PUDDER & FORD,

Manufacturers and Dealers in

MANCHESTER MINERAL PAINT,

ALLTOWN CITY, PA.

NEW YORK, December 15th, 1851.

I have analyzed a sample of MANCHESTER MINERAL PAINT, for PUDDER & FORD, and find it to contain the following:

Silica,	67.01
Alumina,	5.24
Per Oxide of Iron,	18.41
Lime,	.36
Magnesia,	.21
Oxide of Manganese,	.19
Water and Loss,	8.60
	100.00

The Powdered Sample, contained in the box, which I suppose was the one you desired also to have analysed, I find to differ from any average of the lumps powdered and mixed together. This last yields as follows:

Per Oxide of Iron,	23.50
Silica and Alumina,	33.00
Lime,	.38
Magnesia,	.16
Water and Loss,	7.96
	100.00

This difference I presume arises from the mineral not being uniform, some portions containing more iron than others. The analysis shows the article to be well suited for a durable paint. I find that by calcining the powder by a pretty high heat, the color is much improved, or at least converted into a fine red.
