DAILY MORNING POST.

SATURDAY MORNING.....FEBRUARY 3.

BIBLE STATISTICS.—We find the following in an exchange. We cannot vouch for its accuracy:

	In the Old Testament.	In the New Testament.	Total.
Books	39	27	65
Chapters	929	260	1,189
Verses	23,214	7,959	31,173
Words	592,493	181,253	773,746
Letters	2,728,100	838,380	3,566,480

The Apocrypha has 183 chapters, 6081 verses and 125,185 words. The book of Esther has ten chapters, but neither the word Lord or God in them. The first English edition was printed in England in the year 1536, and was permitted to be translated by the Pope, into all languages of the Catholic States, February 20th, 1759.

It may be interesting to some people—especially those who sometimes think of having their old family family Bible re-printed—to know how long it would take a man to distribute and set the type of a Bible. Basing our calculation upon the total number of words, and total number of letters above stated, we find that it would require about 845 ordinary days work, of ten hours each, to accomplish the task. The spaces between the 773,746 words would amount to 286,848 *ems*, printers' phrase, and the 3,556,480 letters to 1,783,240 *ems*—averaging two letters to an *em*—forming a total number of ems amounting to 2,070,088. This, at 6,000 ems per day, would require 345 days to complete. The cost of which would be, at the present price of type setting, $679,60. This is exclusive of paper, press work, ink, folding, stitching, binding, &c.
