Tin Roofing.

THE subscribers most respectfully announce to their fellow-citizens that they have perfected their arrangement to carry on the business of Tin Roofing on an extensive scale.

This now close on four years since we first introduced tin roofing in this city. During that time we have covered over fifty thousand square feet of roofs with tin plate, and in all cases we believe we have given the most entire satisfaction. This kind of roof has been applied to the very best buildings in this city, including, among a large number of others, the two superb buildings on Penn street, owned by John L. Shoenberger and John Bissel, Esqrs. That tin roofing (when skillfully laid on) is both permanent and durable, there can be no doubt; in proof of this, we can refer to the almost universal application of this kind of roofing in the large cities on the sea-board during the last twenty years; and from enquiring on the subject, we have yet to learn of any one of those roofs having been worn out. The roofs covered with tin in our own city are open to the examination of all who take an interest in the matter. We have also prepared a miniature plan of roofs, which may be seen at our establishment, where any other information will be given with pleasure. JOHN DUNLAP & CO.

The Accomptant.

THE ATTENTION OF THE PUBLIC is respectfully called to the following certificate:—

MR. S. EAKINS—Having retired a quantity of Gold weighed by your Accomptant, I find the result proves your instrument correct; and recommend the use of it to those going to California, as the best method for obtaining the real value of Gold. Resp. yours,

J. B. DUNLEVY, Gold Beater.

Pittsburgh, March 9, '49.

PITTSBURGH, March 7, 1849.

MR. EAKINS—*Dear Sir*: Having examined the "Accomptant," manufactured at your rooms, I do not hesitate to commend it to the use of those gentlemen who are about returning to California, in search of Gold.

It gives a close approximation to the specific gravity of Gold, and will certainly enable the adventurer to ascertain when his placer is yielding Gold."

Gold Washers.

H. PARRY has invented a machine for washing Gold, the use of which he has been exhibiting in this city. They are now offered for sale at the Warehouse of H. PARRY, SCOTT & Co., No. 103 Wood st., Pittsburgh.

Adventurers to California are invited to call and examine these labor-saving machines. They are simple in their construction, and can be transported on the back of mules or horses, weighing eighty pounds each, and can be put in operation in half an hour. They can be filled with pounds each, and can be put in operation in half an hour. They can be filled with gravel and washed in a day, without the loss of a particle of the mineral. They can be increased in size and worked by water or mule power, if desirable. The operators work without going into the water or being exposed to the weather or wet, and consequently without endangering their health. They will respect but a small stream of water, and can be used the whole season, and can be put into operation where there is not sufficient water to wash in the usual way.

Price of smallest size $25. Orders from abroad, accompanied by cash, will be promptly filled.

Worcester's Pianos.

RECEIVED THIS DAY, and for sale at manufacturer's prices, *three elegant Rosewood PIANOS*, made by J. Worcester, New York. These instruments are considered fully equal, if not superior, to any now made in New York, having a delightful tone, full, round, and melodious quality of sound, well adapted to the voice, well strung, with Gazzam's Iron Fastenings, and also the best quality of Screw Bedsteads, Tables, Stands, &c. And as I am particularly anxious to dispose of a good and elegant Piano, in order to prevent a cheap and prejudice against machine made work, that they warrant their works to give satisfaction, and if not well made, the money shall be returned. JOHN H. MELLOR,

To Californians.

A BAROMETER.—The undersigned having adapted an instrument to the purpose of ascertaining the specific gravity or value of Gold, is now prepared to supply all whose business may require its use. It is small, convenient, and can be used without difficulty, a little practice being sufficient to show the process.

Persons contemplating going to California, would do well to call and examine the instrument, as it is in every way calculated to protect them from fraud, by enabling them at any time to ascertain the value of the metal they may buy.

Printed directions and tables will be supplied gratuitously to purchasers. SAMUEL EAKINS,
