Franklin Iron Works, Port Carbon, Pa.
Jan. 1, '70 1-

Mining Machinery, &c.

TO COAL OPERATORS, MINERS AND FURNACES.
GRICE & LONG, Locomotive Builders,
143 BEACH STREET, PHILADELPHIA, PA.
Would call your attention to their *Colliery and Furnace Locomotives* designed for *inside or outside* work, and for any required railroad, with a short curve, with capacity to draw from 50 to 250 tons gross load.
Having developed in both the Anthracite and Bituminous regions of Pennsylvania, the *most successful Tunnel Locomotive* in the country, they offer with confidence their various styles of Locomotive Engines with every guarantee of their workmanship and performance, and refer to the many now in operation in the several mining districts, furnaces and forges in the State and country.
Their small, first cost, great power developed, together with their durability, great economy and light daily expenses over animal power or ordinary locomotives, (as proven by their experience of several years) make a vast saving in expenses *sufficient to pay their first cost in a very short time.*
February 12, 1870 7-6m

WIRE ROPE.
MANUFACTURED BY
TUCKER CARTER CO., New York.
All sizes Hemp or Wire Centres, bright or painted. The Rope manufactured by this firm are considered by all parties using them, the best and handsomest Rope made in the world, made invariably from wire drawn from the best Norway Iron. The largest ships in the U. S. Navy are rigged with Wire Ropes made by this firm. Samples of these Rope can be seen with, and orders taken, and all information given, and orders promptly filled at reasonable rates and circulars furnished by A. HENDERSON, opposite Miners' National Bank, Pottsville.
Jan 15, '70 3-6m

ROOT'S SECTIONAL WROUGHT IRON SAFETY BOILERS.
ROOT'S IMPROVED TRUNK ENGINES,
Stationary, Portable and Extra.
Double Piston Square Hoisting Engines, Hoisting Machinery for Coal Shafts, Sloping, Grist Mills, Stores, &c., &c.
One of these Hoisters can be seen running daily at HILL & HARRIS' Colliery, Mahanoy City, Pa.
PARTICULAR ATTENTION IS INVITED TO the Hoister, which has no equal. No dead points—having two pistons in one cylinder, either end of which is taking full steam when the other is passing centre. It requires no friction straps, clutches or brakes of any kind. Started, reversed or stopped instantly, and at any point of revolution, by the simple movement of a single lever. Having no keys, pins, set screws, or other adjustable parts, which in other hoisters require the knowledge and constant care of an experienced engineer, can be put in the hands of the most inexperienced persons. All its working parts are enclosed in the case or cylinder and are thus protected from breakage, the effects of dust, dirt, and rust or weather. Its extreme lightness, compactness and rapid speed, highly recommend it for this use. Orders received for the manufacture by the undersigned, who will also furnish descriptive catalogues, price lists, drawings, estimates, and other information.

KARCHER.
Sept. 8, '69. 7-1y

UNION HAMS.
In offering the above brand to the attention of consumers the present season, we beg leave to state, that we have made very great improvements in their curing during the past Winter, and have so facilitated the curing, that we can now offer them. They are selected from strictly corn fed Hogs, trimmed very nicely so as to make a little waste in cutting, and packed and the ingredients used in curing are the very finest to be had. The Hams are all assorted before sliding and packing, and cured by itself so as to enable us to keep in pickle just long enough to cure and not be too salt a great fault with most Hams. We also offer Ice Houses all summer and can furnish the Hams at all times cut from Hogs that were alive within a week of the time the Hams are delivered, which is a great advantage and one possessed by very few dealers. We feel satisfied a careful trial will insure satisfaction. None genuine unless branded. Sold only by
