Sir James Murray's Fluid Magnesia.

PREPARED under the immediate care of the Inventor, and established for upwards of thirty years.

This elegant preparation is recommended in all cases of acid, sedimentous, indigestion, gout, and gravel, as the most safe, easy, and effectual form in which Magnesia may, and indeed the only one in which it ought to be exhibited, possessing all the properties of the Magnesia now in general use, without being liable like it, to form dangerous concretions in the bowels; it effectually cures heartburn without injuring the coats of the stomach, as soda, potass, and their carbonates are known to do; it prevents the food of infants turning sour; in all cases it acts as a pleasing aperient, and is peculiarly adapted to females.

Sir Humphrey Davy notified that this solution forms soluble combinations with uric acid salts in cases of gout and gravel, thereby counteracting their injurious tendency, when other alkalies, and even Magnesia itself, had failed.

The Rt. Hon. Philip Crampton, Bart., Surgeon General to the Army in Ireland:—

"Dear Sir—There can be no doubt that Magnesia may be administered more easily in the form of a concentrated solution than in substance; for this, and many other reasons, I am of opinion that the Fluid Magnesia is a very valuable addition to our Materia Medica. PHILIP CRAMPTON."

Sir James Clarke, Sir Alexander Crichton, Sir Henry Marsh, Messrs Guthrie and Herbert Mayo, of London, strongly recommend Murray's Fluid Magnesia, as being in a finely more safe and convenient than the solid, and free from the danger attending the constant use of alkalies.

Great American Mechanical Work.

D. Appleton & Co., New York, have in course of publication, in parts, price twenty five cents each,

A DICTIONARY

Of Machines, Mechanics, Engine Work, and Engineering, designed for Practical Working Men, and those intended for the Engineering Profession.

EDITED BY ERASTUS BRIGHT, C. E.

THIS WORK is of large 8vo. size, and will contain 500 or 600 THOUSAND pages, and upwards of six THOUSAND ILLUSTRATIONS. It will present to mechanics and descriptions of the most important machines in the United States. Independent of the results of American ingenuity, it will contain complete practical treatises on Mechanics, Machinery, Engine-work, and Engineering; with all that is useful in more than one thousand dollars worth of folio volumes, magazines, and other books.

The great object of this publication is, to place before practical men and students such an amount of theoretical and scientific knowledge, in a condensed form, as shall enable them to work to the best advantage, and to avoid those mistakes which they might otherwise commit. The amount of useful information thus brought together is almost beyond precedent in such works. Indeed, there is hardly any subject within its range which is not treated with great clearness and precision, that even a man of the most ordinary capacity cannot fail of obtaining a tolerable idea, thus learning from it much which it is important for him to know.

The publishers are, in short, determined, regardless of cost, to make the work as complete as possible; and it is hoped every one interested in the work will procure it as issued in numbers, and thus encourage the enterprise.

The work will be issued in semi-monthly numbers, commencing in January, 1850, and will progress with great regularity.

The whole work will be published in 40 numbers, at 25 cents per number, and complete within the current year, 1850. A liberal discount will be made to agents.

Any one sending the publisher $10 in advance, shall receive the work delivered at his post office free of expense.

Opinions of the Press.

"To our numerous Manufacturers, Engineers, and Artisans, it will be a mine of wealth."—Boston Daily Mercury.

"Young men, arm yourselves with its knowledge.—We can with confidence recommend our readers to possess themselves of its numbers as fast as they appear."—American Artisan.

"We unhesitatingly commend it to the work to those engaged in or interested in mechanical pursuits, as an eminently worthy of their examination and study."—Troy (N. Y.) Budget.

"It is truly a great work, and the publishers deserve the thanks of inventors, machinists, and manufacturers, and indeed of the public generally."—N. Y. Independent.

"This Dictionary will be highly useful to practical mechanics, and valuable to all who wish to acquaint themselves with the progress of invention in the mechanic arts."—New Bedford (Mass.) Mercury.

"Young mechanics ought to keep pace with the general as well as practical knowledge, and this work will show them just how it lay stand."—Roxbury (Mass.) Advertiser.

"We take it to be just the work that scores and hundreds of our intelligent mechanics in the land are the proper. So simple are its descriptions, and so full and minute, its specifications, that it may be said that any mechanic might construct any machine it describes, by the help of its engravings and its instructions."—N. Y. Commercial Advertiser.

"All interested in mechanics should avail themselves of its advantages."—Scenectady, (Penn.) Journal.

"A work of extensive practical utility and great importance and value to the industrial interests of the country. We regard the work as eminently calculated to promote the cause of science and the mechanical arts, and to disseminate valuable information on these subjects."—Farmer and Mechanic.

"Practical men in all the various branches of mechanical and manufacturing industry and engineering will find in this work a treasure which it will be to their profit to possess."—Troy Daily Whig.

"We have carefully perused the numbers, and have no hesitation in saying that it is the best work for mechanics, tradesmen, and scientific readers we have seen, for it contains many an information on every branch of the mechanical arts and sciences, expressed in a style and language intelligible to any reader of ordinary capacity."—Globe-easier, (Mass.) News.

"We are sure we can safely recommend it to Northwich and other parts of Connecticut as a service to bringing the work to their attention."—Norwich, (Conn.) Courier.

"It is just such a work as every mechanic should possess."—Freeman's Journal, Toronto.

"We consider it one of the most useful and important publications of the age. No mechanic can afford to be without it."—New Ark. (N. J.) Gazette.

"Of all the valuable publications having for their object the elevation and advancement of the mechanical arts and sciences, none that we have seen, is so full of promise as this."—Buffalo Com. Adv.

"It is the best and cheapest work we have noticed to the relentless and practical engineer and mechanic. The plates are beautifully executed."—Washington Globe.

"This great Dictionary is one of the most useful works ever published for the use of the class for which it is sold makes it acceptable to all."—South Carolinian.

"We regard it as one of the most comprehensive and valuable, as well as cheapest works of the kind extant."—Baltimore Advertiser.

"Ought to be taken by every one desiring to keep pace with the progress of art and science in every one of the labors of civilized life."—Rondout Courier.

"It is designed, far the principal part, for the mechanical, only that it is more devoted to the mechanical and engineering profession, and above all, it is valuable as accomplishing for American what is done for England, viz: describing American machinery and mechanics, as well as those of Europe.

"It is published in numbers, and at a price so moderate, looking at what is contained in each number, that no one who has the least interest in the subject should be deterred from procuring it; and every one who does so, will find that he has in a condensed form an amount of instruction which would be obtained, if at all, only by the purchase of very many volumes."—N. Y. Courier and Enquirer.

"The comprehensiveness with which the subjects are treated, in admirable manner in which they are illustrated, I conceive to be the aim of the most desirable work."—Democratic Review.

"This work should be in the hands of every mechanic, artisan, and manufacturer, and we feel sure it will be the least aspiration to excel in their respective business. We have carefully examined the work and do recommend it to inventors. To them we would say in the strong language of the Bible: 'It is good.'"—Baltimore Inventors' Journal.

M'ALLISTER'S OINTMENT,

Containing no Mercury, nor other Mineral.

THIS (following) celebrated ointment was given by the celebrated Dr. Wooster Beach, to his son that great medical work entitled "The American Practice of Medicine and Family Physician."

"Having been made acquainted with the ingredients which compose McAllister's All-Healing Ointment and having prescribed it in my practice for several years in my private practice, I have no hesitation in saying or certifying that it is a Vegetable Remedy, containing no mineral substance whatever, and that its ingredients combined as they are, and used as directed by the Proprietor, are safe and sure, but of great value, being a truly scientific Remedy of great power; and I cheerfully recommend it as a compound which has done much good, and which is adapted to the cure of a great variety of cases. Though I have never either recommended or prescribed the sale of secret medicines, regard for the truly honest, generous, benevolent character of the Proprietor of this Ointment, and the value of his discovery, all combine to make me much regarding it. W. BEACH, D. D."

New York, April 22d, 1848.

BURNS—It is one of the best things in the world for Burns.

PILES.—Thousands are yearly cured by this Ointment. It never fails in giving relief.

For Tetters, Ulcers, and all kinds of Sores, it has no equal.

If Mothers and Nurses know its value in cases of Swollen or Sore Breasts, they will always apply it. In such cases, if used according to directions, it gives relief in a very few hours.

Around the box are directions for using McAllister's Ointment for Scrofula, Liver Complaint, Erysipelas, Tetter, Chilblain, Fresh Burns, Old Ulcers, Sore Throat, Bronchitis, Nervous Affections, Pains, Disease of the Spine, Head Aches, Asthma, Deafness, Ear Aches, Burns, Corns, all Diseases of the Skin, Lips, Pimples, &c., Swelling of the Limbs, Sores, Rheumatism, Piles, Cold Feet, Croup, Bowels or Throat, Bewilled or Broken Breast, Tooth Ache, Ague in the Face, &c.

From the Reading Pa

There was never, perhaps, a Medicine brought before the public, that has in so short a time won such a reputation as McAllister's All-Healing Salve. Almost every person that has made trial of it speaks warmly in its praise. It has been cured by it of the most painful rheumatism, of a tumor on the neck, of a swelling in the thighs, &c. It cures not give immediate relief, in every case, it can do no injury. Being applied outwardly.

Another evidence of the wonderful healing power of the Salve is the following certificate, from a respectable citizen of Maidencreek township, in this county:

Maidencreek, Dec 20, 1847.

Messrs. Ritter & Co.—I was entirely cured of a severe sore on my leg in the back, by the use of McAllister's All-Healing Salve, which I purchased from you. I suffered with it for about 10 years, and at night was unable to sleep. During the time I tried various remedies, which were prescribed for me by physicians and others, but found no relief, and at last made use of your Salve, without receiving any relief, and at last made a trial of this Salve, with a result favorable beyond all expectation. I am now entirely free from the pain, and enjoy my night's rest in peaceful sleep. I have also used the Salve for tooth ache and other complaints, with similar happy results. Your friend, JOHN HOFFMAN, Sen.

JAMES McALLISTER,
Sole Proprietor of the above medicine, No. 2 North Third street, Philadelphia.

JULES HAUEL'S MEDICATED NYMPH SOAP.

—The skin of many persons is disfigured with slight eruptions, pimples, blotches, &c., and when this is merely a disease of the skin, as it is in nineteen cases out of every hundred, it is very easily removed. Jules Hauel's Nymph Soap is expressly adapted to diseases of the skin, as it acts directly upon the minute pores which cover its surface, cleansing them from impurities, and by its balsamic properties healing and eradicating all eruptions, and rendering the softest and roughest skin soft, fair, and blooming.

Persons who have been in the habit of using ordinary soap, will be astonished at the beautiful effect produced by the Nymph Soap, in imparting a delicate bloom, preventing the neck, face, or hands from chapping, allaying all irritation, and removing all cutaneous eruptions. It possesses an exquisite perfume, and is entirely devoid of all alkaline properties, rendering it the only article which can be used with safety and comfort in the nursery.

All those whose, faces or necks are disfigured with pimples, blotches, tan, morphew, &c, should make trial of Jules Hauel's Nymph Soap, as the proprietor positively assures them, that its use will render the most discolored skin white, the roughest skin smooth, and the most diseased skin healthy, pure, and blooming.

Jules Hauel's Nymph Soap is the only article which will effectually produce the above effects in so short a time, and the only one which is at the same time all powerful and entirely harmless. Prepared only by

PETROLEUM, OR ROCK OIL.

"There are more things in heaven and earth Than are dreamt of in philosophy."

THE VIRTUES of this remarkable remedy, and the constant application for it, in the proprietors, has induced him to have it put up in bottles with labels and directions relating to the virtues of the article.

The PETROLEUM is procured from a well in this county, at a depth of four hundred feet, is a pure unadulterated article, and is now offered to the public, not just as flows from Nature's Great Laboratory!! Thousands of complaints reaching a number of diseases, is no longer a matter of uncertainty. Science, as many things in the arcana of nature, which, if known, might be of great benefit to the human family, and in restoring the bloom of health and vigor to many a sufferer. Long before the proprietor thought of putting it up in bottles, he had proved its virtues in cases of disease. The constant and daily increasing calls for it, and so several remarkable cures it has performed, is a sure indication of its high reputation and widely spread application in the cure of disease.

We do not think it necessary to make a parade of certificates, as we are conscious that the medicine can soon work its way into the favor of those who suffer and wish to be benefited. While we do not claim for it a universal application in every disease, we unhesitatingly say, that in a number of Chronic Diseases it is unrivalled. Among these may be enumerated—all diseases of the mucous tissue, such as CHRONIC BRONCHITIS, CONSUMPTION (in its early stage,) Asthma, and all diseases of the air passages, LIVER COMPLAINT, DYSPEPSIA, Diarrhœa, Diseases of the Bladder and Kidneys, Pains in the Back or Side, Nervous Diseases, Neuralgia, Palsy, Rheumatic Pains, Gout, Erysipelas, Tetter, Ringworms, Burns, Scalds, Bruises, Old Sores, &c., &c. In cases of debility resulting from exposure, or long and protracted cases of disease, this medicine will bring relief. It will act as a general TONIC and ALTERATIVE in such cases, imparting tone and energy to the whole frame, removing obstructions, opening the sluggish functions, which cause disease and a broken constitution, and giving increased and renewed energy to all the organs of life! The proprietor knows of several cures of PILES, that resisted every other treatment, yet well under the use of the PETROLEUM for a short time. The proof can be given to any person who desires it. None genuine without the signature of the proprietor. Sold by the proprietor,

1850 BIDWELL'S 1850

SANDY AND BEAVER LINE.

From Pittsburgh to Columbus and Cleveland, through the rich and populous counties of Columbiana, Carroll, Stark, Tuscarawas, Coshocton, Muskingum, Licking, and Franklin.

The completion of the Sandy and Beaver Canal opens up to our city through this great natural central route a direct communication to the above as well as the adjoining counties of Wayne, Holmes, Knox, and Delaware.

From this section of Ohio, the trade with Pittsburgh has been, to a great extent cut off, in consequence of the high rates of transportation, which are now reduced to one half of late prices.

Boats of this line will leave daily, and run through without transhipment. The Canal company have bestowed upon this line an interest in the unprecedented advantages of their charter, and thus secured to the middle portions of Ohio in ordering their goods by BIDWELL'S SANDY AND BEAVER LINE, an equal interest in this advantage.
