Stoves.

QUEEN'S PORTABLE FORGE.—Doubtless many of our city readers, in passing the gauge of workmen employed in laying down the frame of the passenger railroad tracks in our streets, had their attention attracted to a portable forge, with bellows and everything complete, and in efficient service. These forges, built upon the plan secured by C. V. Queen's patent, are for sale at the commodious, long-established, and deservedly popular Stove, Range, and Furnace establishment of WARNICK, CHADWICK, & BROTHER, corner of SECOND and RACE Streets, who have the sole right for the sale of Queen's Portable Forge in Pennsylvania.
There are, we believe, five sizes of this forge, ranging in price from twenty-two to forty-four dollars—a sum so small, when contrasted with its merits, as to secure its general introduction; for any one who will for a moment consider the advantages of this forge, which may be removed from place to place, so as always to be on the spot where workers in iron or other metals are to perform service, whether in original construction or repairs, will at once concede its great efficiency, and arrange for its possession and use. The adaptability of this forge to repairs to railroads and mining machinery especially commends it to railroad companies and operators in the mining districts. We, therefore, take pleasure in calling to it the attention of road masters, superintendents of mines, and others.—[From the United States Railroad and Mining Register oc7-1m

SOMETHING NEW.—GAS BURNING COOK STOVE.—I would respectfully call the attention of the public to one of the greatest improvements ever introduced in Cooking Stoves and Ranges—the burning of the gas arising from the coal, by which means is saved 50 per cent. in fuel and also more intense heat thrown to the bottom of the oven. We effect the burning of the gases by means of a hollow centre-piece, perforated on the under side, which admits the air in a heated state to mingle with the gases, thus aiding its combustion, and causing a flame to pass around the oven equal to a wood fire. This improvement also preserves the centre piece from sinking down on the fire, thereby saving the expense of repairs. One of the Stoves CAN BE SEEN IN OPERATION at 1116 MARKET Street Manufactured by JAMES SPEAR, Inventor and Patentee, (late North, Chase & North,) 1116 MARKET Street. sep29-3mo
