THRESHING MACHINES;
WITH GRAVES' IMPROVED PATENT
Horse Power.

THE great encouragement which the subscribers received during the last year in the sale of their Machines, induced them to make extensive preparations to meet the increased demand for their article. No time, labor or expense has been spared to procure the very best materials the country can afford. Their workmen are experienced and of the first character, and they have no hesitation in assuring the Farmers that they are now able to furnish them with an article not only equal but decidedly superior to any other manufactured in this part of the country.

For speedy and clean threshing, with ease to the horses, they believe their Machine to be unequalled. Their price is the same as last year, viz: 140 dollars, 70 dollars in cash and the balance in six months, for which a note will be required. The machines are insured for twelve months, or until they shall have threshed two thousand bushels of grain. They have now several machines and ready for sale, and will at all times be ready to furnish them on the shortest notice. Orders from a distance will be punctually attended to. For the trifling sum of FOUR DOLLARS, in addition to the price of the Machine and Power, they furnish the farmer an addition that will enable him to shell his Cloverseed.

To the Public.

The subscribers, being desirous of publicly counteracting the efforts which are secretly made to injure the character of their machine, by persons who appear to be actuated by unfriendly feelings towards them, respectfully submit the following CERTIFICATES to the public.

I certify that I, last year, used one of the Threshing Machines manufactured by J. E. Brady & Co. and during the season, there was threshed on it about four thousand bushels of grain, and about two hundred and twenty five bushels of clover seed, and I am fully satisfied that, for the Farmer's use, it is superior to any other Machine I have ever seen in this part of the country. I further certify that Mr. Henry Hurst, one of my neighbors, had six wagon loads of clover seed stuff cleaned at a clover mill, and the yield was 22 bushels, and that the same quantity of stuff was threshed on my machine, and the yield was 32½ bushels. Mr. Hurst is of the opinion that the stuff he hauled to the mill, was the better lot of the two.

FREDERICK KARPER.

May 15, 1838.

I certify that, in August last, I purchased from J. E. Brady & Co. one of their threshing machines, which I used for threshing grain for different Farmers, till some time in March last. During that period I threshed about fifteen thousand bushels of wheat, rye and oats. My expense for repairs of both the Machine and Horse Power, did not exceed five dollars, and when I sold them, (which was in March,) the machinery appeared to be nearly as good as it was at the time I bought them. The wheels in the horse power were perfectly sound and substantial, and upon a close examination, I could not discover that the cogs had worn in the slightest degree. I had, for several years previous, been engaged in threshing with three different kinds of machines, which I fully tried, and I unhesitatingly certify that for durability, service and speedy and clean threshing, I have never used or seen any that, in my opinion, will at all compare with the one I had last year, unless it be one of the same kind.—If attention is given to the machinery, it appears to me almost impossible for any part of them to get out of order.

SAMUEL HOLLINGER.

May 17, 1838.

I, last year, purchased two of the threshing machine of J. E. Brady & Co. (one of which I still have,) and fully tested them. For speedy and clean threshing, they are, certainly, a superior article, and one that is of great service to the Farmer. I consider it the best article of the kind I have ever seen in this part of the country. I take great pleasure in recommending it the Farmer.

DANIEL W. ROYER.

May 1, 1838.

I certify that Mr. Andrew Davison and I purchased, last November, one of J. E. Brady & Co's threshing machines, which we fully tested, having threshed wheat, rye, oats and clover seed on it. I am fully satisfied that it is preferable to any other I have seen in operation, and it is an article that will repay the Farmer amply, for its price. It threshes clean, is not liable to get out of order, and is, upon the whole, an article that I can, with great confidence, recommend to the Farmer.

ABRAHAM S. DAVISON.

June 18 1838.

Mr. Benjamin Hamilton and I, last year, purchased one of J. E. Brady & Co's threshing machines, with which there was threshed not less than 4000 bushels of grain. It is an excellent article, superior, in my opinion, to any of the kind I have ever seen. One of its chief excellencies, that it is not liable to go out of order. I have no hesitation in recommending it to the Farmer.

JOHN HUMPHREYS.

June 12, 1838.

Other certificates could have been procured, but it was deemed unnecessary. Persons who wish to inquire into the power and quality of the machines, are referred to those who last year used them, and particularly to the following named gentlemen, viz: Messrs. John Foust, Frederick Byers, Adam Vonderaw, Emanuel Sites, and Samuel Diehl, of Guilford township; Messrs. John Huber and John Yockey, of Quincy township; Messrs. Abraham Stoner and Isaac Frantz, of Washington township; Messrs. Jacob Hade, James Mitchel, James Allison, Emanuel Hade, John Binehler, Henry and James Beatty, Christian Hovel and Christian Hoover, of Antrim township; Jacob Oyster, Esq. and Mr. Henry Wingert, of Green township; Mr. Frederick Deck, of Letterkenny township; Messrs. John Rhodes and Conrad Goldsmith, of Hamilton township; Messrs. William Angle and John Philipi, of Montgomery township; Capt. J. McFarland and Joseph Duncan, of Peters township; Messrs. William Bowers and J. Scnerist, of Warren township; Messrs. Jacob and John Kegeries, of Metal township; and David Hunter, Esq., and Henry Winger of Bedford county.

J. E. BRADY & Co.

Chambersburg, September 17, 1838.

One of the above machines is to be seen at the barn of Mr. Francis Noble, in Carlisle. Any person wishing to purchase one, can have it set up; and if it does not answer the purpose as specified, we will take it away free of expense to the purchaser. There have been upwards of 100 of them made and sold by Brady & Co.; within 15 months past. A line directed to the subscriber will meet with prompt attention.

Dyspepsia and Hypochondriacism.
Interesting Cure!

Mr. William Salmon, Green street, above Third street, Philadelphia, afflicted for several years with the following distressing symptoms: Sickness at the stomach, head-ache, dizziness, palpitations of the heart, impaired appetite, sometimes acid and putrescent eructations, coldness and weakness of the extremities, emaciation and general debility, disturbed rest, a sense of pressure and weight at the stomach after eating, nightmare, great mental despondency, severe flying pains in the chest, back, and sides, costiveness, a dislike for society, or conversation, involuntary sighing and weeping, langor and lassitude upon the least exercise.

Mr. Salmon had applied to the most eminent physicians, who considered it beyond the power of medicine to restore him to health; however, as his afflictions had reduced him to a very deplorable condition, and having been recommended by a relative of his to make trial of Dr. William Evans' Medicine, he with difficulty repaired to the office and procured a package, to which, he says, he is indebted for his restoration to life, health and friends. He is now enjoying all the blessings of perfect health. Persons desirous of further information, will be satisfied with every particular of his astonishing cure at Dr. Evans' Medical office, No. 99, North 8th street, Philadelphia.

The above medicine is for sale at the office of the Herald & Expositor, Carlisle.

TEETH.

SILICIOUS METALLIC, OR MINERAL INCORRUPTIBLE TEETH.

Is has for many years been a great desideratum among European and American Dentists, to manufacture Teeth from incorruptible materials which should imitate the natural living Teeth.

Many have devoted years to unsuccessful experiments, and others have succeeded in manufacturing teeth of materials similar to the porcelain ware, but generally they have an opaque white appearance, by which they are easily distinguished from the human teeth.

After long and tedious experiments, the subscriber has succeeded in manufacturing teeth of materials entirely incorruptible, and perfectly in imitation of human teeth. They have a semi-transparency, and are made of various sizes and shades.

In cases where absorption of the avcolar process, or other causes may render it necessary, he will cast of he same materials attached to the teeth, artificial gums, which shall imitate the gum and supply the loss of substance

It is entirely impossible for these teeth to change their color, or cause foetid breath.

He will insert them from one to entire sets, in such manner that they will make articulation of the voice perfect, and materially assist in mastication, and so that they cannot be distinguished from the most beautiful natural living teeth by the most scrutinizing observer.

He also performs all the various operations in Dental Surgery, according to the late scientific improvements in the art.
