REPORT OF SALES.

$4000 U. S. 6's 1881 ..... $107 00

The large gold export by Saturday's steamer, stiffened quotations this morning, and had a depressing effect on Government bonds.

The Secretary is disposed to sell gold, not for the purpose of keeping down the premium, it is said, but to obtain currency to meet demands upon the Treasury. Whatever may be his purpose, the amounts hitherto thrown on the market have had hardly an appreciable effect in putting down the price of coin, and there seems to be but little hope of lower rates for the fall months. The amount required to pay the 1864 coupons due Sept. 1st, but little exceeds three millions, and will be readily absorbed, without weakening the present rate. The stock market is reasonably firm, and money easy in our Eastern cities.

Oil shares in New York are active, and generally higher. The opposite is the case in Philadelphia, as will be seen by reference to our telegraph columns and quotations.

Our local market is unchanged since Saturday, save a growing weakness in Columbia. The stock was rather freely offered at 26½ to-day. 25 was bid, though buyers are generally expecting lower figures. No changes in Hitchin.

The "Sterling" Well, on the Tarr Farm, and in which is Tam, Story & Cherry Run Co.'s very handsome interest, is now producing eighty barrels per day, and increasing. The Superintendent is of the opinion that she will soon reach one hundred.

The following telegram was received by Messrs. Steel & Bailey, late on Saturday evening:

MARLETOWN, Pa., Aug. 26.

MESSRS. S. & B.—We have struck a splendid show of oil in No. 3, at 225 feet. It is the best show I have seen in Green county.

WM. H. HYPS.

The well in question belongs to Messrs. Wm. Phillips, James Parke, Jr., David E. Park, Steel & Bailey, Croft & McKee, John Forrester and several other gentlemen, all largely interested in Whitely Creek Oil Company, in the lands of which it is located.

A strike is reported in the Hamilton Well, about half a mile below and No. 2. Also, a good strike on the Vance Farm, about two miles above, and two in the Jarrett Farm, ten miles up. It is impossible to say what they are likely to yield, if anything of consequence, but a few weeks will determine their capacity as producers of oil.

It is reported that Mr. McCullough is about to negotiate a long loan, payable in part in coupon interest legal tenders, and certificates of indebtedness, his object is to curtail the currency by withdrawing legal tenders, and to consolidate the debt by exchanging short obligations for bonds having forty years to run. The particulars are not positively known, but it is believed that the amount of the loan will not exceed fifty millions of dollars, and that the negotiation will not materially stringency in the loan market.

—It appears from a statement made by Cole, Sumner & Co., the bankers at La Crosse who were sold, and to suspend recently, owing to the failure of Ketchum Son & Co., of New York, that their entire indebtedness to depositors is $84,000, to secure which they had assets only amounting to $33,000, including the $19,925 they had in Ketchum's bank, which may be regarded as entirely lost. Thus they have only $13,075 with which to meet their indebtedness of $84,000. The consequence is that the depositors, most of whom are poor men, will have gotten from 65 to 81 cts. on their care, will lose nearly one half of what is due them.

A pretty fair estimate (says the New York Herald) of the solubility of Edward B. Ketchum has just been arrived at, and it foots up the enormous amount of four millions two hundred thousand dollars.

Philadelphia Produce Market—Aug. 26.
