PHONOGRAPHY,
OR WRITING BY SOUND!

THIS system, (invented by Mr. ISAAC PITMAN, of Bath,) as adapted to the English language, forms a complete system of Phonetic Short-hand, by which a speaker may be followed *verbatim*, and the report read at any distance of time with rapidity and accuracy.

The need existing for a brief and philosophic mode of expressing spoken language, has long been felt by legislators, authors, ministers, professional gentlemen, tradesmen and students. Phonography is now acknowledged by the literati of our land to supply the important desideratum, and to be the only perfect system of expressing language in existence. For all the varied purposes for which writing is required, Phonography will save five-sixths of the time and labor, inseparable from the use of the present lengthy mode; and as a system of brief writing or short hand, for reporting sermons, speeches, lectures, debates, &c., it combines more than the brevity of Stenography, with more than the legibility of the ordinary longhand; yet such is the simplicity of the art, arising from the truthfulness of the principles on which it is based, that any person can become perfectly acquainted with it in a month, by an hour's daily practice, and thousands have mastered its principles in one-third of the time.

For further information in regard to the Phonetic art, address, through the post-office, Mr. T. SLEE, who will furnish books, and give lessons, in which every principle of phonetic abbreviation will be fully explained and illustrated. [feb2

Hough & Anthony's Daguerreotypes.

THE undersigned would inform their many friends and the public generally, that they have removed their Rooms to No. 62 Fourth st. (a few doors above their old stand) where they have fitted up rooms for Daguerreotyping. Having a very superior arrangement of light, and the most approved instruments now in use, with some ten years experience in the business, they flatter themselves to turn out as good pictures as any other establishment
