DAILY MORNING POST.

WEDNESDAY MORNING:::::::::::::APRIL 5.

THE ENGLISH QUARTER OF GRAIN.—There is some misapprehension existing, says an exchange, as to the quantity of grain contained in an English quarter. It is eight bushels, but not eight Winchester bushels, which is our measure. The quarter contains eight Imperial bushels. The Winchester bushel was the standard in England until 1826, since which time the Imperial bushel has been the standard.

DE GUINON'S
Improved Non-Explosive Camphene Lamps.

HAVING PURCHASED THE right for the above LAMP in the counties of ALLEGHENY, BEAVER, WASHINGTON, FAYETTE, and GREENE, we are prepared to furnish Lamps, or sell Rights for a reasonable price. These Lamps are so constructed as to render explosion impossible, and the public may rest satisfied that they may be used with entire safety. They also give more brilliant light, and the material used being cheaper than the "Long Tallow," or oils of any kind, they must come into general use. We also have LANTERNS and CANDLES on the non-explosive principle.

RECOMMENDATIONS.

"This certifies that we have seen, examined and tried, De Guinon's Improved Non-Exploding Camphene Lamp, patented January 5th, 1852, and are fully satisfied that it is a very valuable improvement, and will be found far preferable to any other Lamp in use. We believe for safety it is perfectly reliable, and therefore deem it richly deserving the attention of all such as have occasion to use Lamps of any kind.
