The demand for Loans is very perceptibly increasing; another week or two will show us that we have been trading in Oil, and Coal, and Stock. Silver is beyond our means.

The large amounts already invested in these Oil companies, together with the annual requirements and the new Banks under way, will soon produce a State Banks ringing over to the National system, closer money market than we have felt in this city for many months, perhaps years. We have been eagerly reeling out with both hands, on all sides, as a friend says "Taking all the water in the channel and shovelling for more freight." The time for contracting will come, and perhaps too soon for some of us. After the flood tide comes the ebb—easy and unfeeling only, will prevent stranding. There will be a great expansion of prices this winter than we have yet seen, extending to all kinds of stocks," said a prominent and successful business man to-day. He showed the faith he had in his prophecy ten minutes later, by offering to sell all his Railroad Stocks, at a decline from market quotations. A Bull in words, but a Bear in deeds.

Governments declined slightly to-day.

Gold fell about two per cent. Last quotations 236½.

The following is a report of the offerings of, and bids for Oil Stocks, at Anderson's Exchange this afternoon:

OIL IN NEW BRUNSWICK.—We learn from a letter received by D. Tweddle, the Secretary of the Westmoreland Petroleum Company, of Province of New Brunswick, that a vein of oil has been struck in one of their wells on the Memramcook river, at the depth of 200 feet.

This well is located in a gum bed, formed by the petroleum coming from the rock. In the immediate vicinity of the many oil and bitumen springs. The company have now got four wells boring—one 650 feet, one 500 feet, and two 200 feet respectively. In all the wells more or less oil has been obtained, gas fully of heavy gravity, in the last, oil is in the oil of light gravity, which will be tested and tested without delay.

SALE ON THE 15TH.—D. Walker, of Pennsylvania, will sell to Jesse Reed and Company, December 15, at 2 o'clock, at the Exchange, 40 acres on French Creek, near Lodi; also, 40 acres on Long Run—tributary of Patterson's Run—for 250 bbls. Average production prevails on Hall Run and Pithole Creek. Pithole City Times.

[illegible] Pithole in Pittsburgh. The time is close to be worth 15,000, and the interests of all are second to none in the region. It is situated at the Pennsylvania Breakbulkers, each doing equal Pitch in Warren county, Pennsylvania. Oil Region Times.

We are requested to state that Thursday Evening will be open to the public again this evening. A selection has been made, and a box has been made in the arrangements of the room during the past few days with a view to convenience and comfort.
