THE POST.

MIDDLEBURG.....JULY 21 1870

Fine Dairy Cows:—Jersey and Ayrshire.

There is now more inquiry upon the subject of raising fine stock, than at any former period. The editor of this Journal has been asked the question dozens of times, "Where can I get a fine Milk Cow?" The profit of fine cattle is becoming more convincing every day, and our friends are preparing for the Short Horn, Jerseys or Ayrshires. The Jersey and Ayrshire cows are considered the most valuable now, in America, for the dairy, and their prices vary from $200 to $300, which is so high that people are not willing to invest such large sums.—But if they ever get fine milkers, they must pay for them, and hence we would recommend to the farmers of every county, that they may obtain fine cattle by forming stock clubs of $20 to $50 each, to buy pure blooded bulls; one such fine animal would bring about wonderful changes in any neighborhood, and yet at a very small expense to each stock raiser. In one year the stock company would get their money, and in two years they would make several hundred per cent on their investment in a Jersey or Ayrshire bull.

The Jersey is a dainty, sensitive cow. It will not stand the cold well; yet it has a vigorous constitution, directed more particularly to the digestion of food, so that what you give this little cow will be given you back again, and that in the richest milk the world as ever known, that is, rich in cream and butter. In cheese it falls below all other breeds. These cows are a pleasure to have around you. They are more docile than any other animal on the farm.

They are peaceable and will stay at home. A breechy cow has never been known among the Jerseys; so it is said.

Those who cannot afford to buy the pure blood there is a good chance offered to improve on what they have by a cross of this breed. We need increased vigor of digestion, of constitution, in our stock, and this judiciously applied, will do it. If we have not the pure, dear-like little cattle in such a cross, we have—at least something that reminds us of them, both in the pail and in the look, as well as the gentle, docile demeanor.

We extract the following on the Ayrshire and Grade Ayrshirs stock of cattle, from the report of a committee to the Massachusetts State Board of Agriculture, as published in its transactions for 1868–9.

Should we say that we consider this stock superior to any other breed, the statement would be taken as a matter of opinion; for while the farming community have had their attention called to blood stock for many years, a more special attention has been called to this subject within a few years, and the number of animals of various breeds is yearly increasing. All have their advocates and all have their good qualities. Should any one breed for beef or for heavy oxen, and should their locality afford a bountiful supply of food, no doubt they would look for the Short-Horns; and in fact, we have seen plenty cows of very large size and superior for their milking qualities. The Devons have received a due share of attention, and we have noticed fine herds of this breed that would compare favorably with other varieties—symmetrical in form beautiful in color, and hardy to endure the severity of our New England climate. In the eastern section of the State, in many places the Jersey cow largely predominates—not for her size or beauty, but for the richness of her milk, particularly for butter making, as it requires a smaller quantity for the same amount of butter. On the island of Nantucket, the Jersey cow is largely taking the lead, and is highly spoken of for milking qualities, both for quality and quantity. The Ayrshires, although not large in size, are reported to be superior for the dairy, giving large returns for the same amount of keeping, and better adapted to a large portion of New England than the larger breeds for dairying purposes, especially cheese-making. We have seen this year a report of an Ayrshire cow, that has given within the year 4,000 quarts of milk; this is a remarkable quantity for any cow to give within a year, and probably but few of any breed could be found to come up to this quantity; but it leads us to conclude that a superior cow is far more profitable than an inferior one, although the first cost might be double the price of a medium one; for, after the first outlay, the cost of keeping for one cow, although a good one, is no more than for a poorer one. Fifteen hundred or two thousand quarts of milk for a cow to give in one year is a fair quantity. Now, if one is found that will give twice that quantity in the same time, a hundred dollars extra would be a very profitable investment for the best cow. We cannot have all our cows the best; but by careful attention we can do much towards improving the quality of our dairy stock.—*American Stock Journal.*

WASHINGTON HOUSE.

Middleburg, Snyder County, Pa.

DAN'L BOLENDER, Proprietor.

Persons stopping at this House will find excellent accommodations, for Man and Beast. [7-46-tf.]

J. S. BURKHART,

Selinsgrove, Snyder Co., Penna

Keeps constantly on hand a large and well made assortment of Tin, Sheet-iron ware, Stoves, &c., &c.

He is Agent for the following named articles.

"THE MORNING GLORY."

Littlefield's Patent Improved Base Burning

COAL STOVE.

In this pattern of THE MORNING GLORY, several new and important features have been embodied, which can only be seen to be admired. This new stove is made entirely of cast iron, so fitted as to be air tight, but can be made with sheet-iron upper section when preferred by the purchaser. Its ornamental finish is drapery, making it a handsome piece of furniture, far more so than any stove heretofore made. Its internal construction, though resembling some of the former patterns of The Morning Glory is quite different, making it more durable, and far less difficult to be repaired. The castings are of the highest order, fully equaling the finest castings made in this country.

Among the many ADVANTAGES in the use of the Morning Glory are the following:—1, Continuous Burning. 2, Quality of the Heat. 3, Ventilation through the stove. 4, Anti-Dust Stove. 5, No Escape of Gas. 6, Economy of Fuel.

"THE BARLEY SHEAF."

Anti-Dust Air-Tight Cooking Stove, with Extended Fire-Box for Wood or Coal.

Patented May 16th, 1865.

We take pleasure in offering our customers and the Stove Trade, a New first-Class Flat-top, and would call *particular attention to its many attractive and valuable improvements.*

This Stove has been carefully tested for several months, and the results have proved so highly satisfactory, that several of our oldest and most experienced stove dealers predict for it a sale far beyond our ability to supply this season.

Sliding front fire-doors, giving full use of the hearth.

An additional slide in the oven, so arranged as to give more room in the upper part of the oven; a great convenience much needed

The oven is nearly as *wide at the top* as at the hearth line, which not only increases the size, but will be recognized as *a great advantage in baking.*

DOTY'S CLOTHES WASHER.

The best, cheapest, and most popular Washing Machine ever invented.

It is easy to operate, sitting or standing; takes but little room; injures no garments; finishes its work from in two to four Minutes; is durable and convenient; and the only Washing Machine known that is liked the better the longer it is used.

THE UNIVERSAL CLOTHES WRINGER.

The "GREAT FAMILY ECONOMIZER.

The terms of our Patent call our Machine a "Wringer." Years of experience prove it also to be A MOST EXCELLENT WASHER.

When we reduce every invention for washing clothes to a principle they all amount to that of pressing and squeezing, and forcing the water through them, thus removing the dirt. Most Washing Machines do it by rubbing. The Universal Wringer does it by pressing.

NEW

MUSIC STORE

Ayer's Sarsaparilla,

FOR PURIFYING THE BLOOD.

The reputation this excellent medicine enjoys, is derived from its cures, many of which are truly marvellous. Inveterate cases of Scrofulous disease, where the system seemed saturated with corruption, have been purified and cured by it. Scrofulous affections and disorders, which were aggravated by the scrofulous contamination until they were painfully afflicting, have been radically cured in such great numbers in almost every section of the country, that the public scarcely need to be informed of its virtues or uses.

Scrofulous poison is one of the most destructive enemies of our race. Often, this unseen and unfelt tenant of the organism undermines the constitution, and invites the attack of enfeebling or fatal diseases, without exciting a suspicion of its presence. Again, it seems to breed infection throughout the body, and then, on some favorable occasion, rapidly develop into one or other of its hideous forms, either on the surface or among the vitals. In the latter, tubercles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it shows its presence by eruptions on the skin, or foul ulcerations on some part of the body. Hence the occasional use of a bottle of this *Sarsaparilla* is advisable, even when no active symptoms of disease appear. Persons afflicted with the following complaints generally find immediate relief, and, at length, cure, by the use of this *SARSAPARILLA: St. Anthony's Fire, Rose or Erysipelas, Tetter, Salt Rheum, Scald Head, Ringworm, Sore Eyes, Sore Ears*, and other eruptions or visible forms of *Scrofulous* disease. Also in the more concealed forms, as *Dyspepsia, Dropsy, Heart Disease, Fits, Epilepsy, Neuralgia*, and the various *Ulcerous* affections of the muscular and nervous systems.

Syphilis or *Venereal* and *Mercurial Diseases* are cured by it, though a long time is required for subduing these obstinate maladies by any medicine. But long continued use of this medicine will cure the complaint. *Leucorrhœa* or *Whites, Uterine Ulcerations*, and *Female Diseases*, are commonly soon relieved and ultimately cured by its purifying and invigorating effect. Minute Directions for each case are found in our Almanac, supplied gratis. *Rheumatism* and *Gout*, when caused by accumulations of extraneous matters in the blood, yield quickly to it, as also *Liver Complaints, Torpidity, Congestion* or *Inflammation* of the *Liver*, and *Jaundice*, when arising, as they often do, from the rankling poisons in the blood. This *SARSAPARILLA* is a great restorer for the strength and vigor of the system. Those who are *Languid* and *Listless, Despondent, Sleepless*, and troubled with *Nervous Apprehensions* or *Fears*, or any of the affections symptomatic of *Weakness*, will find immediate relief and convincing evidence of its restorative power upon trial.
