Another Valuable Invention.

GATE'S BACK-SUCTION PREVENTOR FOR OIL WELLS, patented August 15, 1871, which entirely prevents the ingress of air to oil wells, while the tubing is being drawn. It is a well known fact to oil operators, that upon wells where Gas Pumps are used it is necessary to preserve as nearly a perfect vacuum as possible, and that no air should be let into the well, at any time, when it can possibly be avoided; consequently, whenever the tubing is drawn from a well it is the cause of great injury to it, as the stuffing box, being then necessarily opened, the air immediately rushes back between the tubing and casing, into the well going into the oil rock and gas veins, and consequently causes the oil and gas to rush back to a great distance. So much so, that it almost always takes several days after pumping is resumed for a well to be brought back to its former condition, and oftentimes it takes several weeks; and quite frequently wells have been almost completely ruined by the air being thus let in while drawing tubing.

The BACK-SUCTION PREVENTOR is attached to the stuffing box and works in such a way that it completely shuts up the space between the stuffing box and tubing so effectually that not a particle of air can get through at any time while the tubing is being drawn and replaced. It supplies a want long felt and is, without question, one of the most valuable inventions of the day, to those engaged in the oil business. No well should be without it, as it often times saves ten times its cost by once using

It is manufactured at the FOUNDRY AND MACHINE SHOP of ANDREWS & CO., TIDIOUTE, PA., and for sale by Hardware Dealers.

Tidioute Pa., March 28 1872—taw 3m.

GATES' BACK SUCTION PREVENTOR.

TIDIOUTE, Feb 3, 1872.

MESSRS. ANDREWS & CO.—GENTLEMEN—Having used one of GATES' BACK SUCTION PREVENTORS, I can confidently recommend the same to all who have occasion to use the same, as the best Preventor of Back Suction on Oil Wells. Our well was so small that it hardly paid to run it. After our purchase of GATES' BACK SUCTION PREVENTOR its production was increased to a good paying well. But we put the Back Suction Preventor on the well, it seriously injured it, so that we were obliged to remove it to its former position, without any tubing. This is entirely ascribed by the owner of the Preventor

BAKER, PHOENIX & CO.

TIDIOUTE, Jan 31, 1872

MESSRS. ANDREWS & CO.—Having thoroughly tested the utility of GATES' BACK SUCTION PREVENTOR, we consider them one of the most useful inventions ever made for oil wells, and we think we are entitled to judge of them, having 15 on our wells. We can now draw tubing, and when they are replaced the wells produce the same as if we drawing, thus showing that the Preventor effectually prevents all ingress of air.

Yours respectfully,
BAKER & PHOENIX.

MESSRS. ANDREWS & CO.—GENTS—This is to certify that I have used one of GATES' BACK SUCTION PREVENTORS on the Lee & Hilland lease, Economy Hill, and would not do without it if my lease was it will do all and more than it is recommended to do. And I can cheerfully recommend it to all Oil Operators who have any Back suction Wells.

Yours, &c.,
JOHN MYERS.
