THE LAW ON NEWSPAPERS.

If subscribers order the discontinuance of their papers, the publisher may continue to send them until arrearages are paid.

If subscribers neglect or refuse to take their newspapers from the offices to which they are directed, they are held responsible until they have settled the bills and ordered them discontinued.

If subscribers move to other places without informing the publisher, and the newspapers are sent to the former direction they are held responsible.

The courts have decided that refusing to take newspapers from the office, or removing and leaving them uncalled for, is prima facie evidence of intentional fraud.

CHAS. W. EPTING, Wholesale and Retail Druggist and Chemist. S. E. Corner Centre and Norwegian Sts., (*Opposite Mortimer's Hotel.*) POTTSVILLE, PENNA.

The subscriber, having taken possession of the house formerly occupied by Mrs. E. M. Beatty, has converted the same into a Drug-and Apothecary Store, such as he thinks will prove satisfactory to all purchasers, and respectfully calls the attention of his friends and the public to his choice stock. He has taken great care in the selection of his drugs. Medicines, &c., and can therefore cheerfully recommend such and every one as being

PURE AND UNADULTERATED.

He is determined to give his undivided personal attention to his business, at all hours of the day and night when required, believing that the *success and reputation of physicians as well as the comfort of their patients* depends in a great measure on the care of the Apothecary and the quality of his drugs and mixtures; and he feels confident that CHEAPNESS, when obtained at the expense of virtue and health, will not be the leading question with his customers, when once his reputation as a careful and competent Apothecary, shall be satisfactorily established.

This reputation he is determined to build up, with the assistance of a share of the public patronage—a fair proportion of which is guaranteed to him by numerous friends, independently of that which he hopes to obtain by close attention to business and strict attention in mixing prescriptions which may affect the health and lives of his customers.

Particular attention to the preparing and compounding of medicines for fastidious speculation he will never resort to, though it is notoriously true that such a dangerous deception is much more extensively and successfully practiced by druggists than can be readily imagined.

Confident of obtaining a name and rank amongst the first of his cotemporaries, he only asks attention to prove his will to serve, and his ability to satisfy one most exacting.

☞ Patrons may with confidence rely upon the prompt and faithful execution of their orders, sent by mail or other wise. CHAS. W. EPTING, Druggist,

PROFESSOR WOOD'S HAIR RESTORATIVE.

ALWAYS SOMETHING NEW.

READ THIS—OLD AND YOUNG!

PROFESSOR WOOD'S HAIR RESTORATIVE, is, no doubt, the most wonderful discovery of this age of wonders! It will restore, permanently, your hair to its original color, cover the head of the bald with a most luxuriant growth, remove at once all dandruff and itching, cure all scrofulous and other cutaneous eruptions, such as scald head, etc. It will cure, in a few days, any nervous or periodical headache; make the hair soft, glossy, and wavy, and preserve the color perfectly, and the hair from falling, to extreme old age.

The Professor is distinguished member of the medical profession:

PROFESSOR O. J. WOOD—

DEAR SIR:—Unsolicited, I send you this certificate. After being nearly bald for a long time, and having tried all the hair restoratives extant, and having no faith in any, I was induced, on hearing of your Hair Restorative, to place myself in the hands of a barber, and had my head rubbed with a good stiff brush, and the Restorative then applied and well rubbed in, till the scalp was quite sore. This was yesterday morning; and in three weeks the young hair appeared and grew rapidly from August last till the present time, and is now thick, black and strong—soft and pleasant to the touch; whereas before, it was hard, and dry, and of a light color, and that little was all dropping very rapidly. I still use your Restorative about twice a week, and shall soon have a good and perfect crop of hair. Yours, &c. Proof of these things—and who has not, but have not yet hitherto any case where any person's hair was really benefited by any of the hair tonic, &c., of the day; and I only offer my testimony to record the truth of my experience. I have recommended your preparation to others, and it already has a large and general sale throughout the Territory. The people here know its efficacy, and have confidence in it. The supply you sent us, as wholesale agents for the Territory, is nearly exhausted, and daily inquiries are made for it. You deserve credit for your discovery; and I, for one, return you my thanks for the benefit it has done me, after I had totally and despaired long ago of ever effecting any such result. Yours, healthily,

JAMES BREE, Agent.

DEAR SIR:—Having become prematurely quite gray, I was induced, some six weeks since, to make a trial of your Restorative. I have used less than two bottles, but the gray hairs have all disappeared, and although my hair has not fully attained its original color, yet the process of change is gradually going on, and I am in great hopes that it will shortly become as dark as it was formerly. I have also been much gratified at the healthy moisture and vigor of the hair, which before was harsh and dry, and it has ceased to come out as formerly. Respectfully yours,

D. C. M. RUPP.

Professor Wood.

CARLTON, Illinois, June 19, 1855.

I have used Professor Wood's Hair Restorative, and have admired its wonderful effect. My hair was becoming, as I thought, prematurely gray, but by the use of his Restorative, it has restored its original color, and I have no doubt, permanently so.

Important Discovery.

CONSUMPTION, ASTHMA, DISEASES OF THE LUNGS AND THROAT, ARE positively curable by Inhalation, which conveys the remedies to the cavities in the lungs through the air passages, and coming in direct contact with the disease, neutralizes the tubercular matter, allays the cough, causes a free and easy expectoration, heals the lungs, purifies the blood, imparts renewed vitality to the nervous system, giving that tone and energy so indispensable for the restoration of health. We be able to state confidently, that Consumption is curable by inhalation, is to me announce of unalloyed pleasure. It is as much under the control of medical treatment as any other formidable disease; ninety out of every hundred cases can be cured in the first stage, and fifty per cent. in the second; but in the third stage it is impossible to save more than five per cent., for the lungs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, inhalation afforded extraordinary relief to the suffering attending the fearful scourge, which annually destroys ninety-five thousand persons in the United States alone; and a correct calculation shows that of the present population of the earth, eighty millions are destined to fill the Consumptive's grave.

Truly the quiver of death has no arrow so fatal as Consumption. In all ages it has been the great enemy of life, for it spares neither age nor sex, but wrests off alike the beautiful, the graceful, and the gifted. By the help of that Supreme being, from whom cometh every good and perfect gift, I am enabled to offer to the afflicted a permanent and speedy cure in Consumption. The first means of infection from impure blood, and the immediate effect, produced by their deposition in the lungs, is to prevent the free admission of air into the air cells, which causes a weakened vitality throughout the entire system. Then surely it is more rational to expect greater good from medicines entering the cavities of the lungs than from those administered through the stomach; the patient will always find the lungs healthy and the breathing easy after the disease is cured. Thus, inhalation is a local remedy, nevertheless it acts constitutionally, and with more power and certainty than remedies administered by the stomach. To prove this powerful and direct influence of this means of administration, chloroform inhaled will entirely destroy sensibility in a few minutes, paralyzing the entire nervous system, so that a limb may be amputated without the slightest pain; inhaling the ordinary burning gas will destroy life in a few hours.

The inhalation of ammonia will rouse the system when fainting or apparently dead. The odor of many of the medicines is perceptible in the skin a few minutes after being inhaled, and may be immediately detected in the blood. A convincing proof of the constitutional effects of inhalation. In the test that sickness is always produced by breathing foul air. In not this positive evidence that proper remedies, carefully prepared and judiciously administered through the lungs, should produce the happiest results? During eighteen years' practice, many thousands, suffering from diseases of the lungs and throat, have been under my care, and I have effected many remarkable cures, even after the sufferers had been pronounced in the last stages, which fully satisfies me that consumption is curable by inhalation. My treatment of consumption is original, and founded on long experience and a thorough investigation of the diseases of the lungs and their kindred vesicles, &c., enables me to distinguish readily, the various forms of disease that simulate consumption, and apply the proper remedies rarely being mistaken even in a single case. This familiarity in connection with certain pathological and microscopic discoveries, enables me to relieve the lungs from the effects of contracted chests; to enlarge the chest, purify the blood, impart to it renewed vitality, giving energy and tone to the entire system.

Medicines with full directions sent to any part of the United States and Canada by patients communicating their symptoms by letter. But the cure would be more certain if the patient should pay me a visit, which would give me an opportunity to examine the lungs and enable me to prescribe with much greater certainty, and then the cure could be effected without my seeing the patient again.
