PUDDER & FORD,
Manufacturers and Dealers in
MANCHESTER MINERAL PAINT,
ALLEGHENY CITY, PA.

New York, December 15th, 1851.

I have analyzed a sample of MANCHESTER MINERAL PAINT, for PUDDER & FORD, and find it to contain the following:

Silica,	67.21
Alumina,	5.34
Per Oxide of Iron,	18.41
Lime,	.83
Magnesia,	.94
Oxide of Manganese,	1.00
Water and Loss,	5.00
	100.00

The Powdered Sample, contained in the box, which I suppose was the one you desired also to have analyzed, I find to differ from any average of the lumps powdered, and mixed together. This last yields as follows:

Per Oxide of Iron,	25.50
Silica and Alumina,	33.00
Lime,	.88
Magnesia,	.94
Water and Loss,	7.98
	100.00

This difference I presume arises from the mineral not being uniform, some portions containing more Iron than others. The analysis shows the article to be well suited for a durable paint. I find that by calcining the powder by a pretty high heat, the color is much improved, or at least converted into a fine red.

THE Directors, in presenting the Second Annual Report, take leave to congratulate the members upon the marked success of the State Mutual Fire Insurance Company. In operation only two years, it has taken a position beside the older institutions of the kind, and proves by its very great success that the mutual system as adopted by them is, beyond a question, the best and only safe mode of insurance.

The heavy losses of the past year which have annihilated some of the Stock Companies, leave the State Mutual with a cash surplus of upwards of thirty-one thousand dollars, besides a reserve capital of nearly two hundred thousand dollars, which is constantly increasing.

The Directors submit that the State Mutual Fire Insurance Company offers to owners of safe property inducements seldom equalled and never exceeded.
