Bryans Pulmonic Wafers,

STOVES AND TIN WARE.

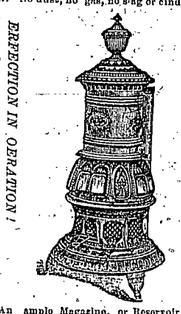
IF YOU WANT TO SEE THE most perfect Parlor Stove ever offered to the public, step into

WM. FRIDLEY'S

Stove Store East Louther street, in the rear of Halbert's Grocery Store and see the

GREAT AMERICAN BASE BURNER

in operation. It is a perpetual Burner, and perfect Radiator, as well as a perfect Ventilator of the room, and is warranted to consume less coal than any other Stove of the same size, ever offered to the public, requiring but one ordinary scuttle of small coal once in twenty-eight hours, being perfectly simple in all its working, having a simple slide to regulate the fire for keeping at night, one kindling of fire being all that is required during the winter. No dust, no gas, no slag or cinder.



ITS IMPORTANT CHARACTERISTICS ARE THESE:

NEATNESS IN DESIGN!

COMPACTNESS IN SIZE!

ERECTION IN OPERATION!

THE LATTER QUALITY IS PRODUCED BY THE FOLLOWING IMPROVEMENTS:

1.—An ample Magazine, or Reservoir, for Coal, having a free discharge mouth, the magazine being adjustable to different heights of six to nine inches from the grate, so as to accommodate the supply of Coal as to its size and quantity, thus permitting the maintenance of a certain depth of coal for active combustion within the fire-pot (whether it be of nut or stove size), which is the only way to burn Anthracite coal to advantage. Different sizes of coal require more or less depth for perfect combustion.

2.—A Funnel, or Hopper, for the passage of the coal to the magazine is so arranged as to permit the introduction of fresh coal, without allowing any escape of fumes and gas into the room; and further, when the Stove is left with its top uncovered, compelling any fumes that may escape from the supply in the reservoir, upwards in its top, to pass over the top of the reservoir into the surrounding flue, and so to the base and outlet.

3.—A Fire-Pot with a continuous Flue, over its entire upper edge and down its whole body to the base and outlet flues by which means the heat is transmitted, not in separate flues several inches apart, as is usual in downward draft Stoves, but by a continuous sheet of flame in contact with the entire circumference of the outer casing of the Stove, from the top of the Fire-Pot downwards, giving a far more extended surface of radiation of the heat than any downward draft Stove extant.

4.—An ample Grate Surface and Air Passages, and a complete arrangement for shaking and dumping, with a good size Ash Pan to receive the ashes and cinder.

☞ We also wish it to be noted, that there is an absolute

SECURITY FROM EXPLOSIONS OF GAS!

upon the removal of the cover from the Stove, which so commonly occurs upon the removal of the covers with other Magazine Stoves; for such is the effect of the Patent, as constructed, and arranged in reference to the Magazine and its surrounding Flue, that NO GAS CAN ACCUMULATE IN THE UPPER PART OF THE MAGAZINE TO EXPLODE. Nor can a current of air, or draft, be created upwards through the Magazine to influence its contents, which happens with other Stoves igniting and destroying the Magazine itself.

Every feature of this Stove is calculated to effect.

☞ ECONOMY ☜

IN THE USE OF FUEL, DURABILITY IN ITS CONSTRUCTION, AND SYMMETRY IN ITS PROPORTIONS.

In addition to the above Stove, Fridley keeps on hand a full supply of the best Cook, Parlor and Office Stoves.

Tin and Sheet Iron work of all kinds on hand; and Spouting, Roofing and Jobbing of all kinds, done at short notice, and of the best material. Fruit Cans, and Jars of the most approved patents, and in conclusion the best variety of Black Sett

Furnaces,

ever offered to the public. For reference call on T. Cooper, C. Fleming, Jas. Geo. Neidigh, A. L. Spangler, Hesketon, Peter Hillman, D. Coldigh, J. Rosler, and others.

HEATING AND VENTILATING WAREHOUSE,

Nos. 1132 & 1134 Market Street,

PHILADELPHIA.

Has an entirely new heater. It is constructed as to at once commend itself to general favor, being a combination of wrought and cast iron. It is very simple in its construction, and is perfectly air tight self-cleaning, having no pipes or drums to be taken out and cleaned. It is so arranged with upright flues as to produce a larger amount of heat from the same weight of coal than any furnace now in use. The hygrometric condition of the air as produced by my new arrangement of evaporation will at once demonstrate that it is the only

that will produce a perfectly healthy atmosphere. I am now making five sizes of PORTABLES, and four for Masonry.
