THE LAW OF NEWSPAPERS.

Subscribers order the discontinuance of their newspapers, the publisher may continue to send them until arrearages are paid.

If subscribers neglect or refuse to take their newspapers from the offices to which they are directed, they are held responsible until they have settled the bills and ordered them discontinued.

If subscribers remove to other places without informing the publishers, they are held responsible.

The courts have decided that refusing to take newspapers from the office, or removing and leaving them uncalled for, is prima facie evidence of intentional fraud.

COLTON'S

New Series of School Geographies.

INTRODUCTORY GEOGRAPHY.

—Small Quarto. 96 pages, 22 maps: beautifully illustrated. The work is every way adapted to the capacity and wants of the young beginner. Care has been taken to avoid everything which should be connected for the young and advanced pupil. The maps have only the principal features delineated, hence they can be easily studied. The lessons are copiously illustrated with appropriate engravings. For instance, in treating of an Island, the subject is illustrated by a map and a picture of an island. So of a peninsula, and of other physical features.

MODERN SCHOOL GEOGRAPHY.—Large Quarto. 154. 40 maps, and numerous illustrations. Designed for that very large class of pupils in our schools who wish to leave the more important facts of Geography, but have not time to consult the vast volumes of modern treatises. In this book, great pains have been taken, by copious exercises, to make the pupil thoroughly acquainted with the maps, and familiar with localities. At whatever time the whole subject of Geography is ordinarily taught, and it is a complete work in itself.

PURE AND UNADULTERATED.

He is determined to give his undivided personal attention to his business, at all hours of the day and night when required, believing that the success of his establishment depends as well as the *invaluable lives of their patients* depends in a great measure on the care of the Apothecary and the quality of his drugs and mixtures; and he feels confident that *carelessness, he contributed at the expense of virtue and health*, will not be the only question with his customers; when once his reputation as a careful and competent Apothecary shall be satisfactorily established.

This reputation he is determined to build up, with the assistance of a share of the public patronage—a fair proportion of which he is guaranteed to him by numerous friends, independently of that which he hopes to obtain by close attention to business and strict attention in mixing prescriptions which may affect the health and lives of his customers.

Deception in the preparing and compounding of medicines for ruthless speculation he will never resort to, though it is notoriously true that such a dangerous deception is much more extensively and successfully practiced by druggists than can be readily imagined.

Confident of obtaining a name and rank amongst the first centres of compounders, he only asks a share of prove his will to serve, and his ability to satisfy the most exacting.

PROFESSOR WOOD'S HAIR RESTORATIVE.

ALWAYS SOMETHING NEW.

READ THIS—OLD AND YOUNG!

PROFESSOR WOOD'S

HAIR RESTORATIVE,

Is, no doubt, the most wonderful discovery of this age of progress, for it will restore, permanently, gray hair to the original color, cover the head of the bald with a most luxuriant growth remove at once all dandruff and itching, cure all scrofula and other cutaneous eruptions, such as scald head, etc. It will cool the head in a most pleasant manner, and by, what little there was of it, and that little was disappearing very rapidly. I still use your Restorative about twice a week, and shall soon have a good and perfect crop of hair. I speak of one of these things—and who has not? but have not seen hitherto any case where any person's hair was really benefited by any of the hair tonics, &c., of the day; and it really gives me pleasure to record the result of my experience. I have recommended your preparation to others, and it already has a large and general sale throughout the Territory. The people here know the facts, and have confidence in it. The supply you sent us, as wholesale agents for the Territory, is nearly exhausted, and daily inquiries are made for it. You deserve credit for your discovery; and I, for one, return you my thanks for the benefit it has done me, for I certainly had despaired long ago of ever effecting any such result. Yours, hastily,

J. W. BOND,

BOSTON, 27 School Street, *March 20, 1855.*

DEAR SIR:—Having become prematurely quite gray, I was induced, some six weeks since, to make a trial of your Restorative. I have used less than two bottles, but the gray hairs have all disappeared; and although my hair has not fully attained its original color, yet the process of change is gradually going on, and I am in great hopes that in a short time my hair will be as dark as formerly. I have also been much gratified at the healthy moisture and vigor of the hair, which before was harsh and dry, and it has ceased to come out as formerly. Respectfully yours,

C. M. RUPP.

Professor Wood.

CARLYLE, Illinois, *June 19, 1855.*

I have used Professor Wood's Hair Restorative, and have admired its wonderful effects. My hair was becoming very thin, and threatening to fall out, but by the use of his "Restorative," it has resumed its original color, and I have no doubt, permanently so.

Important Discovery.

CONSUMPTION, AND ALL DISEASES OF THE LUNGS AND THROAT

ARE positively curable by Inhalation, which conveys the remedies to the cavities in the lungs through the air passages, and coming in direct contact with the disease, neutralizes the virulent matter, allays the cough, causes a free and easy expectoration, heals the lungs, purifies the blood, imparts renewed vitality to the nervous system, giving that tone and energy indispensable for the restoration to health. It can be also is stated confidently that Consumption is curable by inhalation, is to me a source of unalloyed pleasure. It is as much under the control of medical treatment as any other curable disease; nine-tenths of every hundred cases can be cured in the first stages, and fifty per cent. in the second; but in the third stage it is impossible to save more than five per cent. for the lungs are so cut up by the disease as to bid defiance to medical skill. Even, however, in the last stages, inhalation affords extraordinary relief to the suffering attending this fearful scourge, which annually destroys ninety-five thousand persons in the United States alone; and a correct calculation shows that of the present population of the earth, eighty millions are destined to fill the Consumptive's grave.

Truly the quiver of death has no arrow so fatal as Consumption. In all ages it has been the great enemy of life. For it spares neither age nor sex, the young and aged, the beautiful, the graceful, and the gifted. By the help of that Supreme Being, from whom cometh every good and perfect gift, I am enabled to offer to the afflicted a permanent and speedy cure in Consumption. The first cause of tubercles is from impure blood, and the immediate effect, produced by their deposition in the lungs, is to prevent the free admission of air into the air cells, which causes so much vitality, by through the entire system. Then surely it is more rational to expect greater good from medicines entering the cavities of the lungs than from those administered through the stomach; the patient will at once find the lungs free and the breathing easy after inhaling remedies. Thus, inhalation is a local remedy, nevertheless it acts constitutionally, and with more certainty than remedies administered by the stomach. To prove the powerful and direct influence of this mode of administration, chloroform inhaled will entirely destroy sensibility for few minutes, paralyzing the entire nervous system, so that a limb may be amputated without the slightest pain; inhaling the ordinary burning gas will destroy life in a few hours.

The inhalation of ammonia will rouse the system when fainting or apparently dead. The odor of many of the medicines is perceptible in the skin a few minutes after being inhaled, and may be immediately detected in the blood. A convincing proof of the constitutional effects of inhalation, is the fact that sickness is always produced by breathing foul air. In not the positive evidence that proper remedies, carefully prepared and judiciously administered through the lungs, should produce the happiest results? During eighteen years' practice, many thousands, suffering from diseases of the lungs and throat, have been under my care, and I have effected many remarkable cures, even after the sufferers had been pronounced in the last stages, which fully satisfies me that consumption is no longer a fatal disease. My treatment of consumption is original, and founded on long experience and a thorough investigation. My perfect acquaintance with the nature of tubercles, &c., enables me to distingu
