FOURTH ANNUAL FAIR
OF
THE GLENWOOD AGRICULTURAL SOCIETY,
SUSQUEHANNA COUNTY PA.,

For the Year 1865, Will be Held on September 20th, 21st. and 22d.

THE ANNUAL ADDRESS
Will be Delivered at 10½ o'clock a. m. of the Last Day of the Fair.

THE SPEAKER'S NAME WILL BE ANNOUNCED IN TIME.

Organization and Object of the Society.

The Glenwood Agricultural Society was organized October 18th, 1861, on a different plan from all other Agricultural Societies in the United States. This Society does not confine its exhibitors to the narrow limits of Town, County, State, nor United States, but opens it to the World. This is the fourth year of its exhibition, and, judging from the success of the past, we expect a great crowd this year, for we have added very largely to our premiums, and shall spare no pains in making everything as attractive as possible. As to the Fair Ground and Track, they are too well known to need comment.—The Society tenders its thanks to its former visitors, and pledge themselves to do everything in their power to make this more attractive than any preceeding one, for we believe in improvement. We refer you to our Premium List and Rules and Regulations for further information.

Our exhibition this year, will be Wednesday, Thursday, and Friday, September 20th, 21st and 22d, 1865.

JAMES E. HOWE, *President*, Nicholson, Pa.
W. H. OSTERHOUT, *Cor. Sec'y*, Glenwood, Pa.

INCREASE OF RATS.—The Farmer's Gazette (English) asserts and proves by figures that one pair of rats will have a progeny and descendants no less than 65,536 in three years. Now, unless this immense family can be kept down, they would consume more food than would sustain 65,000 human beings.

For further particulars call upon the Agent, where the different styles of machines are on exhibition.

Parties that have used other so called Standard Machines have thrown them aside and give their testimony in favor of these.

EVERY MACHINE WARRANTED TO GIVE ENTIRE SATISFACTION.

For several reasons it recommends itself above all others.

1. Beauty and excellence of stitch, alike upon both sides, working equally well on silk, linen, woolen, and cotton goods—seaming, quilting, gathering, hemming, felling, cording, and braiding.
2. Strength of seams that will not rip nor ravel.
3. The most simple in construction of any two threaded machine in use; therefore less liable to get out of repair.
4. Sews without the use of a shuttle, thereby doing away with much cumbersome machinery, and the trouble of regulating the tension of the under thread.
5. Runs at a greater speed than a shuttle machine possibly can.

These machines with all the new improvements, warranted and delivered in Montrose, at Manufacturers' prices.

The best of HOME REFERENCES given. Over ONE HUNDRED in use in Montrose and vicinity.
