision not found in any other glass.

They can be used equally well by day or candle light without straining or fatiguing the eyes.

They are ground mathematically true in the concave convex mirror, according to the philosophy of nature, and shape of curves of the eye, therefore assisting nature only instead of forcing it.

That the lenses are centered correct into the frames.

They can be used longer than any other glasses without changing to a higher power.

The frames are made strong and durable by experienced workmen and warranted to give satisfaction.

WM. A. CHAMBERLIN,

Dealer in Watches, Jewelry and Silver Ware, Towanda, Pa., has the *sole Agency for these glasses* in Bradford county. No Peddlers employed.

July 12, 1870-tf

TOWANDA STEAM FLOURING MILLS!

W. H. FULLER & CO.,

Respectfully inform the public that having rebuilt on the site of the old mill, with all modern improvements, they are now prepared to do

CUSTOM GRINDING

In the best possible manner and on the shortest notice. No pains will be spared to give satisfaction. Farmers doing business in town can bring their grain and have it ground the same day to take back.
